

Labour Migration from Rural Odisha

Profiles of Four Blocks

Background

- [Gram Vikas](#) is a community development organization working in Odisha and Jharkhand since 1979. It works with rural poor and tribal communities to help them lead a dignified life by building capacities, strengthening community institutions and mobilising resources.
- [Centre for Migration and Inclusive Development \(CMID\)](#) is a non-government organisation devoted to migration and inclusive development, advocating for and promoting the social inclusion of migrants and other socially disadvantaged populations in India. It stresses on innovations and resources to address the challenges faced by migrant populations.
- The two organisations have come together to understand the issues around migration and the migrant workers, their dependent families and their communities, and to develop meaningful and impactful interventions to make migration safe and dignified.
- A rigorous, intensive exercise was undertaken to study the various aspects of migration in four Blocks in four Districts of Odisha to understand migration from these locations and the impact of COVID pandemic on communities and to help evolve evidence informed strategies to promote resilience of partner communities

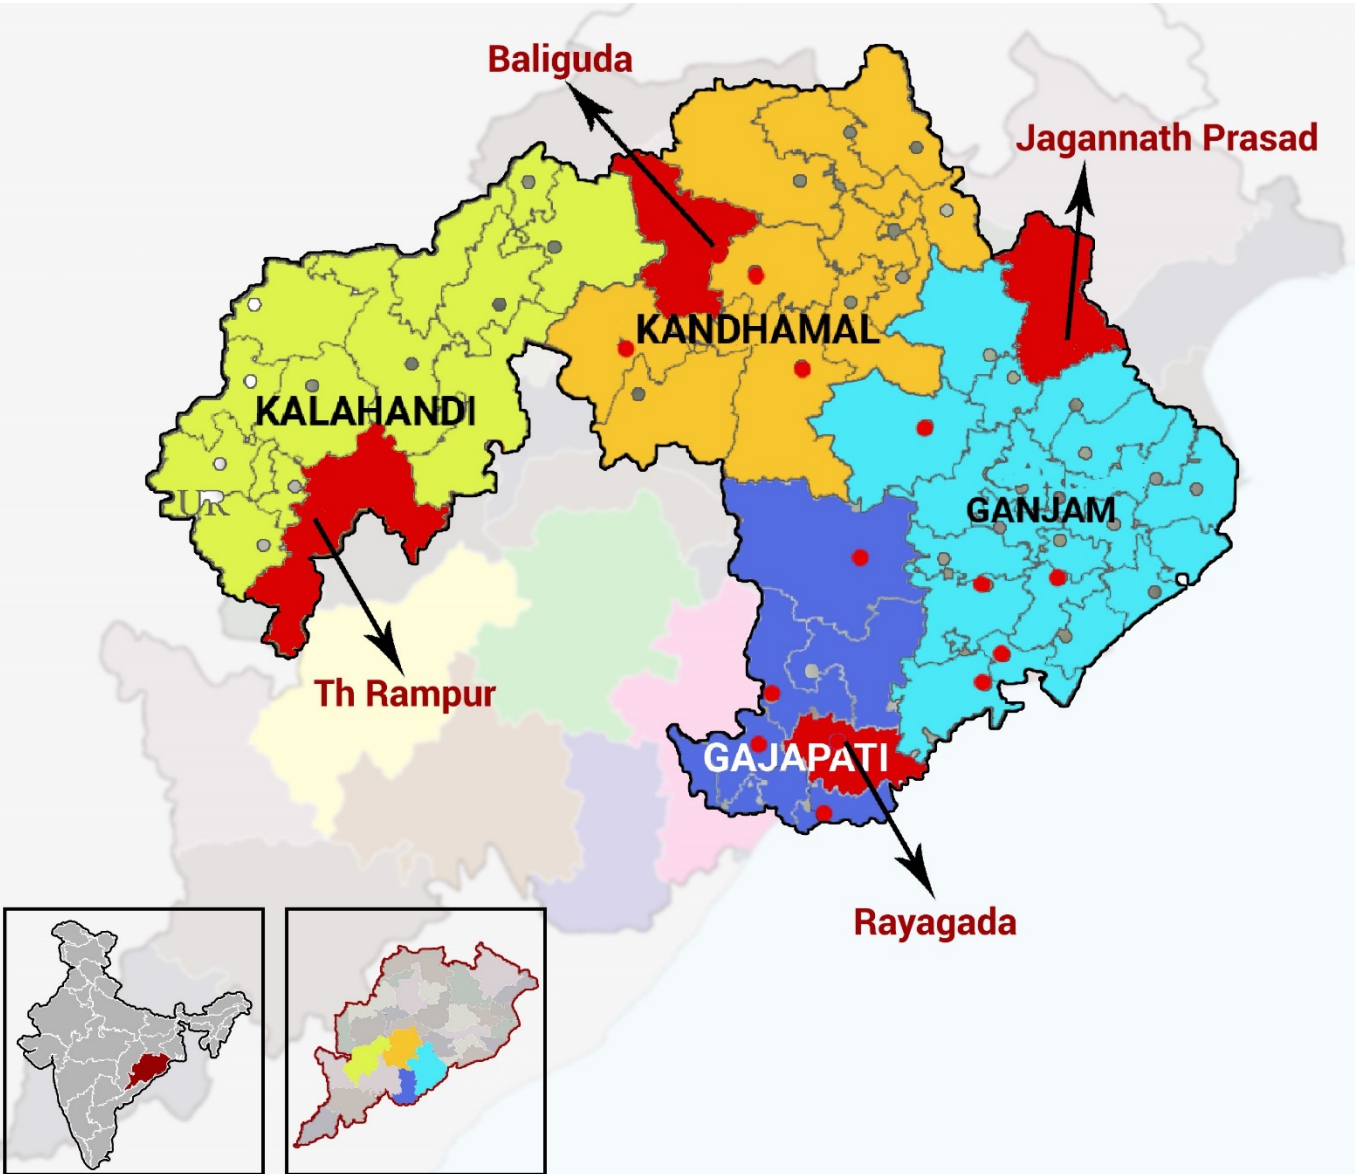

Context of labour migration from rural Odisha

Scope of the profiling exercise

- Estimate the household migration rates for the Block
- Understand the impact of migration on the households
- Understand the socio-demographic profile of households and migrants
- Explore the impact of COVID-19 lockdown (except for Thuamul Rampur)

Labour Migration from Rural Odisha

Profiles of Four Blocks

Incidence of Migration

History of labour migration

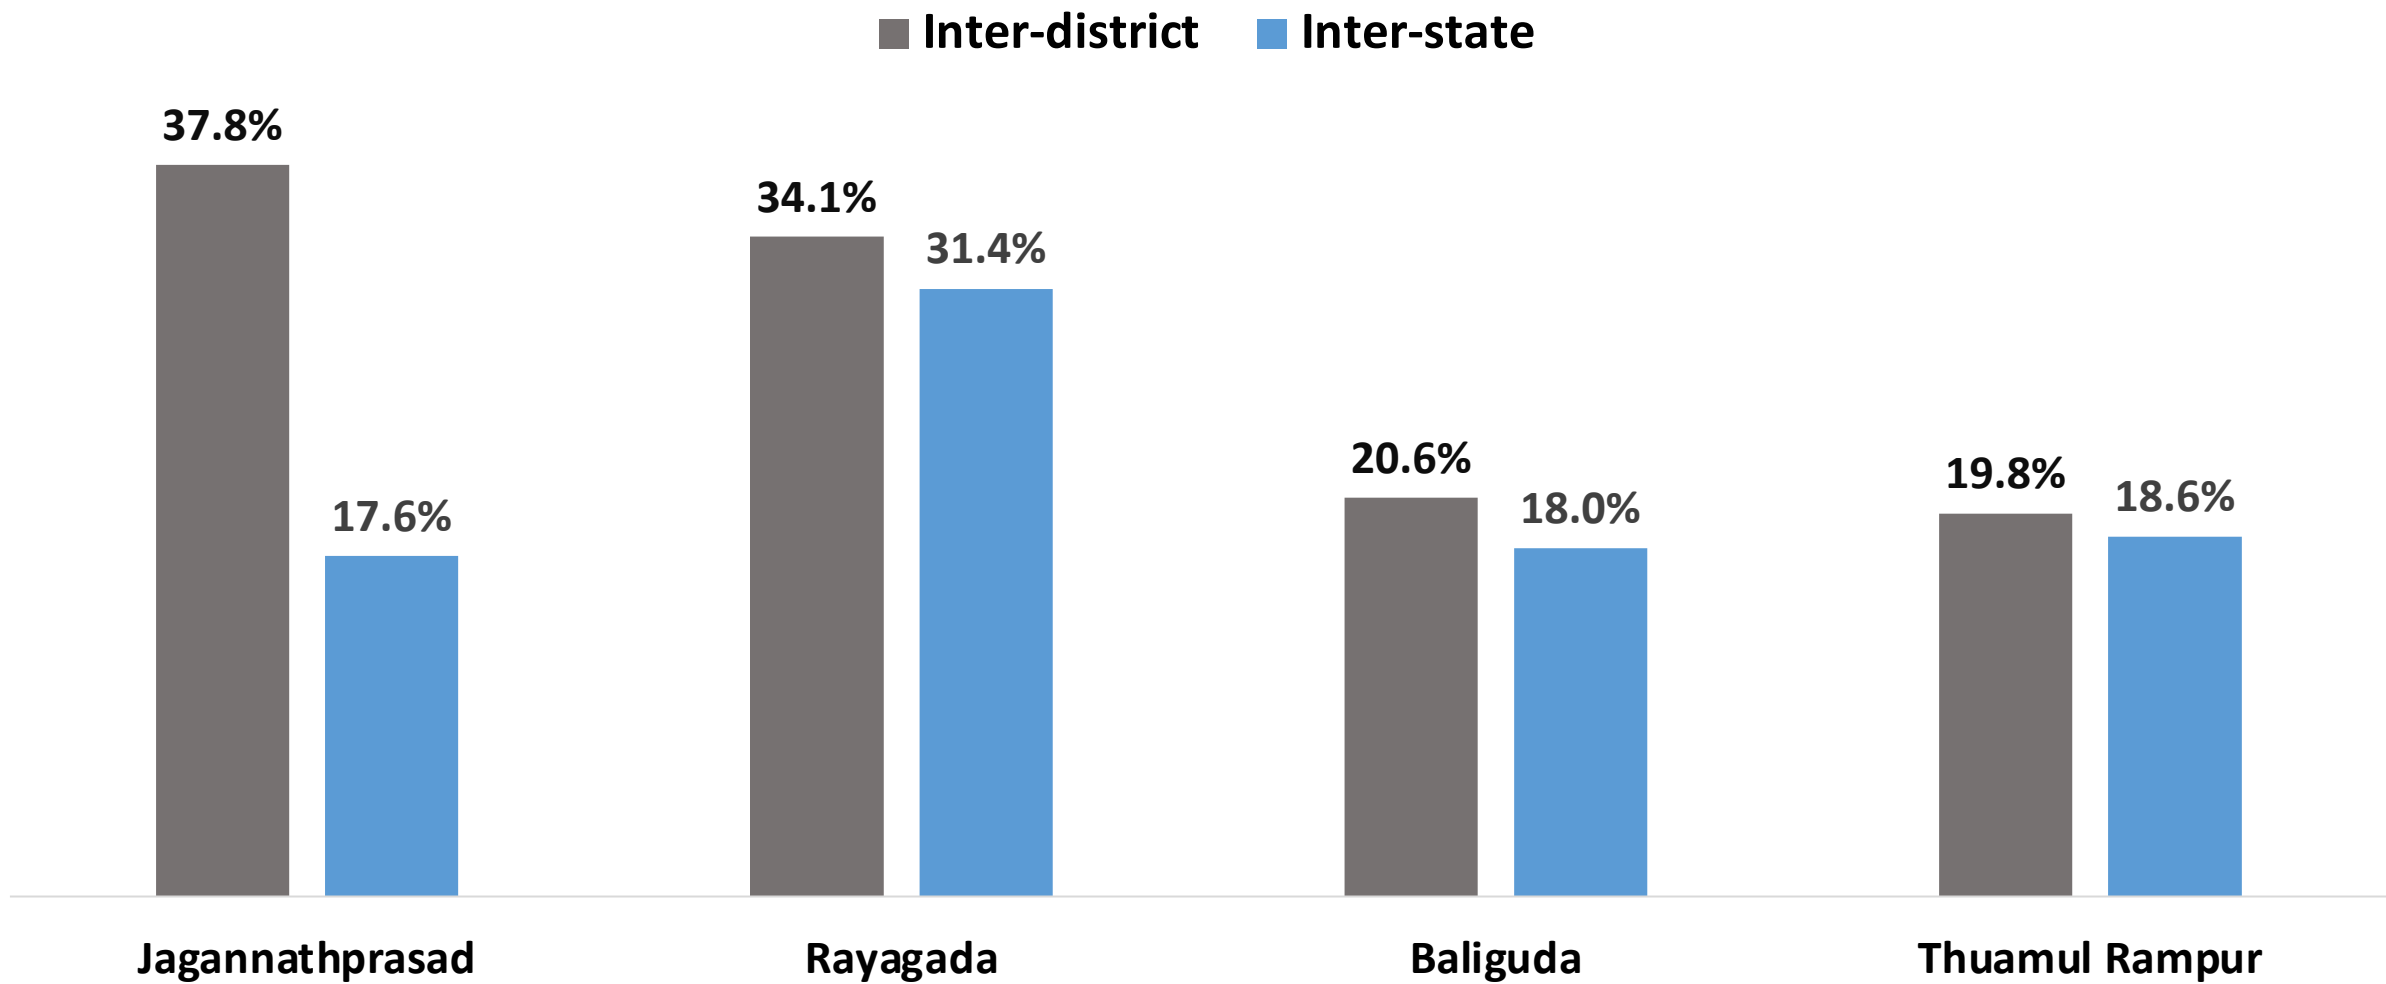

Proportion of households whose members, currently alive of dead, had stayed continuously for a period of 30 or more days for work outside the district, ever and during the past 10 years

■ Ever ■ Past 10 Years

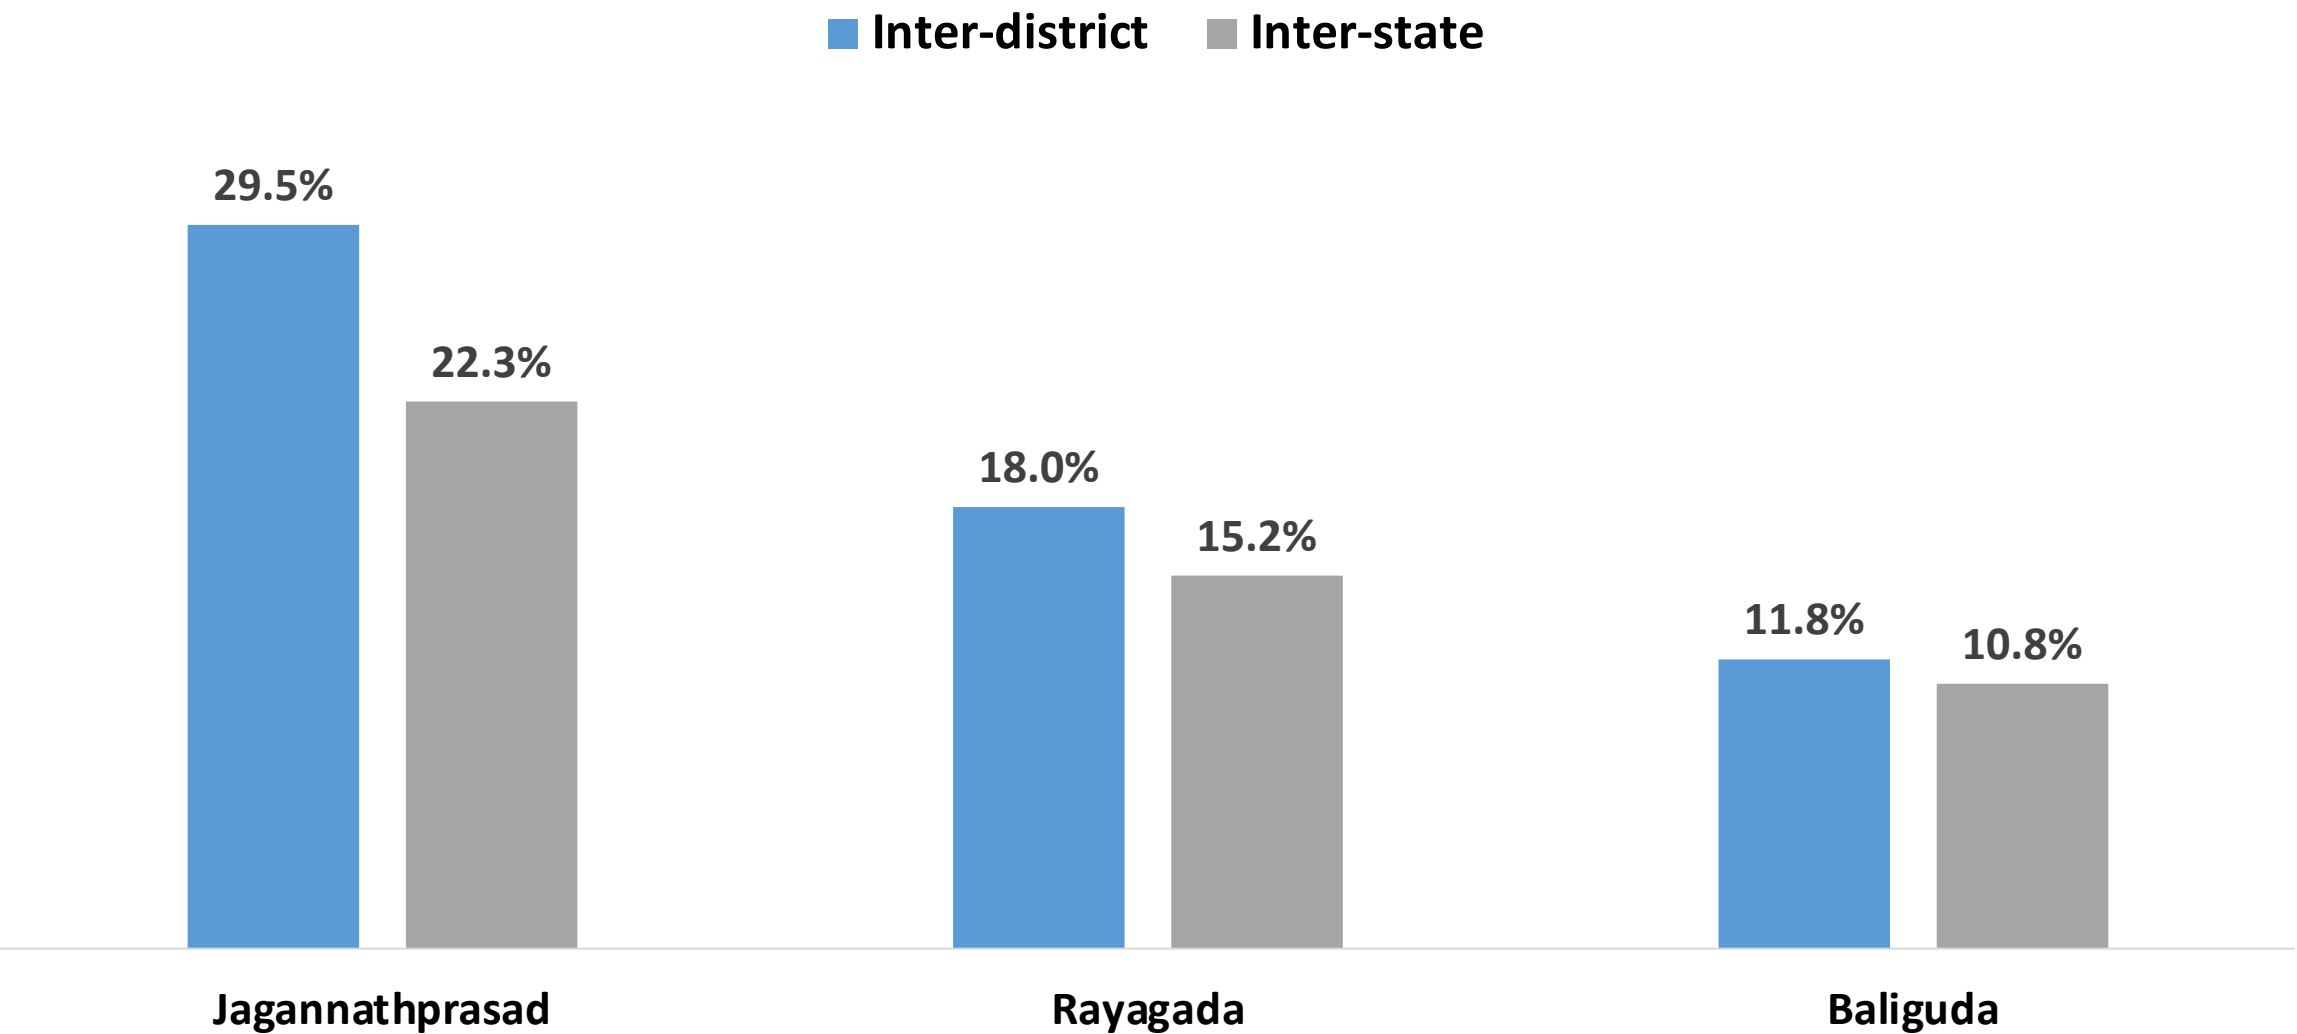

Household migration rates – pre-COVID

Proportion of households who had at least one person migrated for work outside the District or State (October 2019 for Thuamul Rampur and March 2020 for the other Blocks)

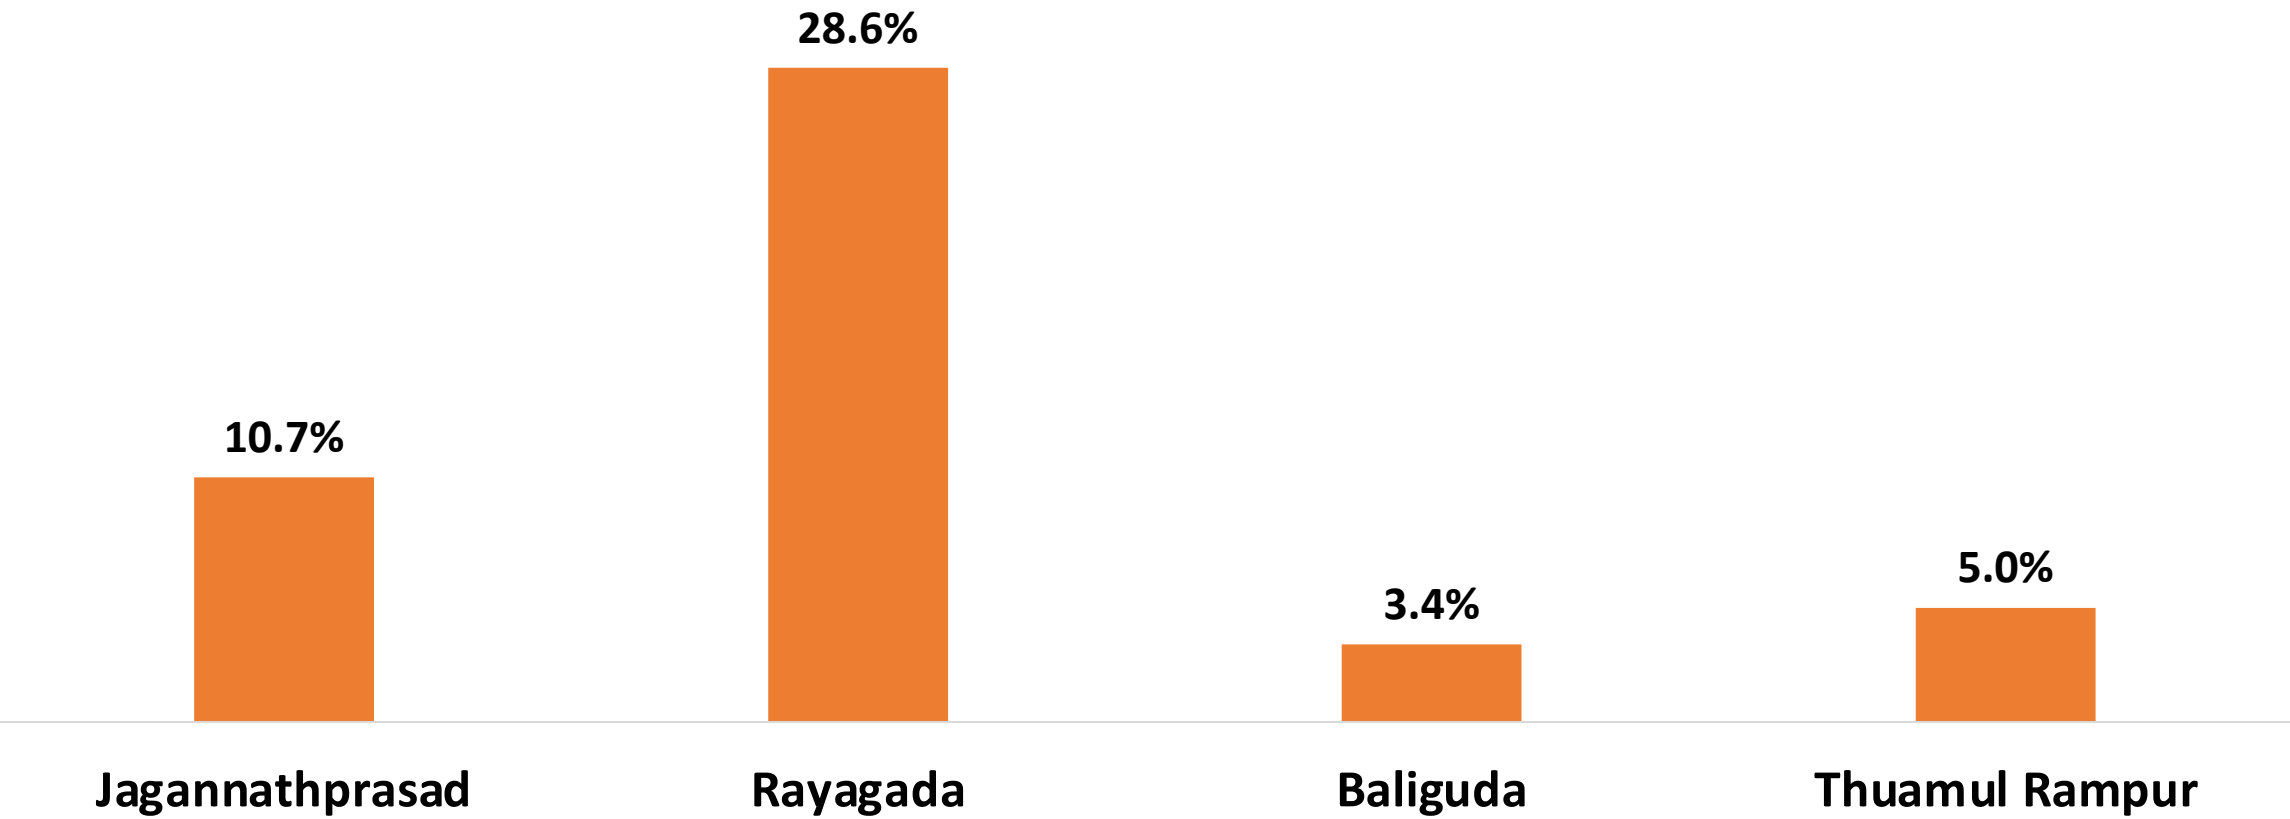

Household migration rates – post COVID

Proportion of households who had at least one person migrated for work outside the District or State (September-October 2020 for three Blocks, not done for Thuamul Rampur)

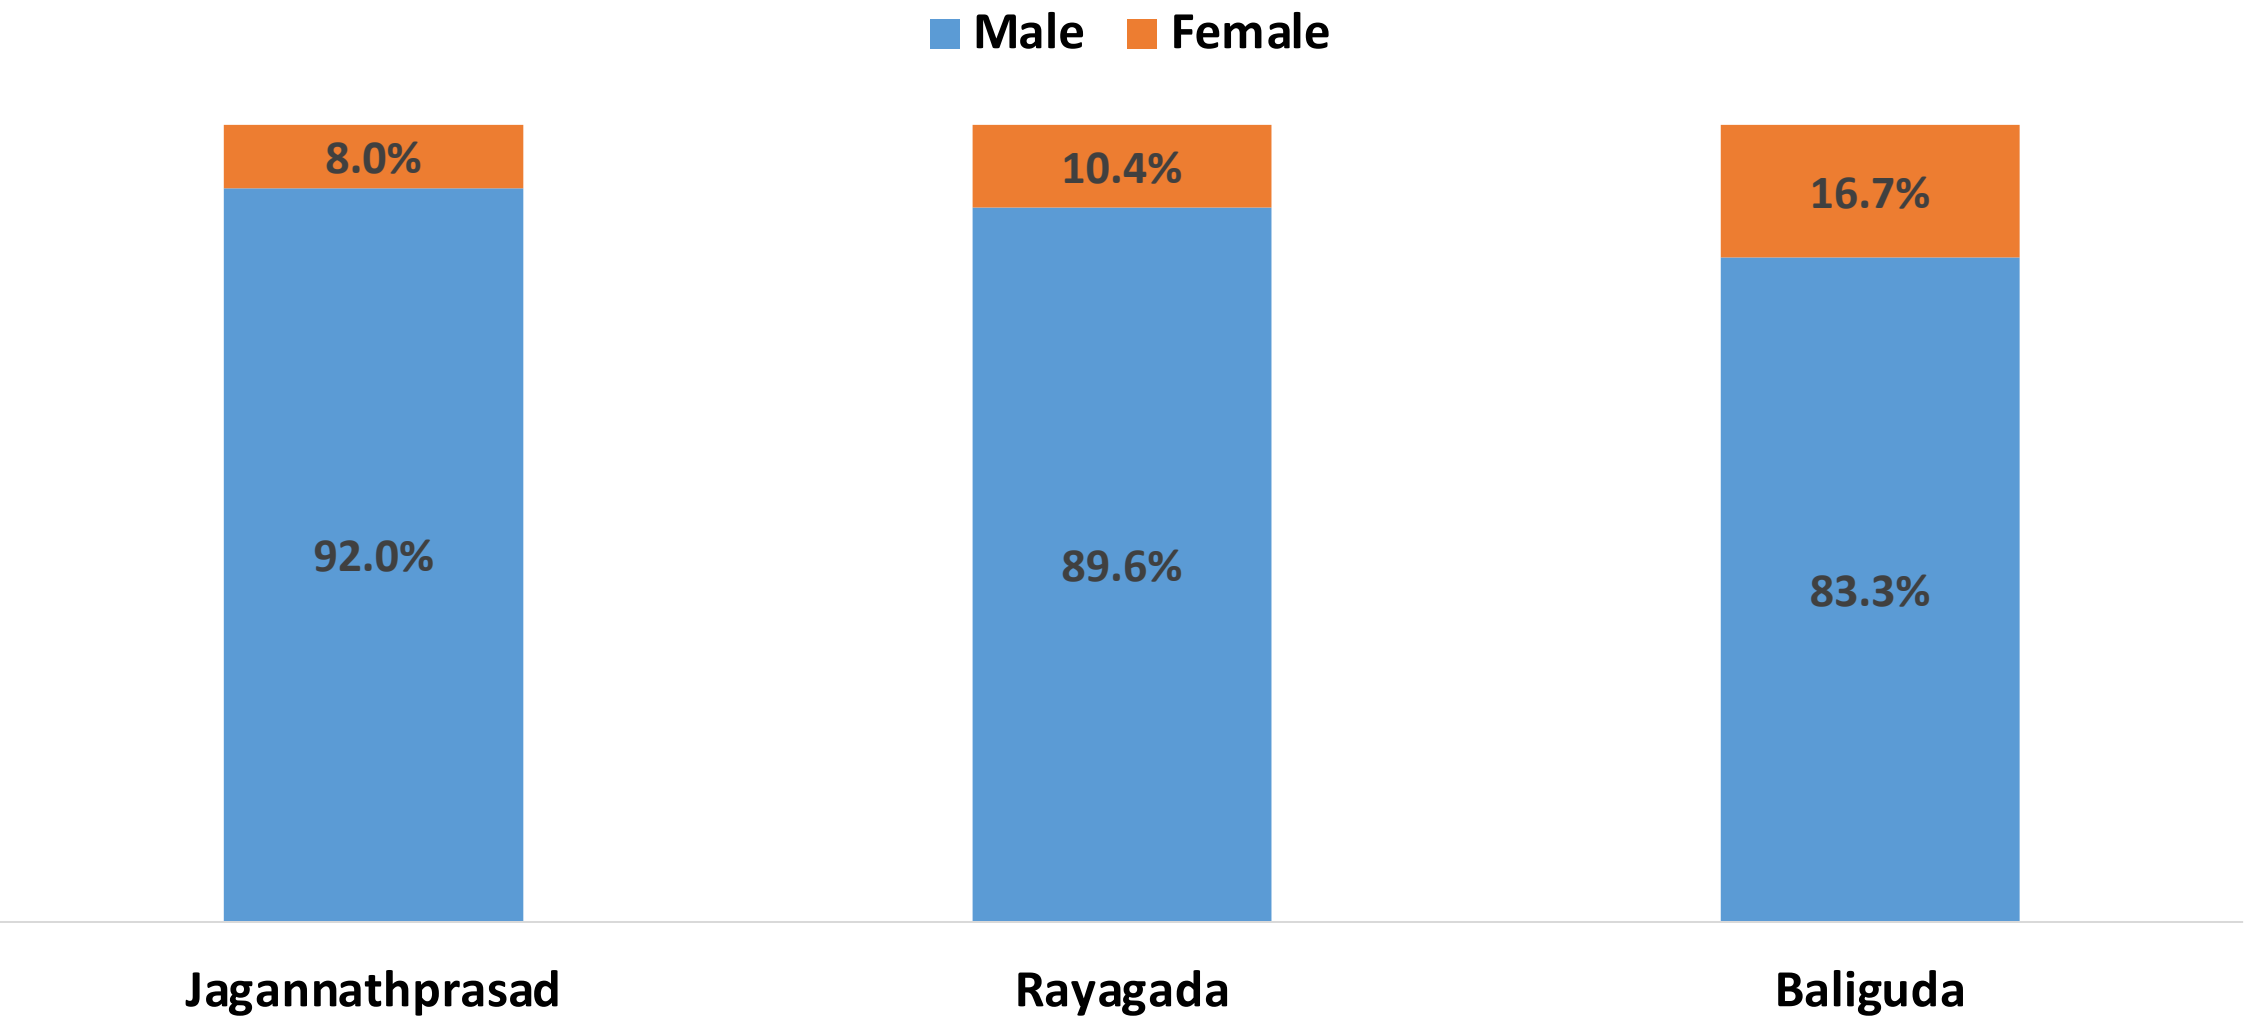

Seasonal Migration

Proportion of households who had at least one person migrated for work outside the District or State for a period of six months or less and work rest of the year at native place (October 2019 for Thuamul Rampur and March 2020 for the other Blocks)

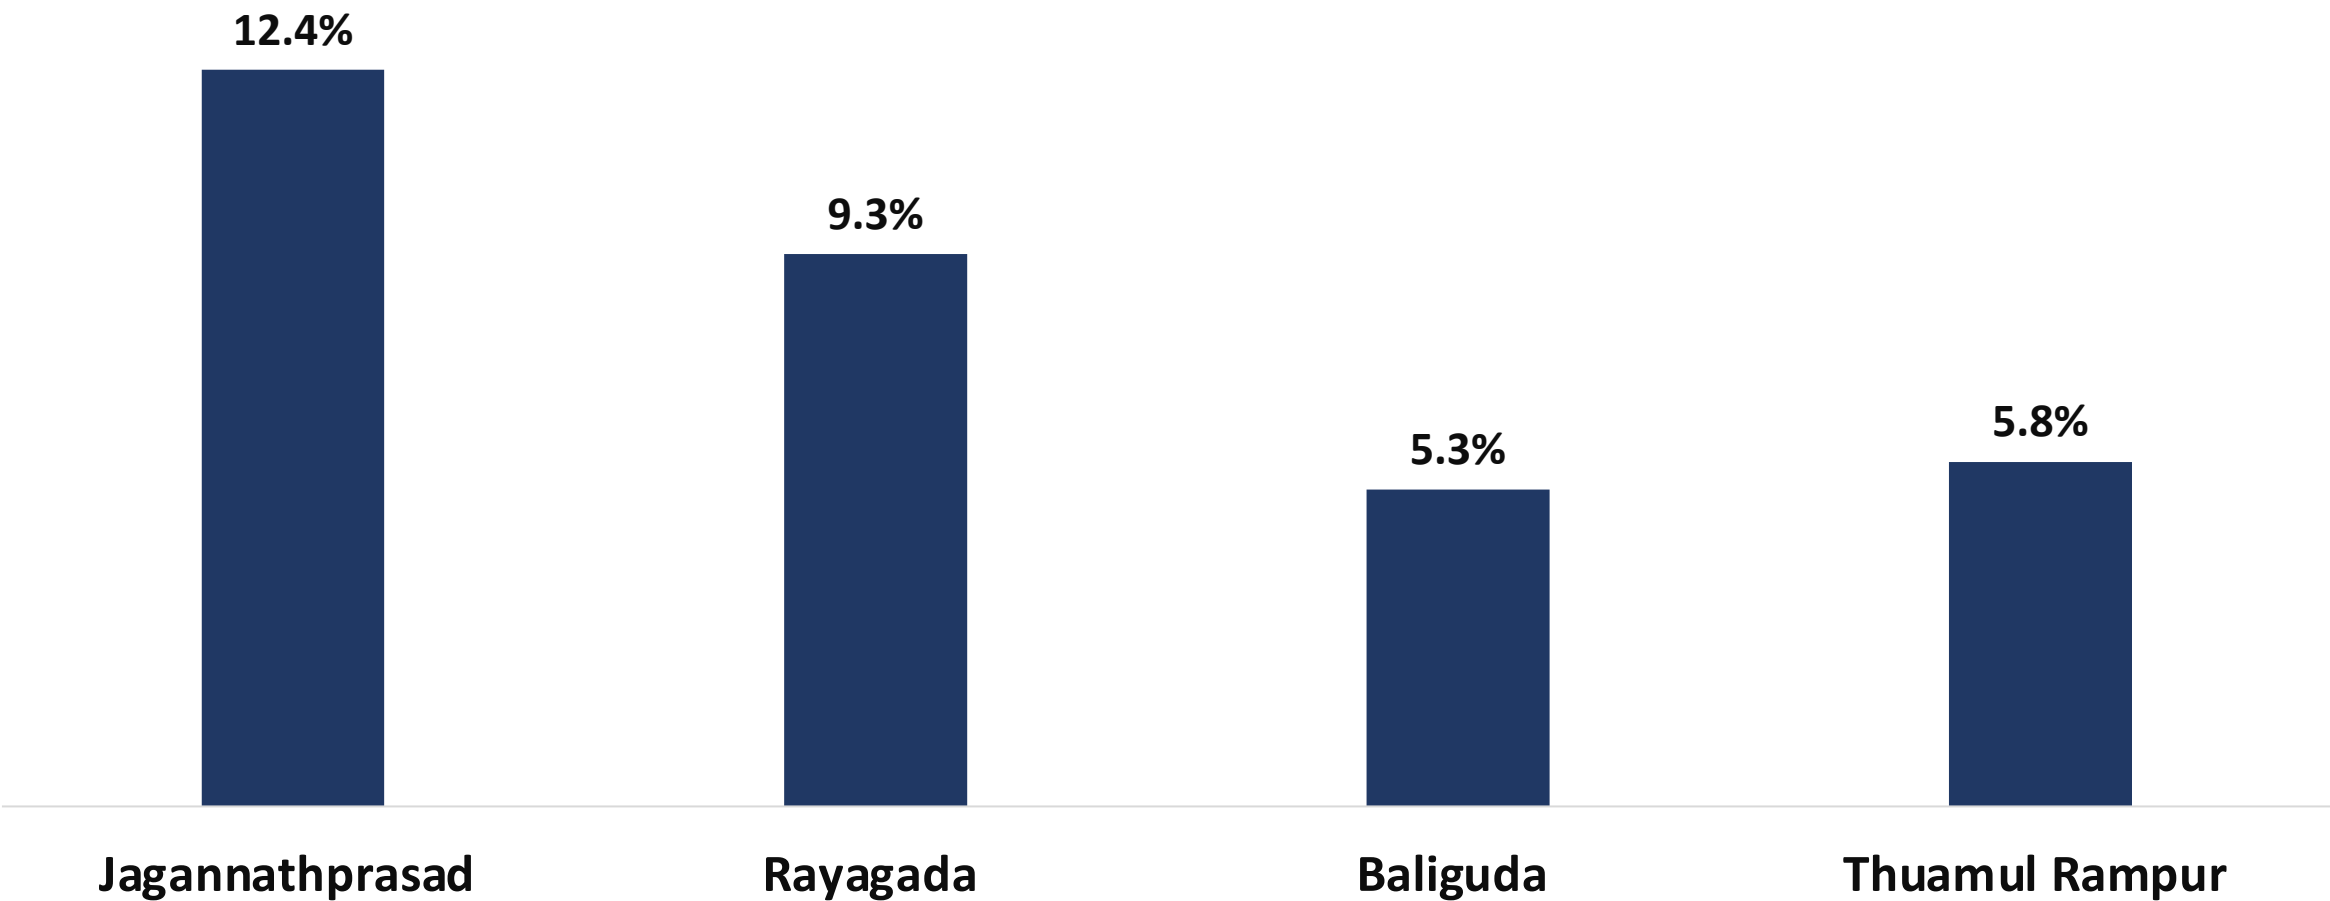

Distribution of migrant workers by sex

Proportion of men and women among migrant workers as reported by their households (not available for Thuamul Rampur)

Percentage of migrant workers to the total population of the Block

Proportion of the population of the Block who was outside the District for work (October 2019 for Thuamul Rampur and March 2020 for the other Blocks)

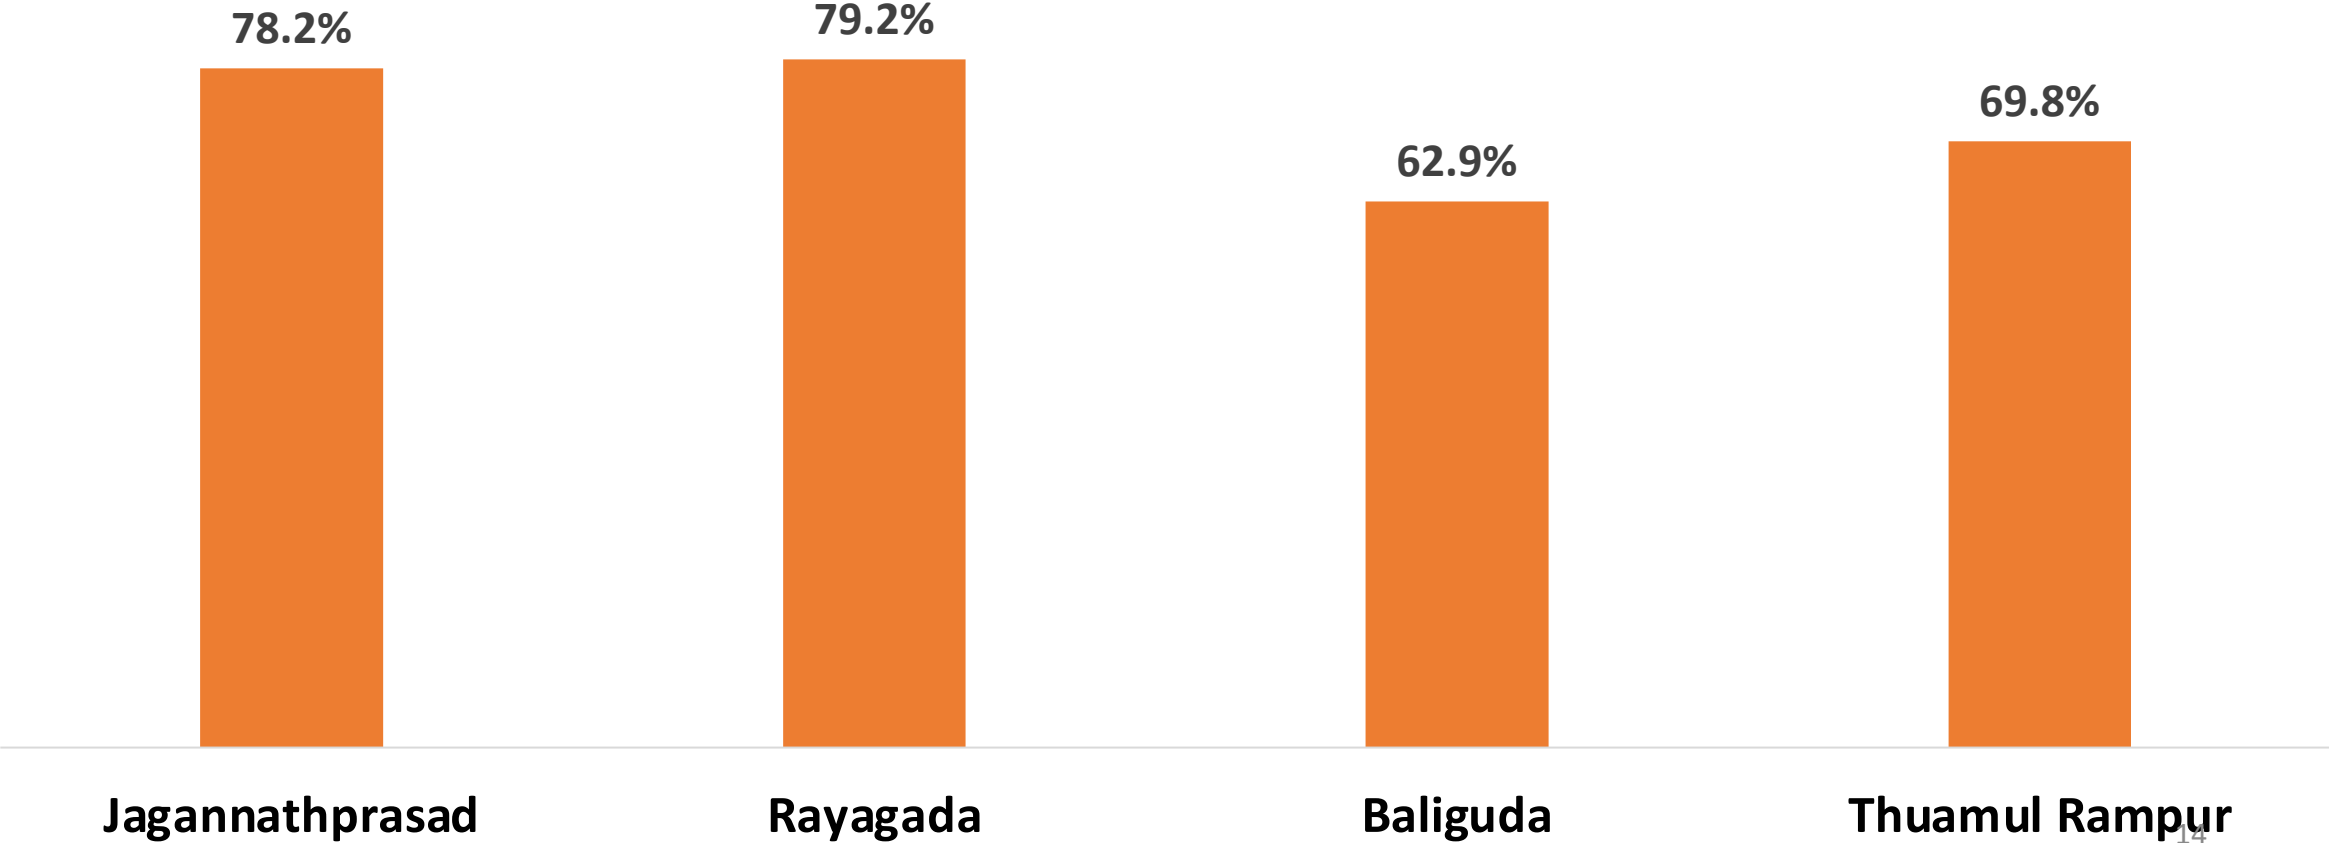

Labour Migration from Rural Odisha

Profiles of Four Blocks

Effects of Migration

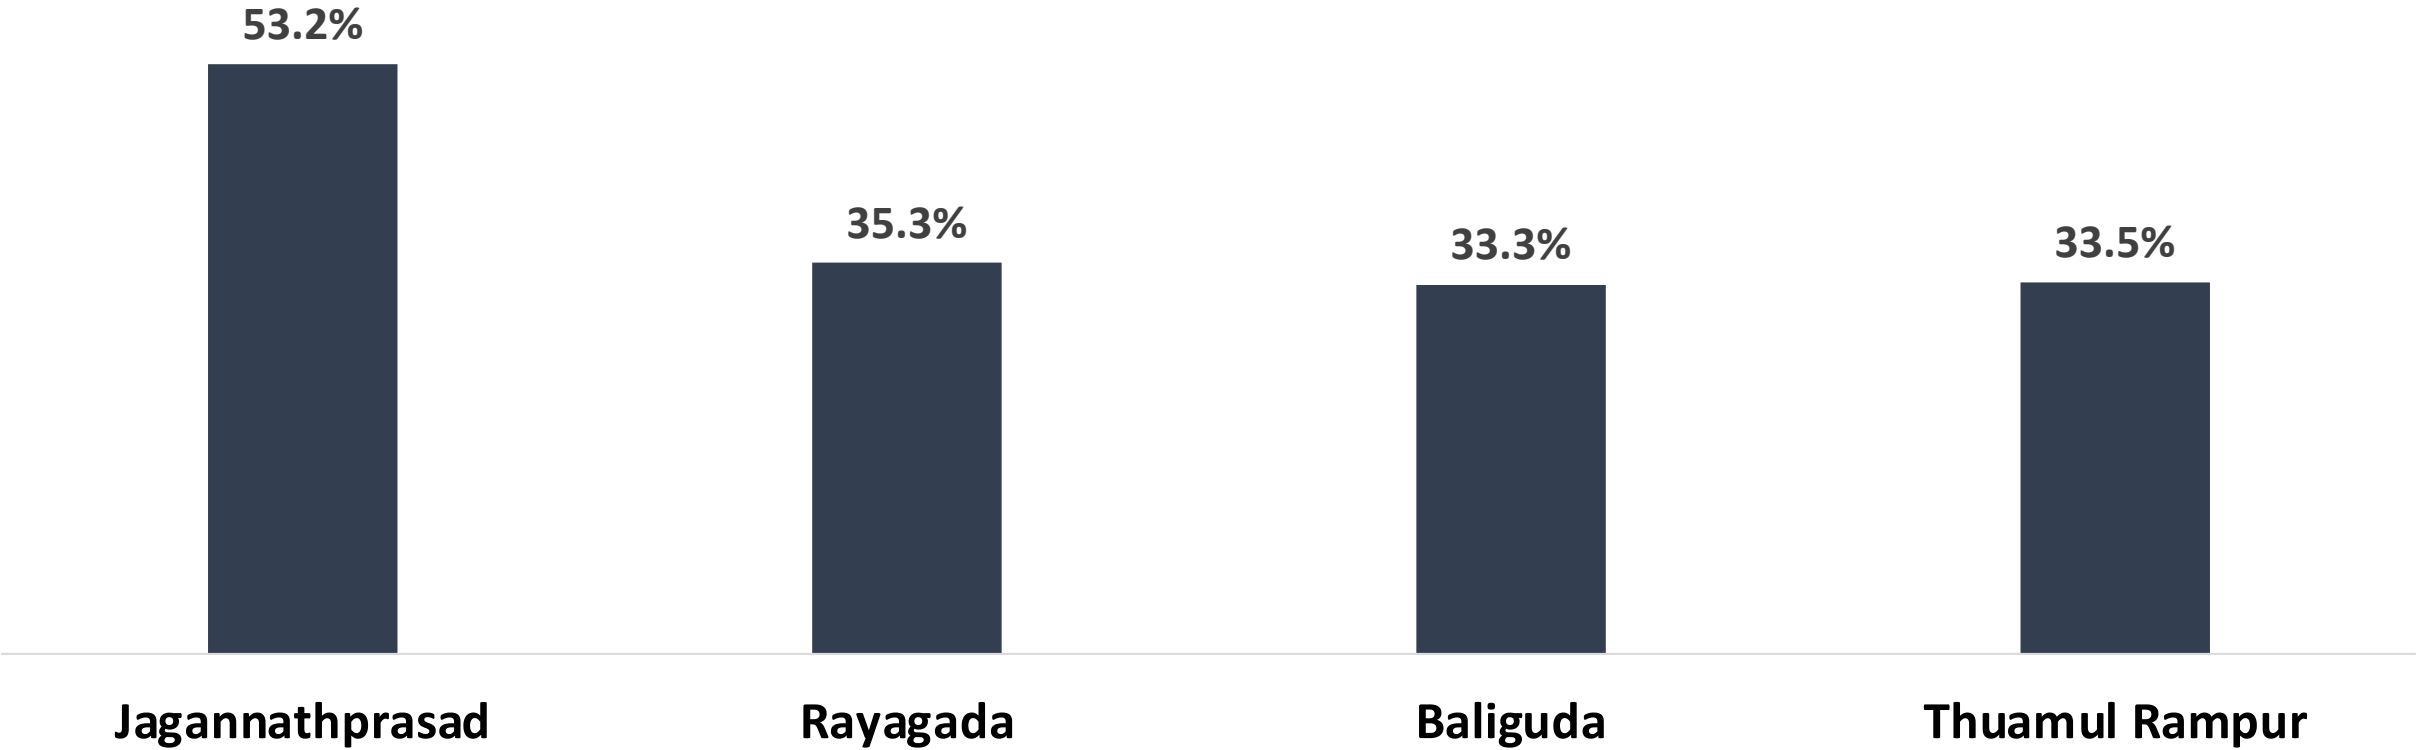

Impact of migration on the household – coming out of poverty

Proportion of households reporting that they would not have been able to come out of poverty without the income from the migrant member/s of the household

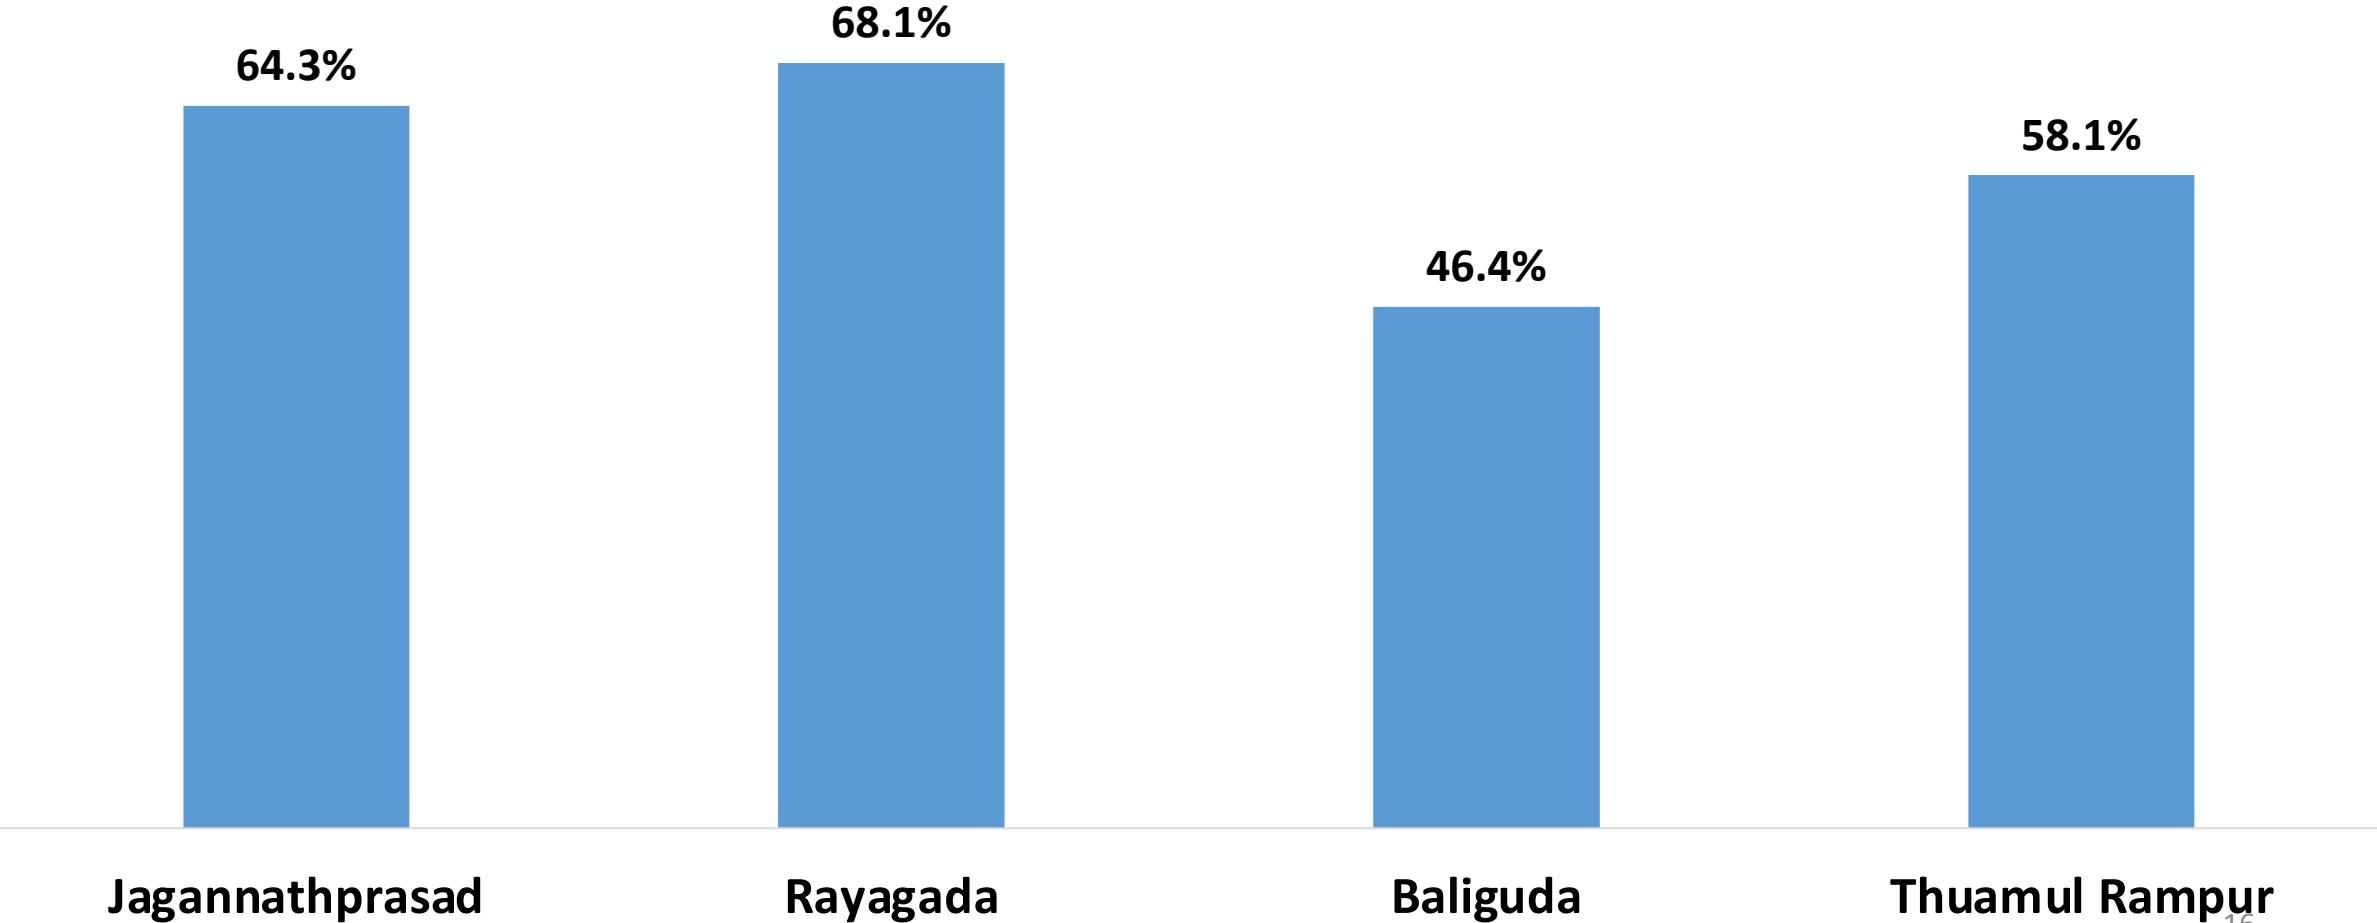

Impact of migration on the household – repayment of debt

Proportion of households reporting that they would not have been able to repay debt without the income from the migrant member/s of the household

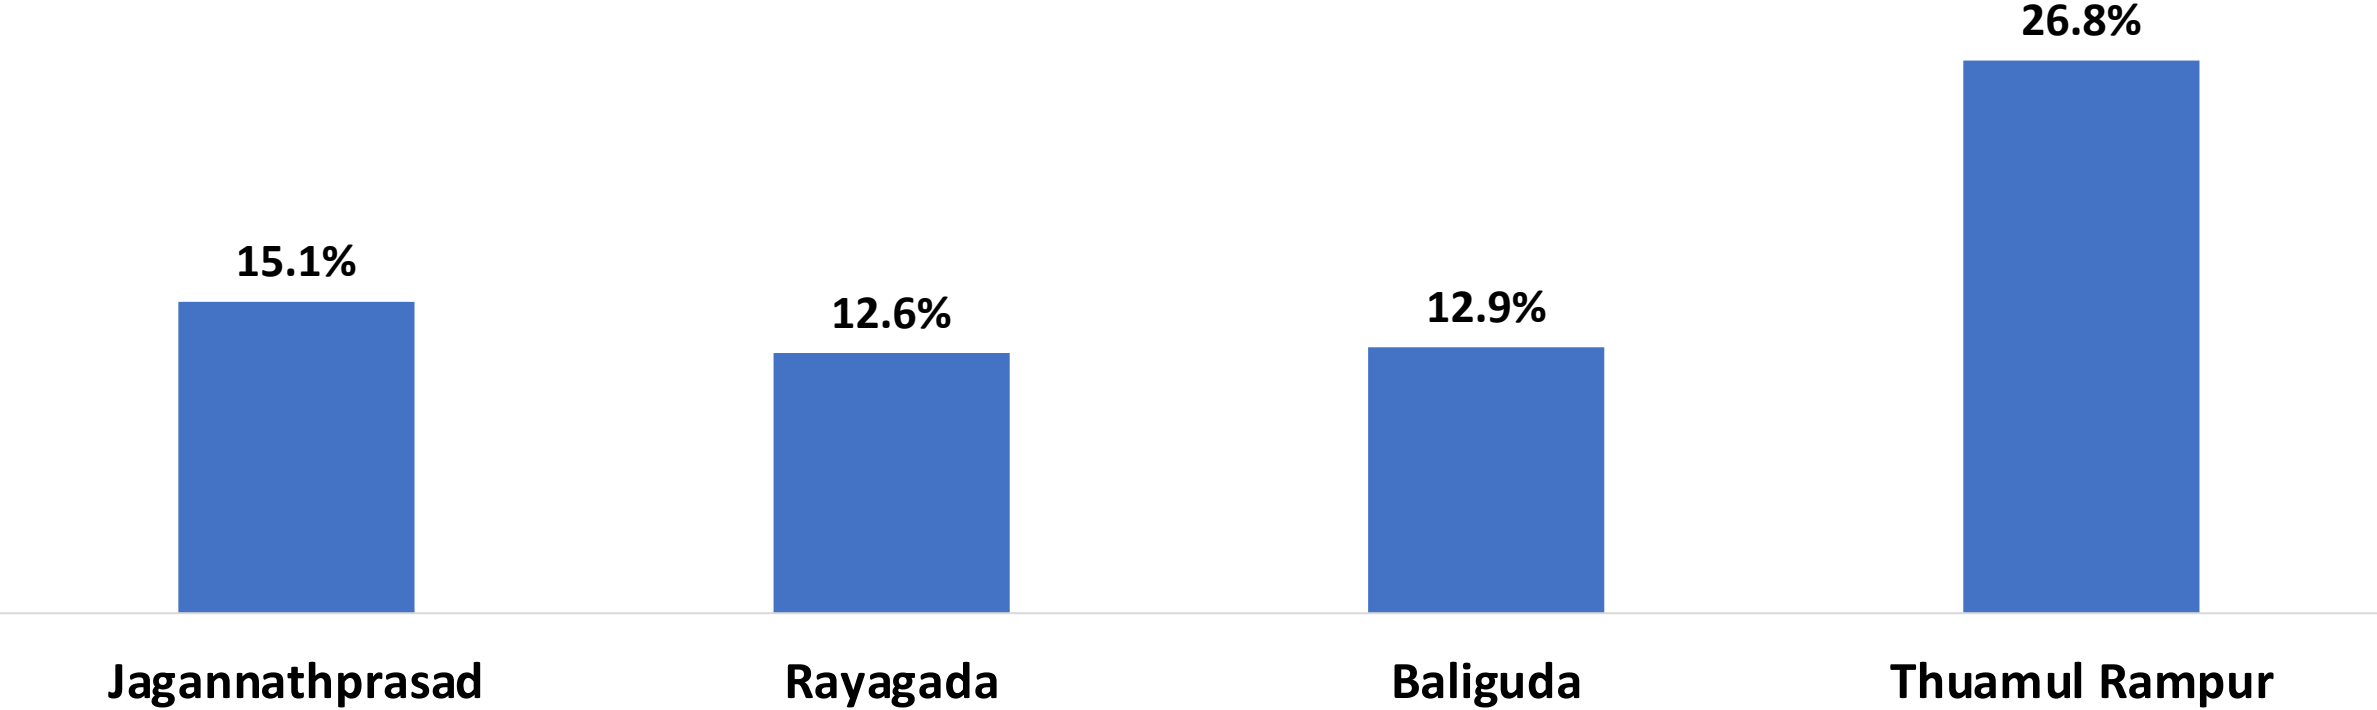

Impact of migration on the household – increased savings

Proportion of households reporting that their savings have increased due to income from the migrant member/s of the household

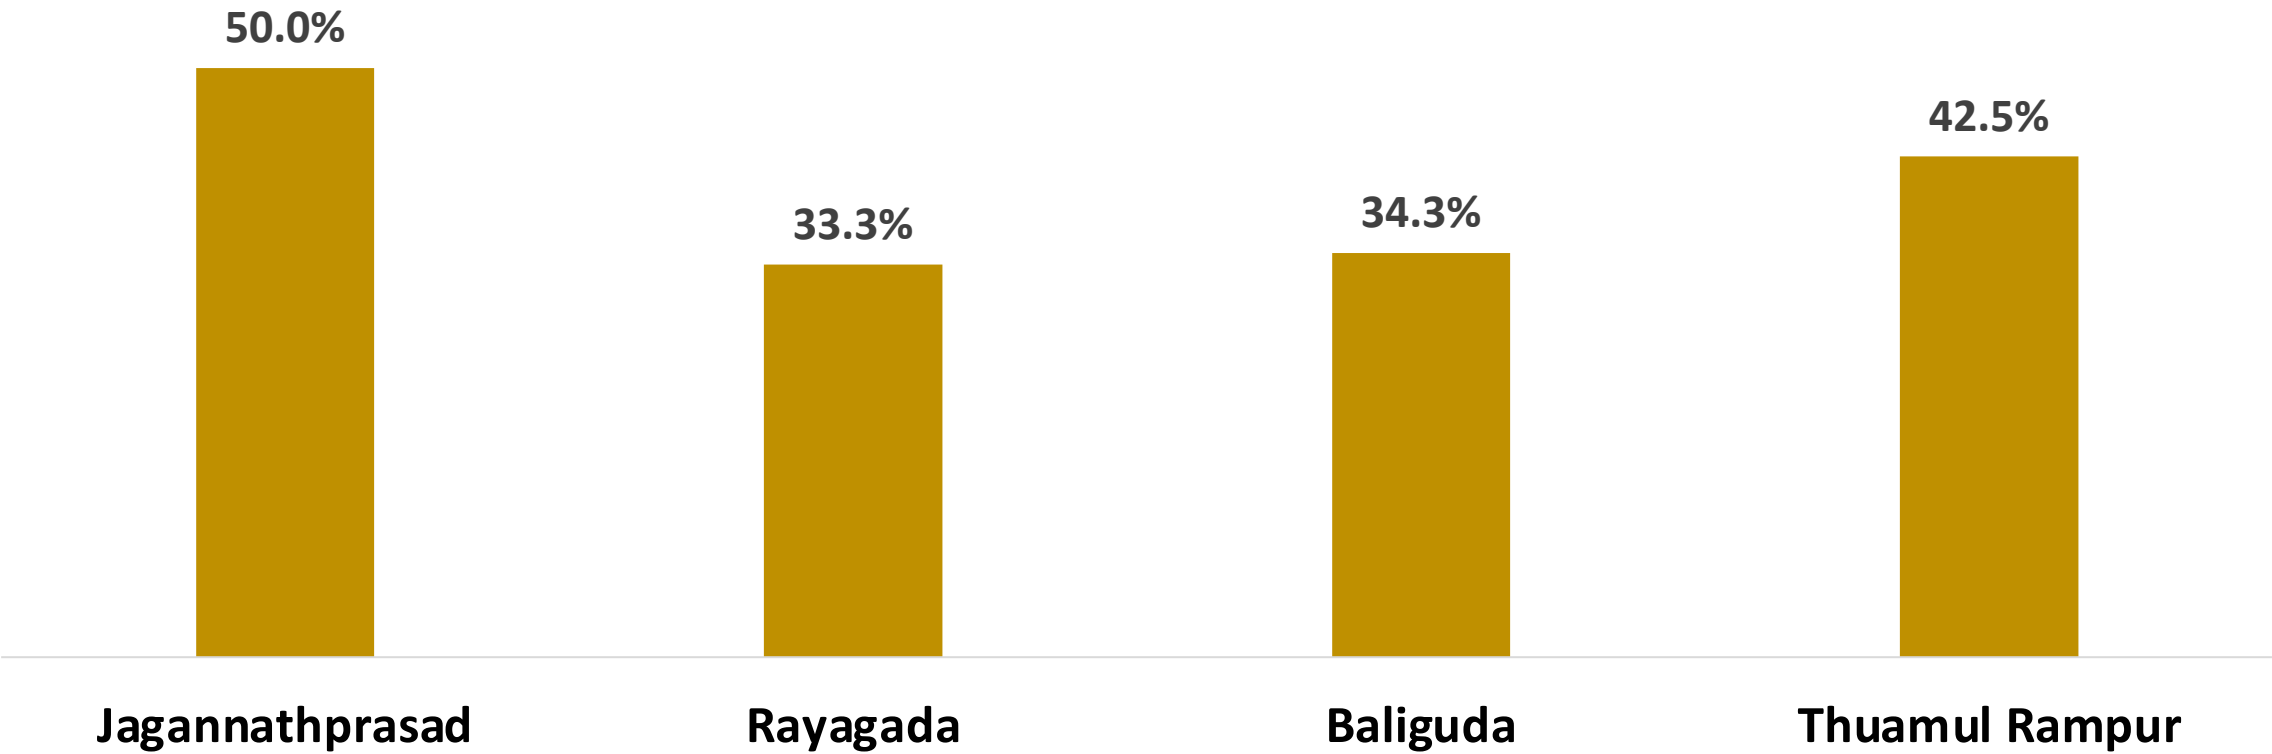

Impact of migration on the household – diversified income

Proportion of households reporting that they have been able to diversify household income sources

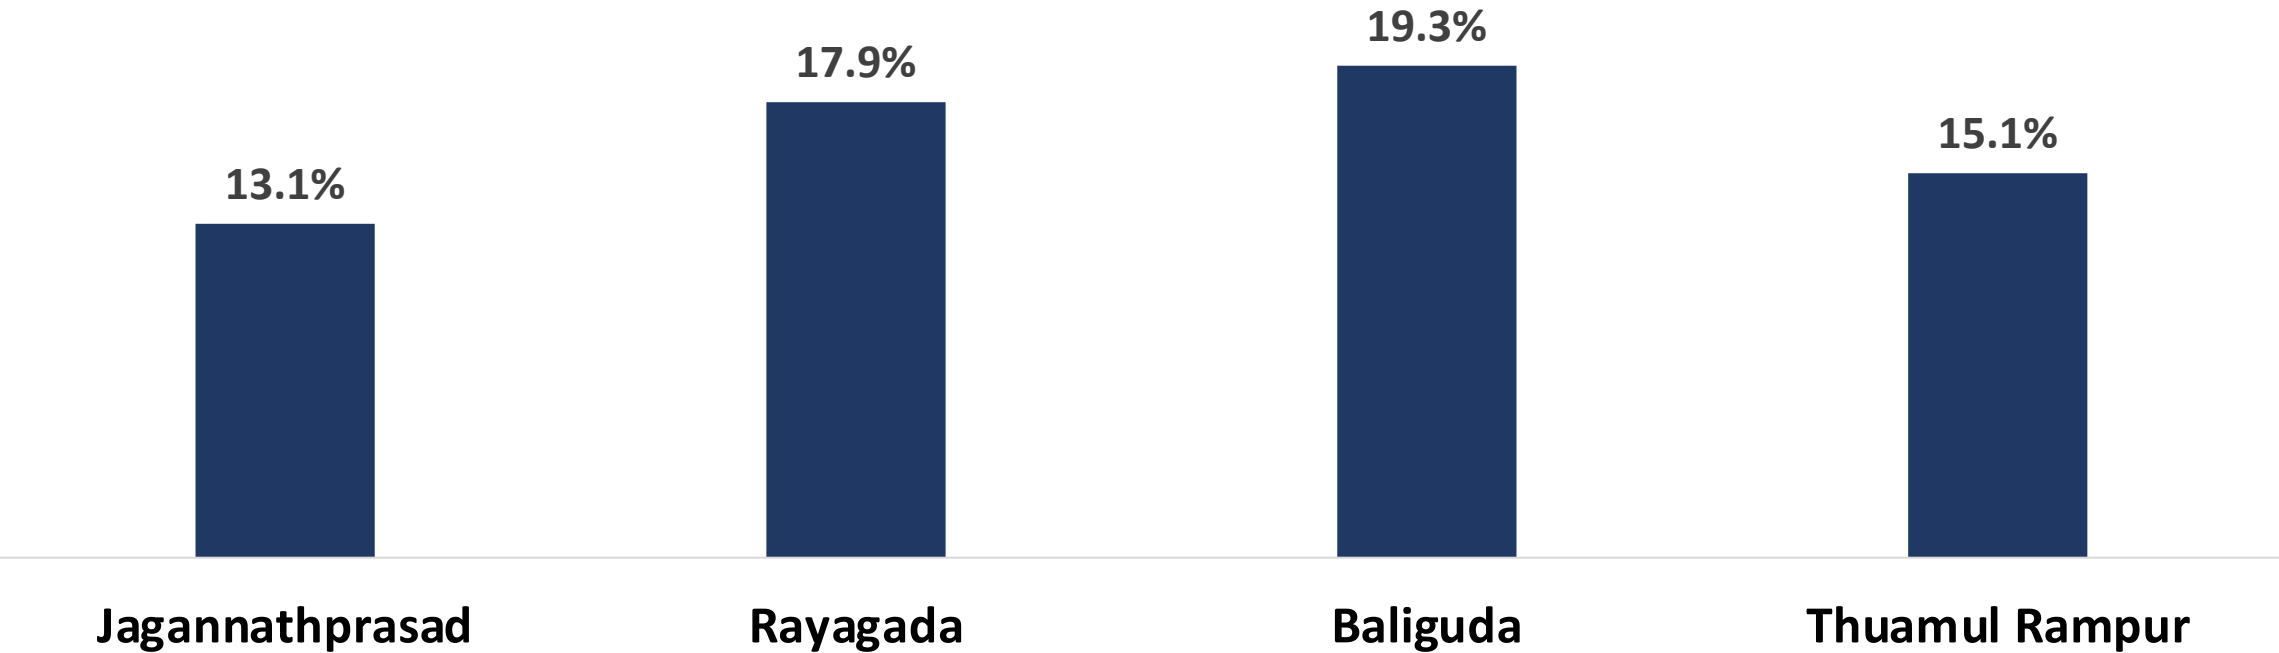

Impact of migration on the household – improved agriculture

Proportion of households reporting that they were able to improve agriculture using income from the migrant member/s of the household

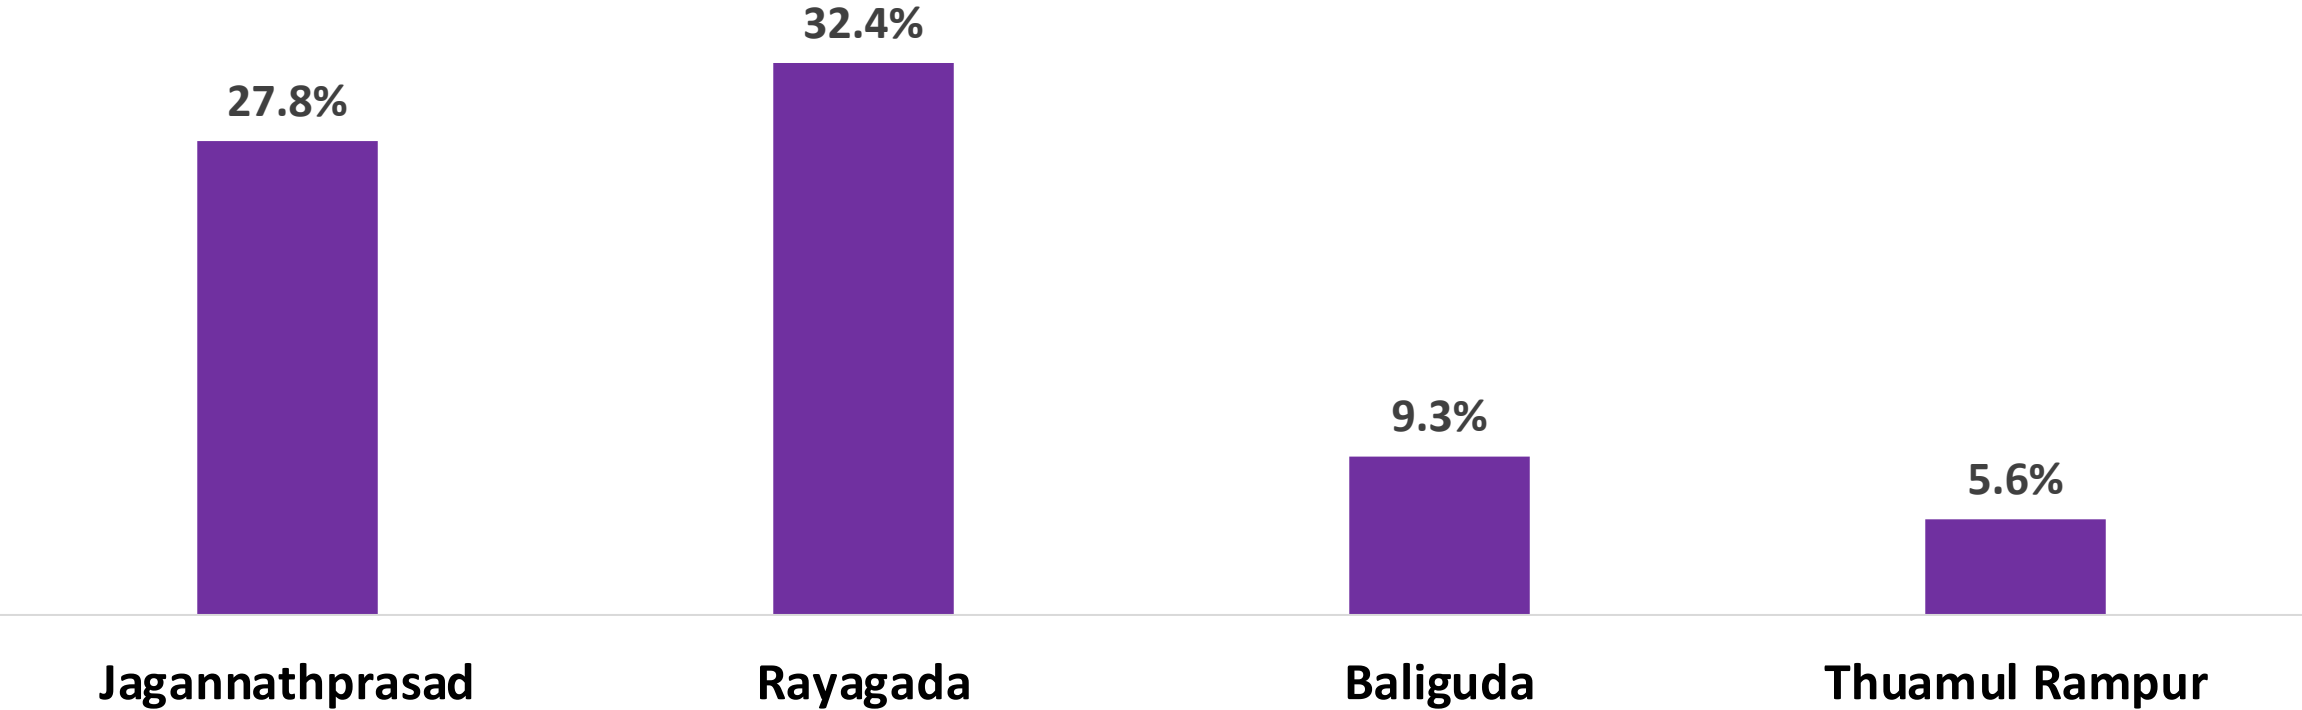

Impact of migration on the household – stopped agriculture

Proportion of households reporting that they had to completely stop farming activities due to migration

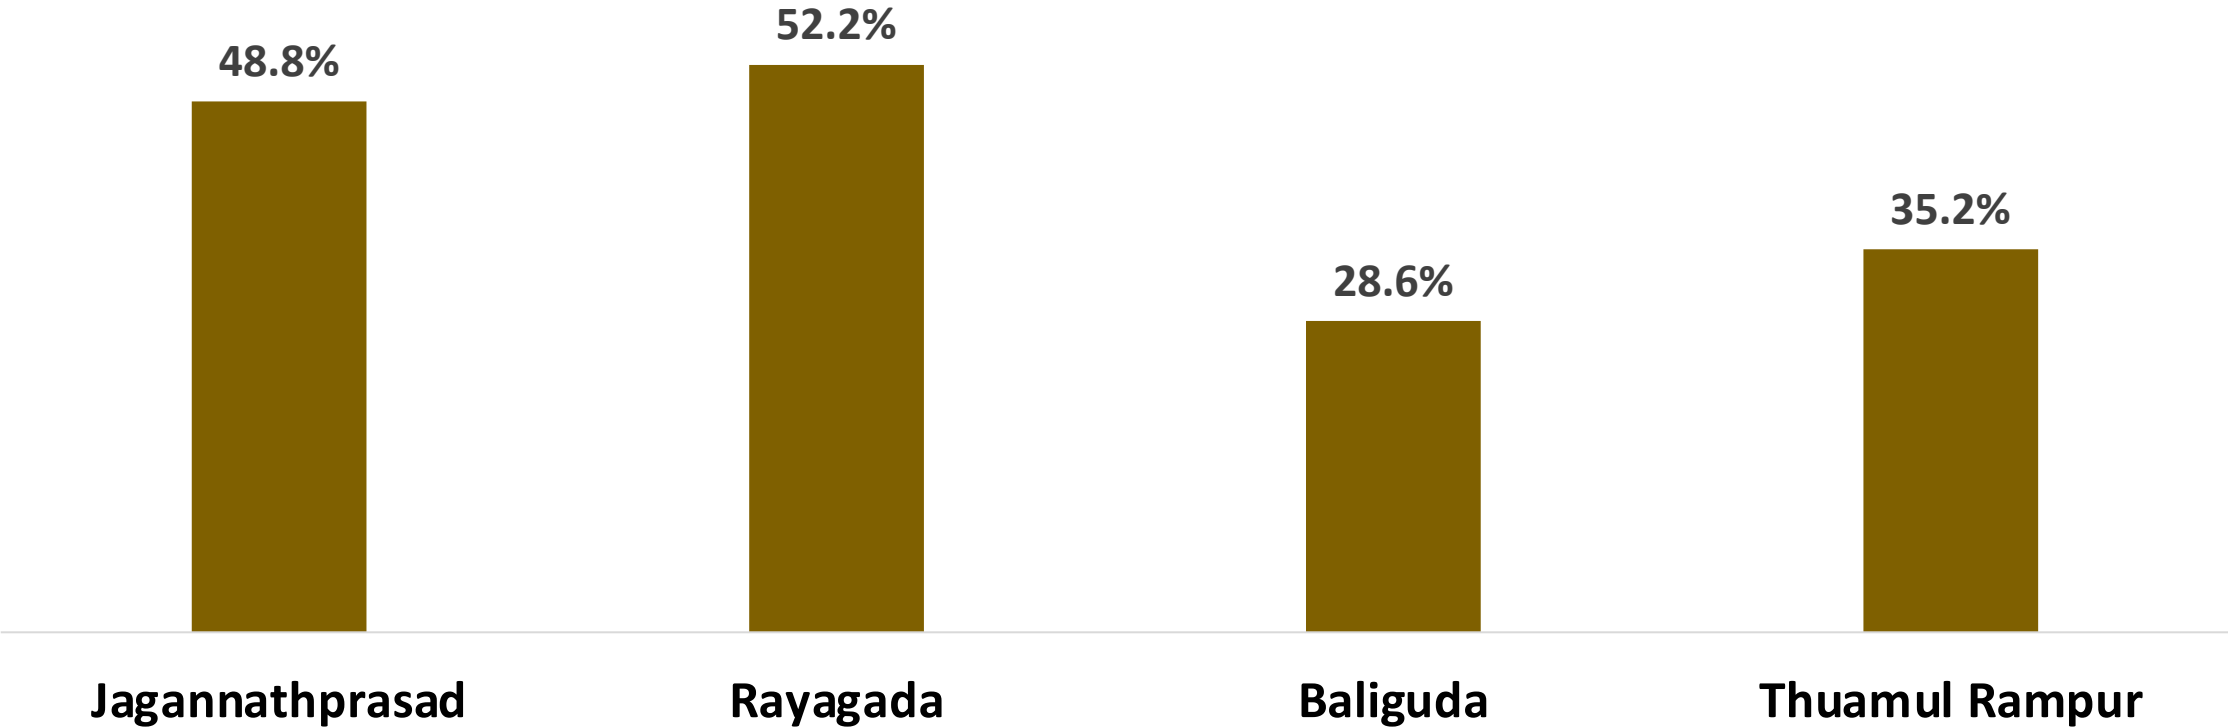

Impact of migration on the household – New house built

Proportion of households reporting that they built a new house from the income earned by migrant member/s

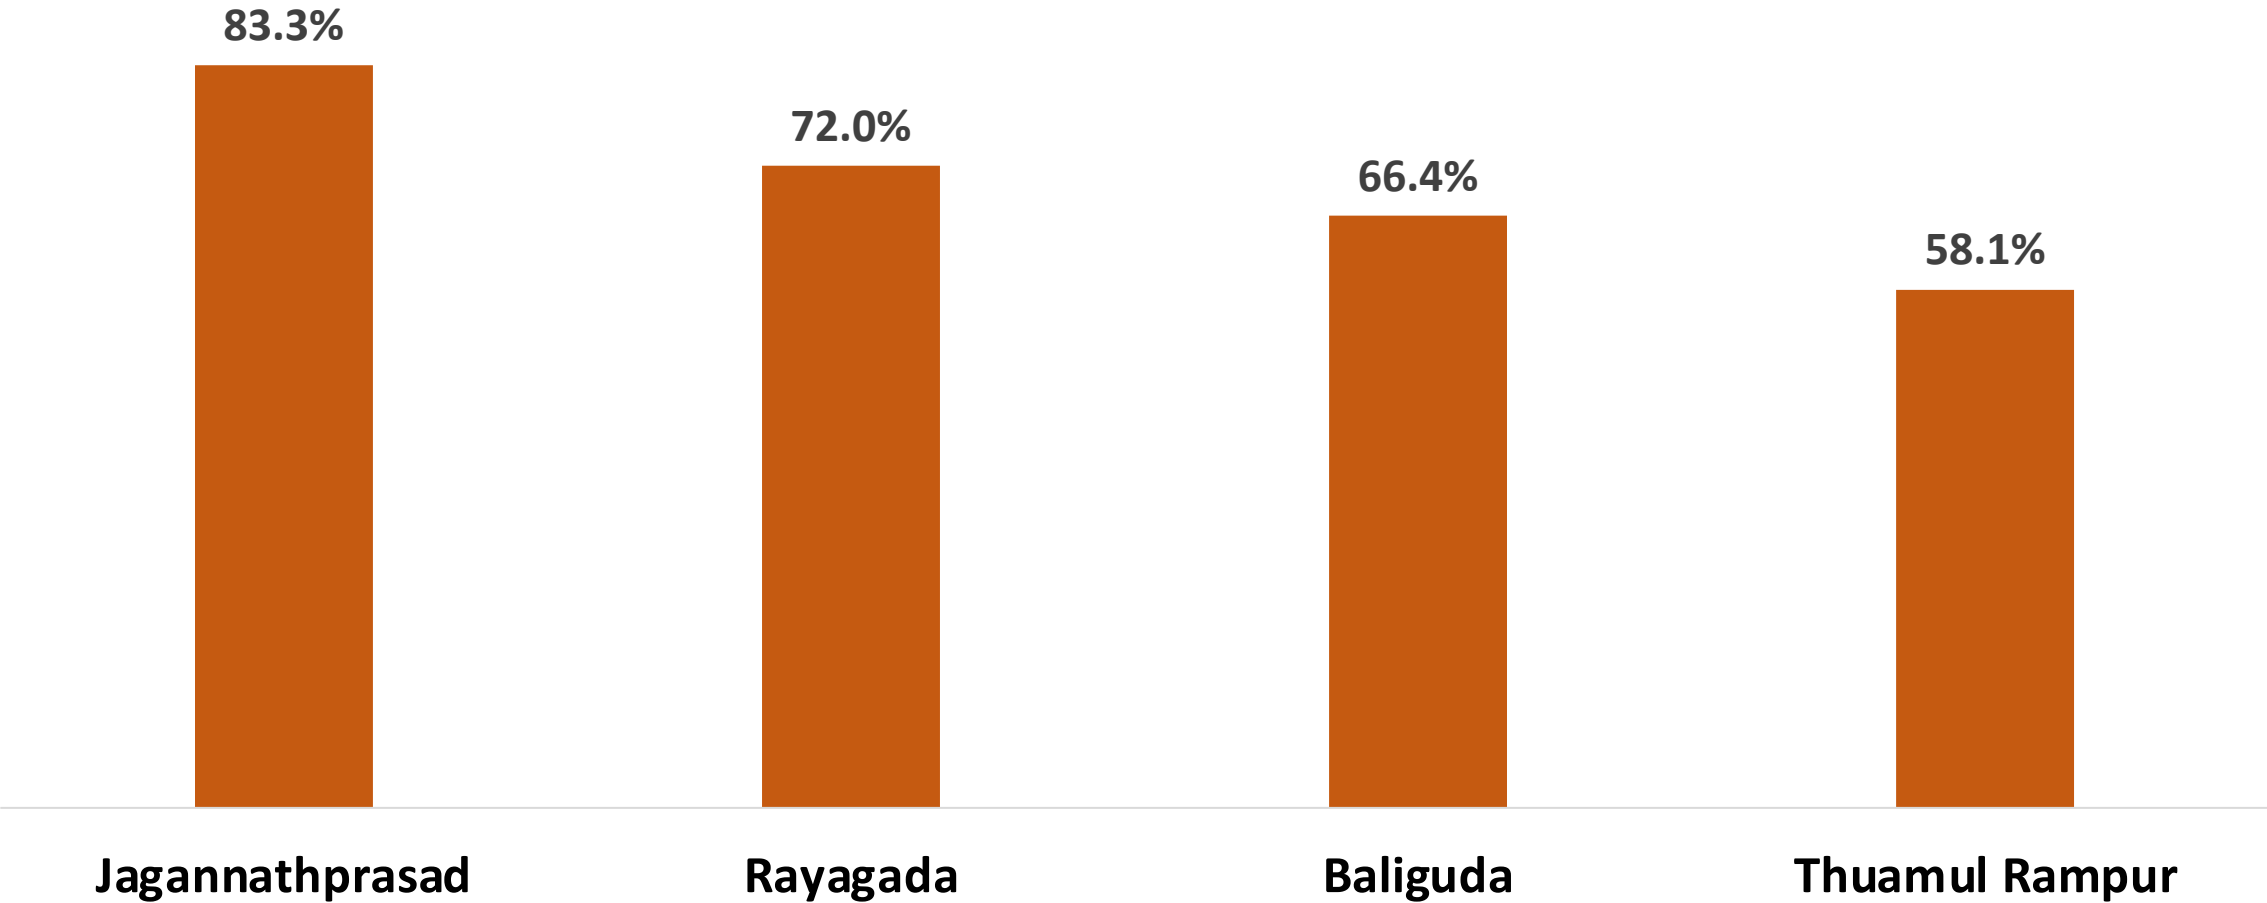

Impact of migration on the household - better education

Proportion of households reporting that they were able to provide better education for children from the income of the migrant member/s

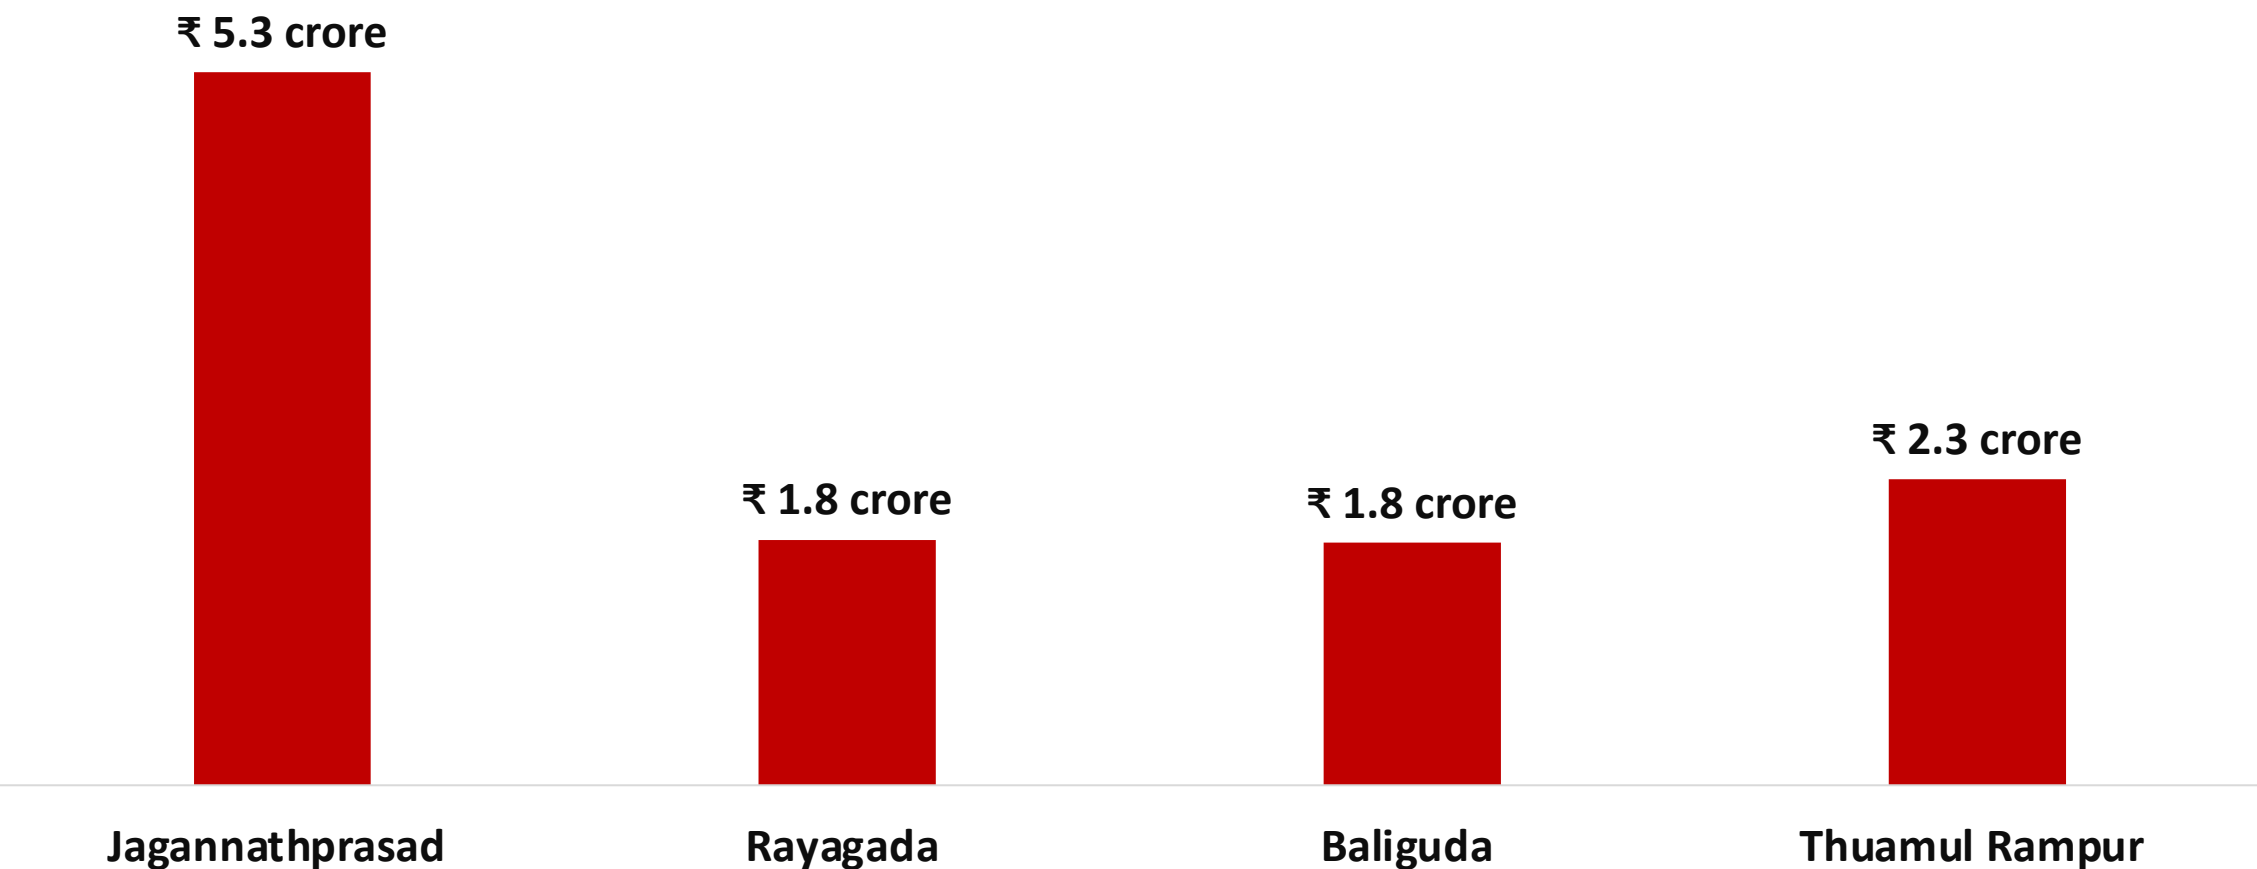

Impact of migration on the household – difficulty in obtaining healthcare

Proportion of households reporting difficulties in obtaining healthcare due to absence of adult members of the household

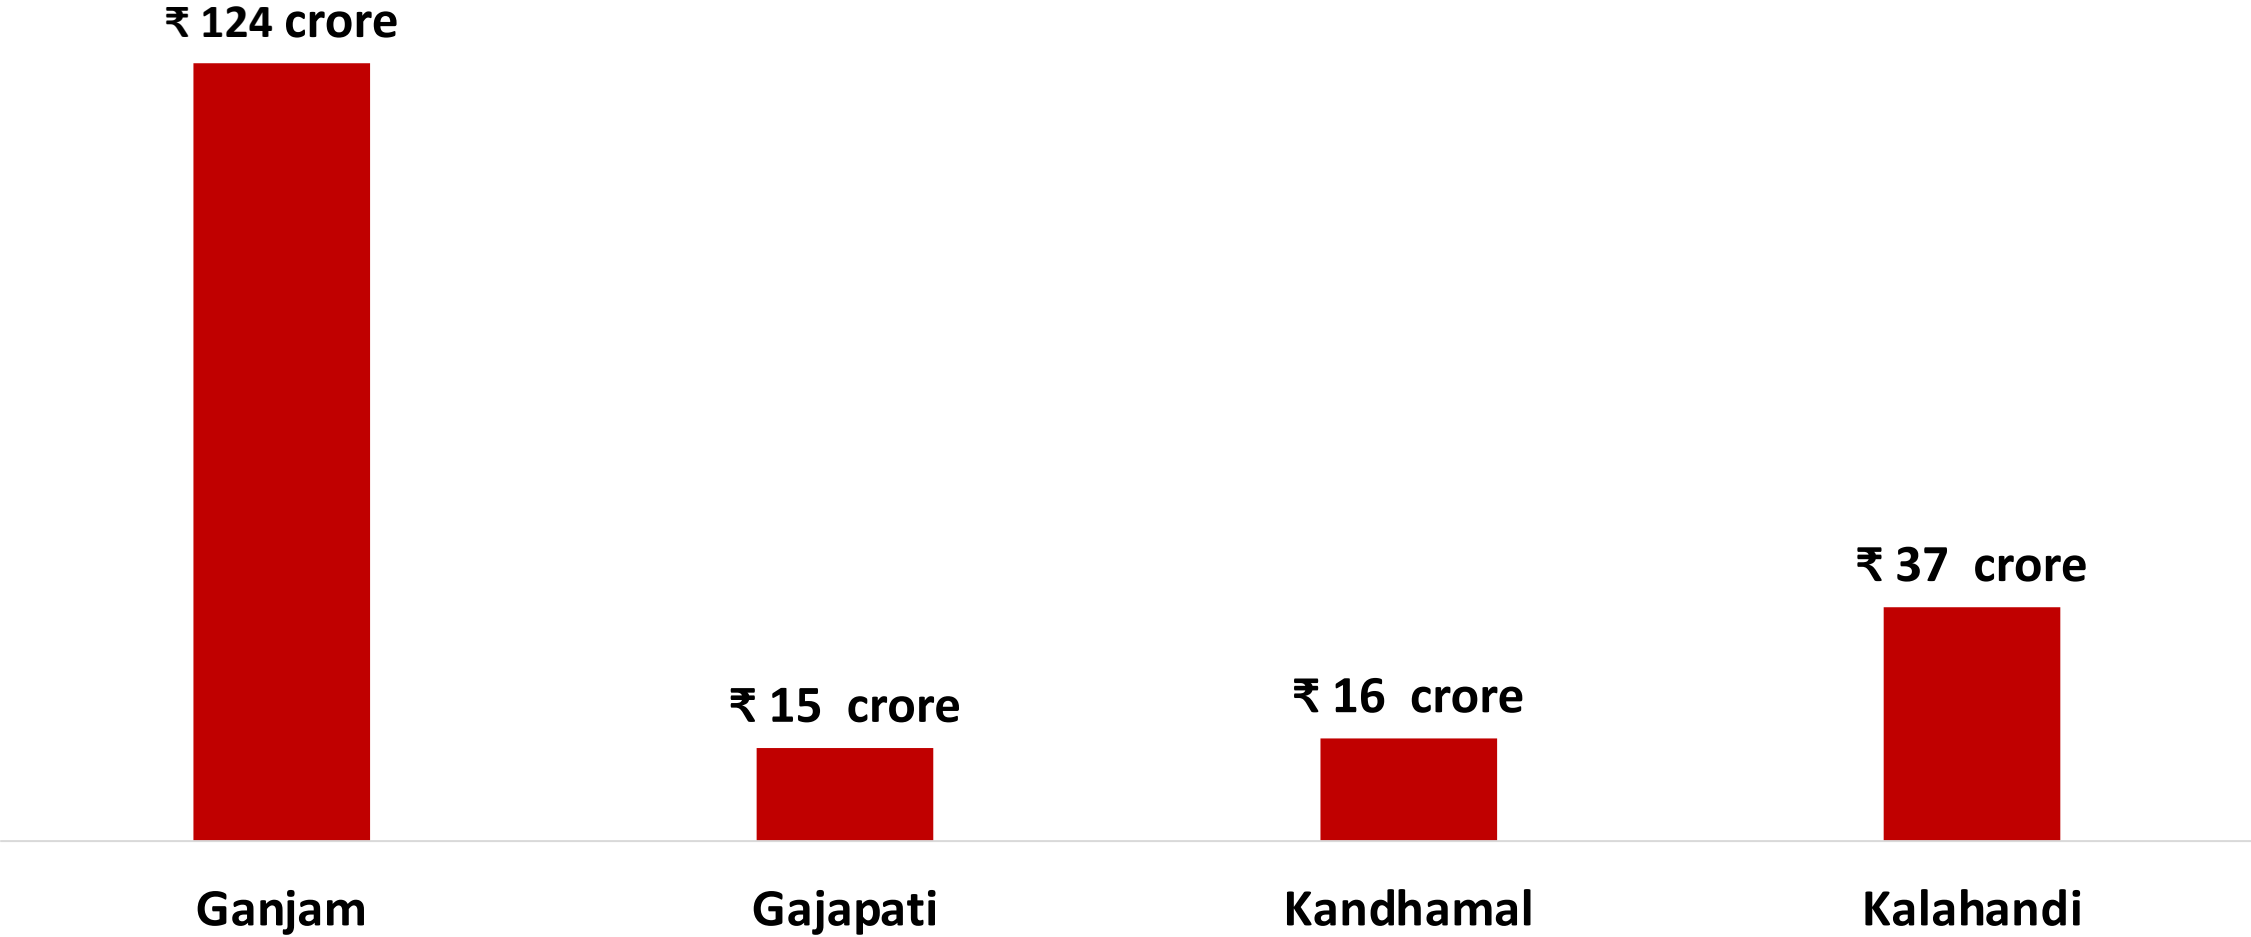

Estimated monthly remittances received by households in the Block

Amount in Rupees that migrant workers remit to their native villages every month, estimated for the Blocks based on incidence of migration and reported remittances by workers

Estimated monthly remittances received by households in the District

Amount in Rupees that migrant workers remit to their native villages every month, estimated for the Districts based on the sample data

Key takeaways

- Migration contributes substantially to promoting the resilience of Gram Vikas's partner communities
- Migration plays a pivotal role in the economy of rural Odisha
- It has substantially helped individuals, households and communities in Odisha to become more resilient to the adversities they confront
- If made safe, migration for work has the potential to significantly accelerate human development in rural Odisha
- Safe and dignified migration can substantially contribute to empowerment of individuals, households and communities in rural Odisha
- Most migrants prefer to stay back and work at their native place if they have a regular monthly income of ₹10,000- ₹12,000

Labour Migration from Rural Odisha

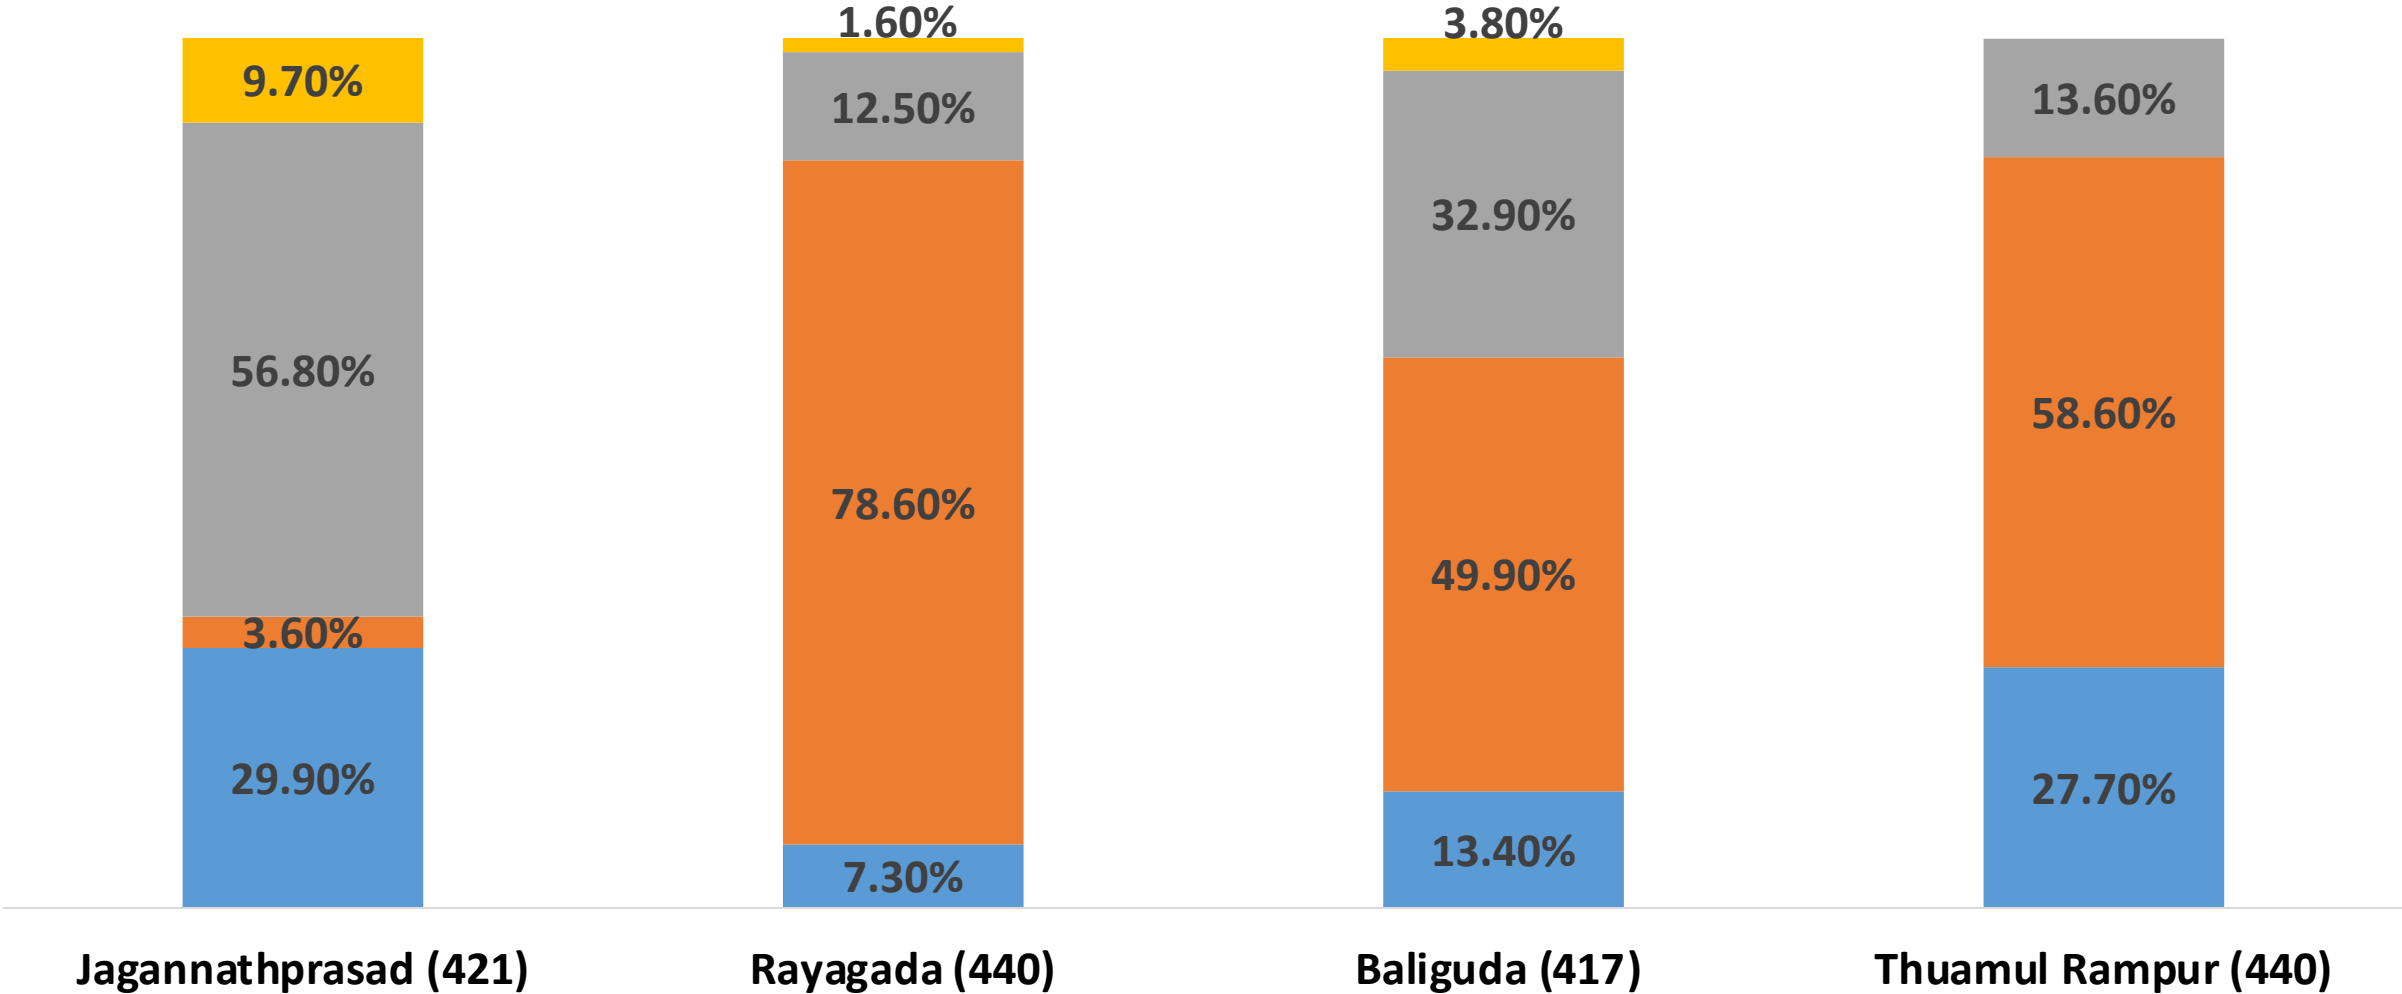

Profiles of Four Blocks

Profile of Households

Distribution of households by social groups

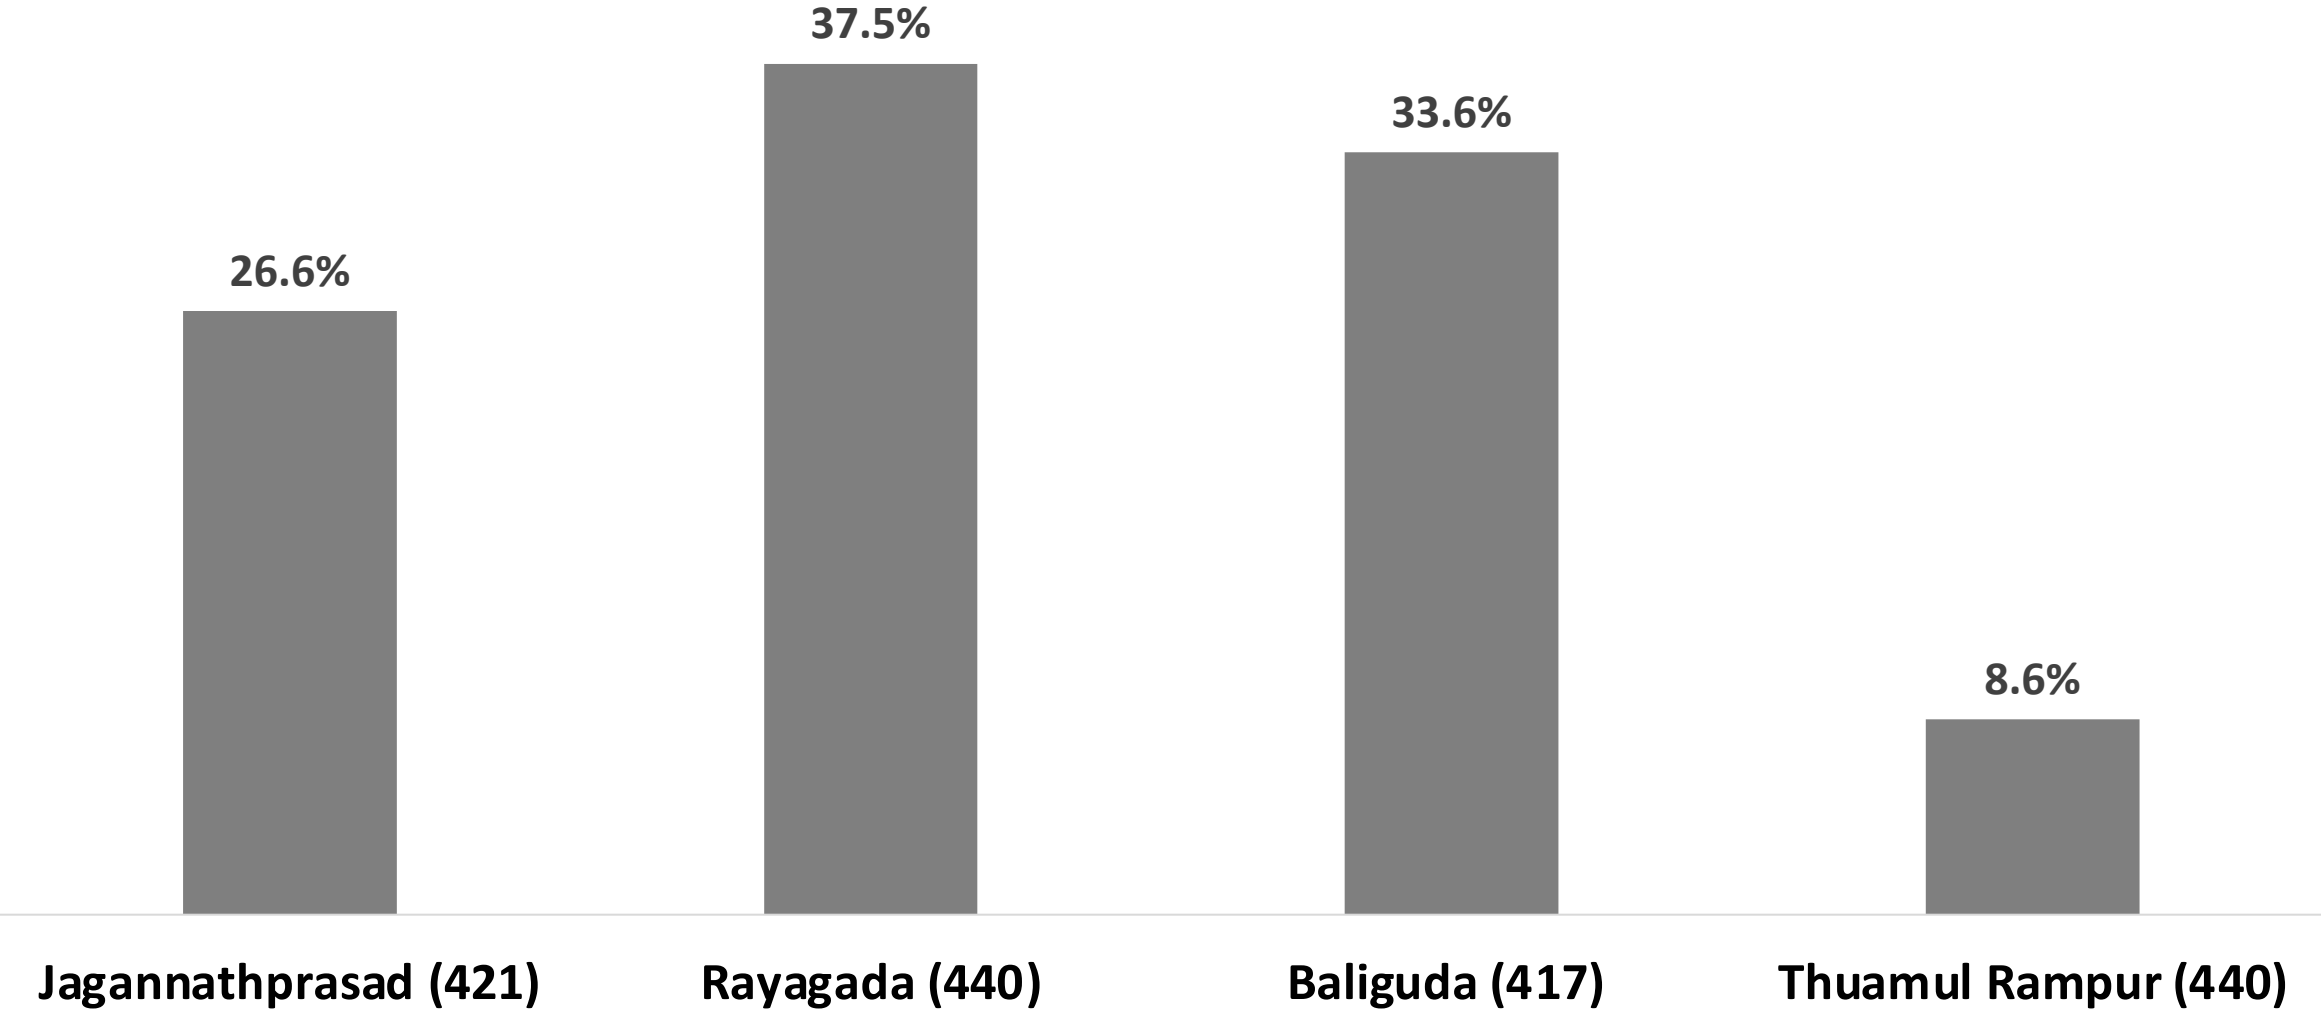

Proportion of sample households belonging to different social groups

Scheduled Caste **Scheduled Tribe** **Other Backward Communities** **Other Communities**

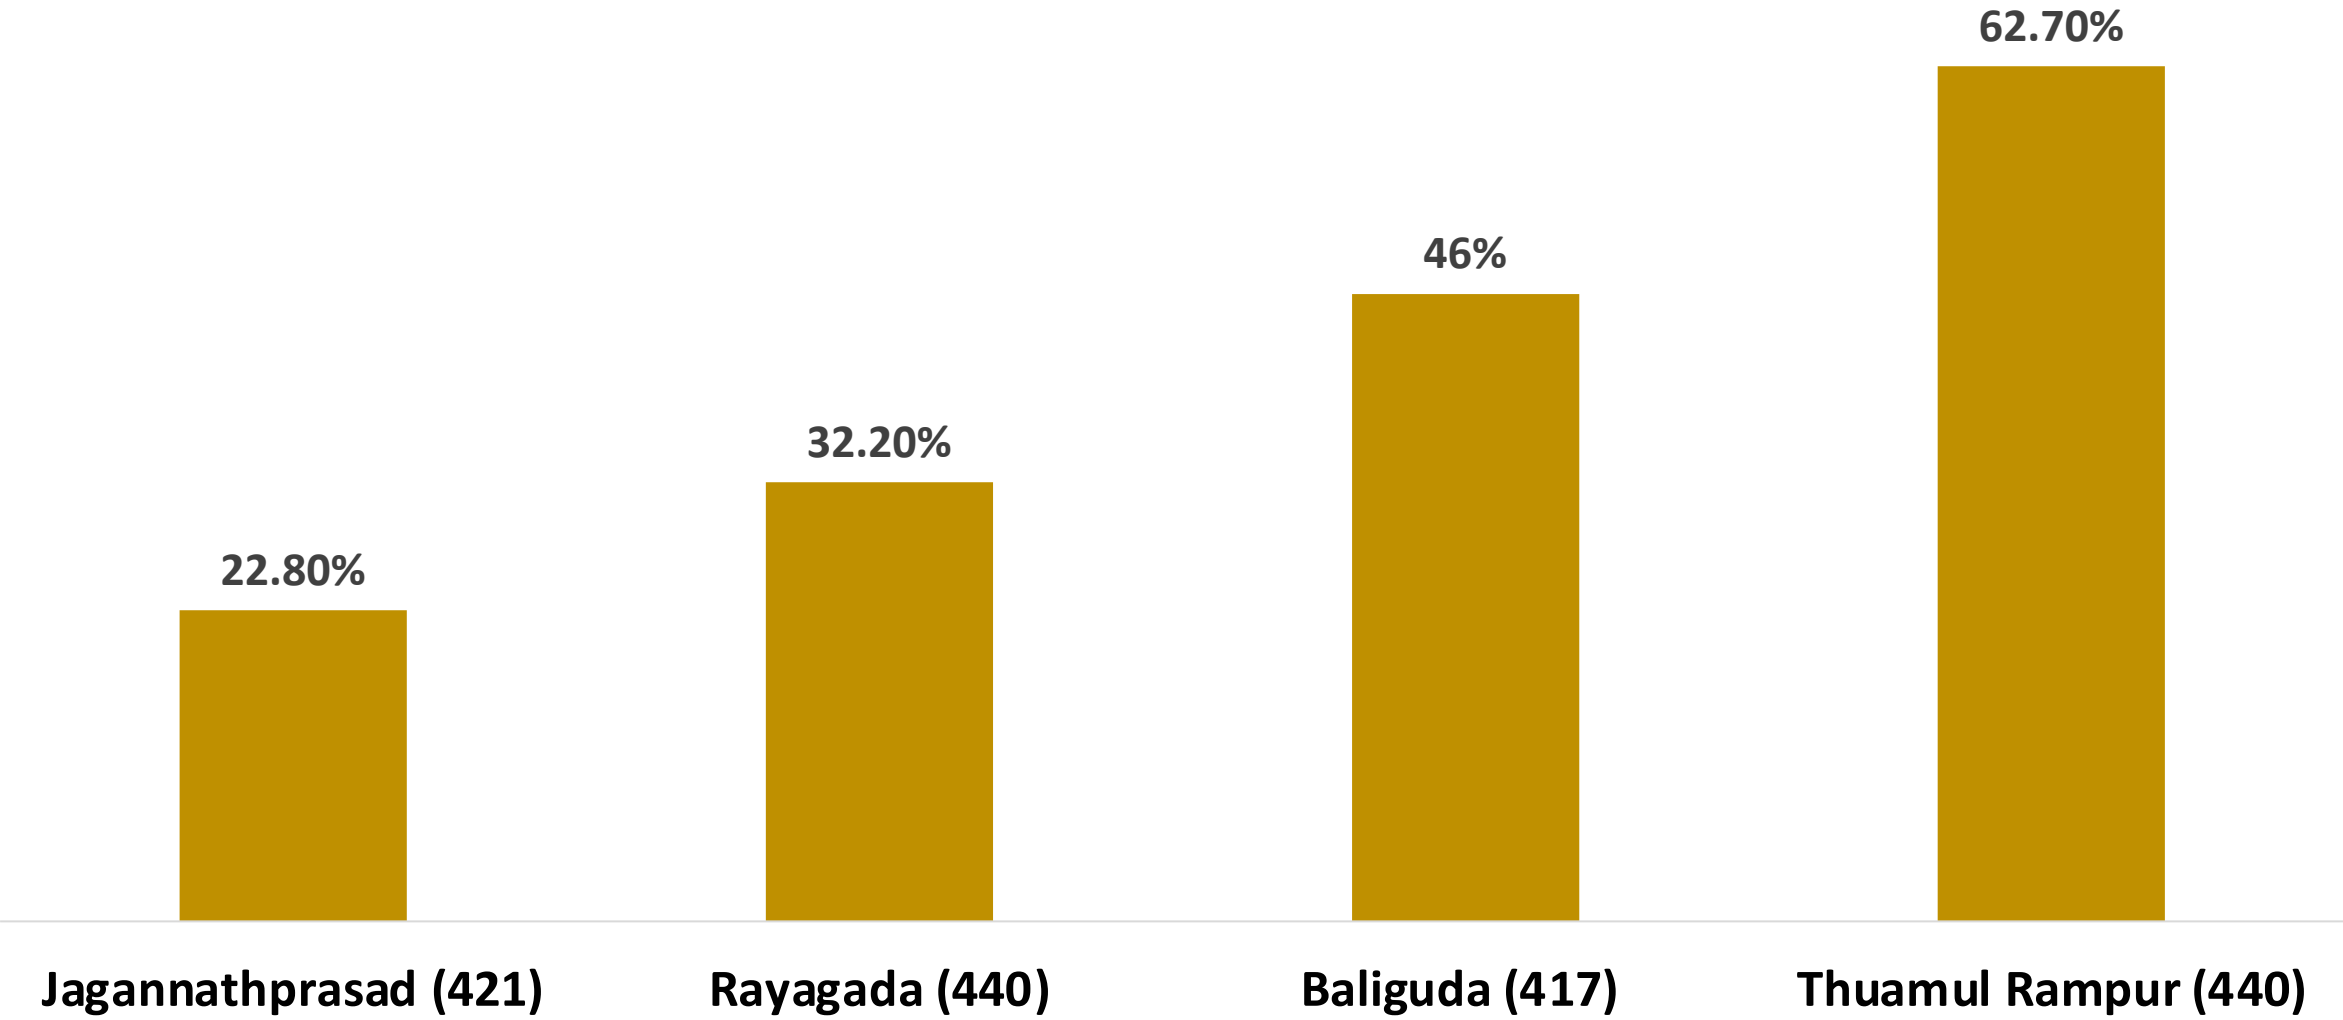

Educational status of households

Proportion of sample households having at least one person with education of Higher Secondary or above

Status of housing

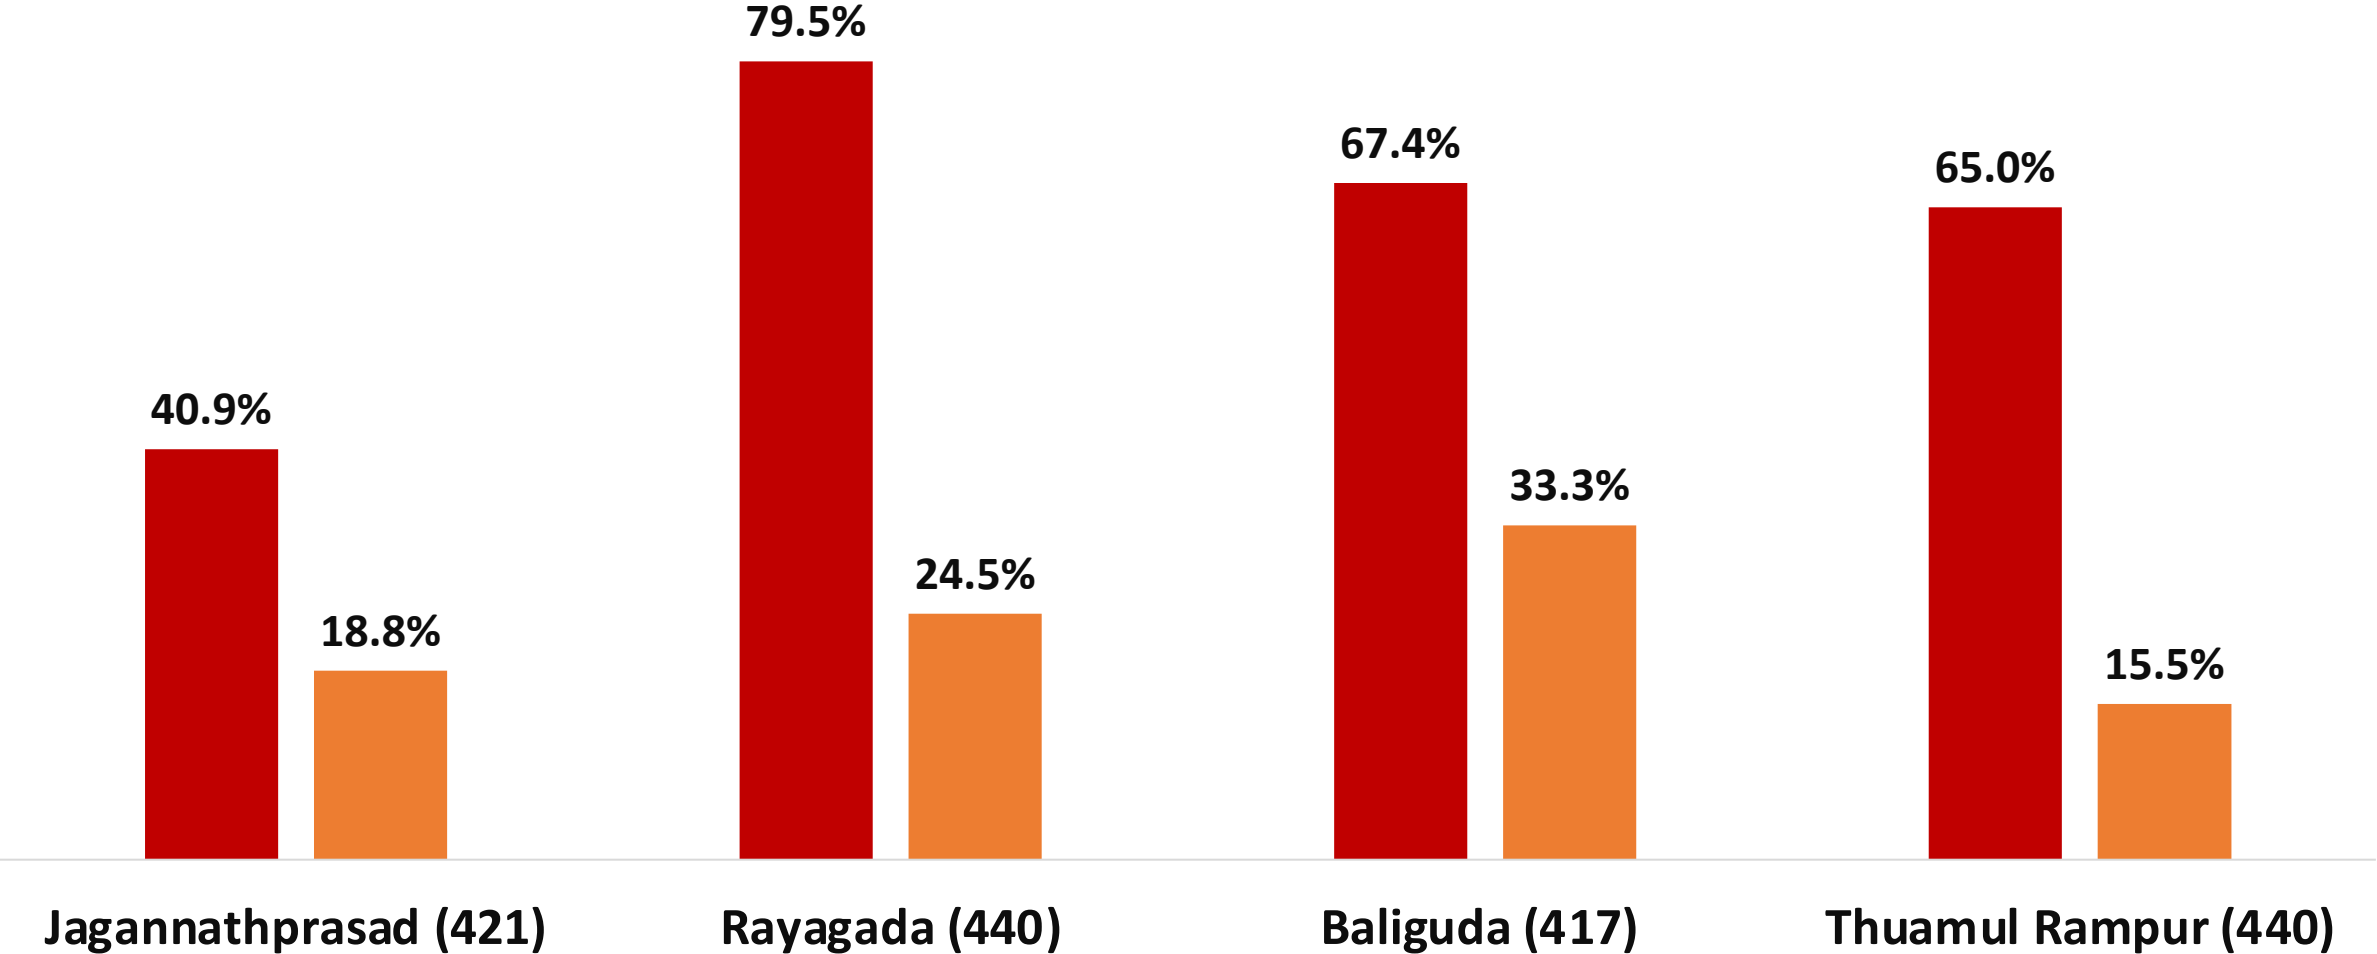

Proportion of sample households living in *kaccha* (non-permanent) houses

Access to MGNREGS

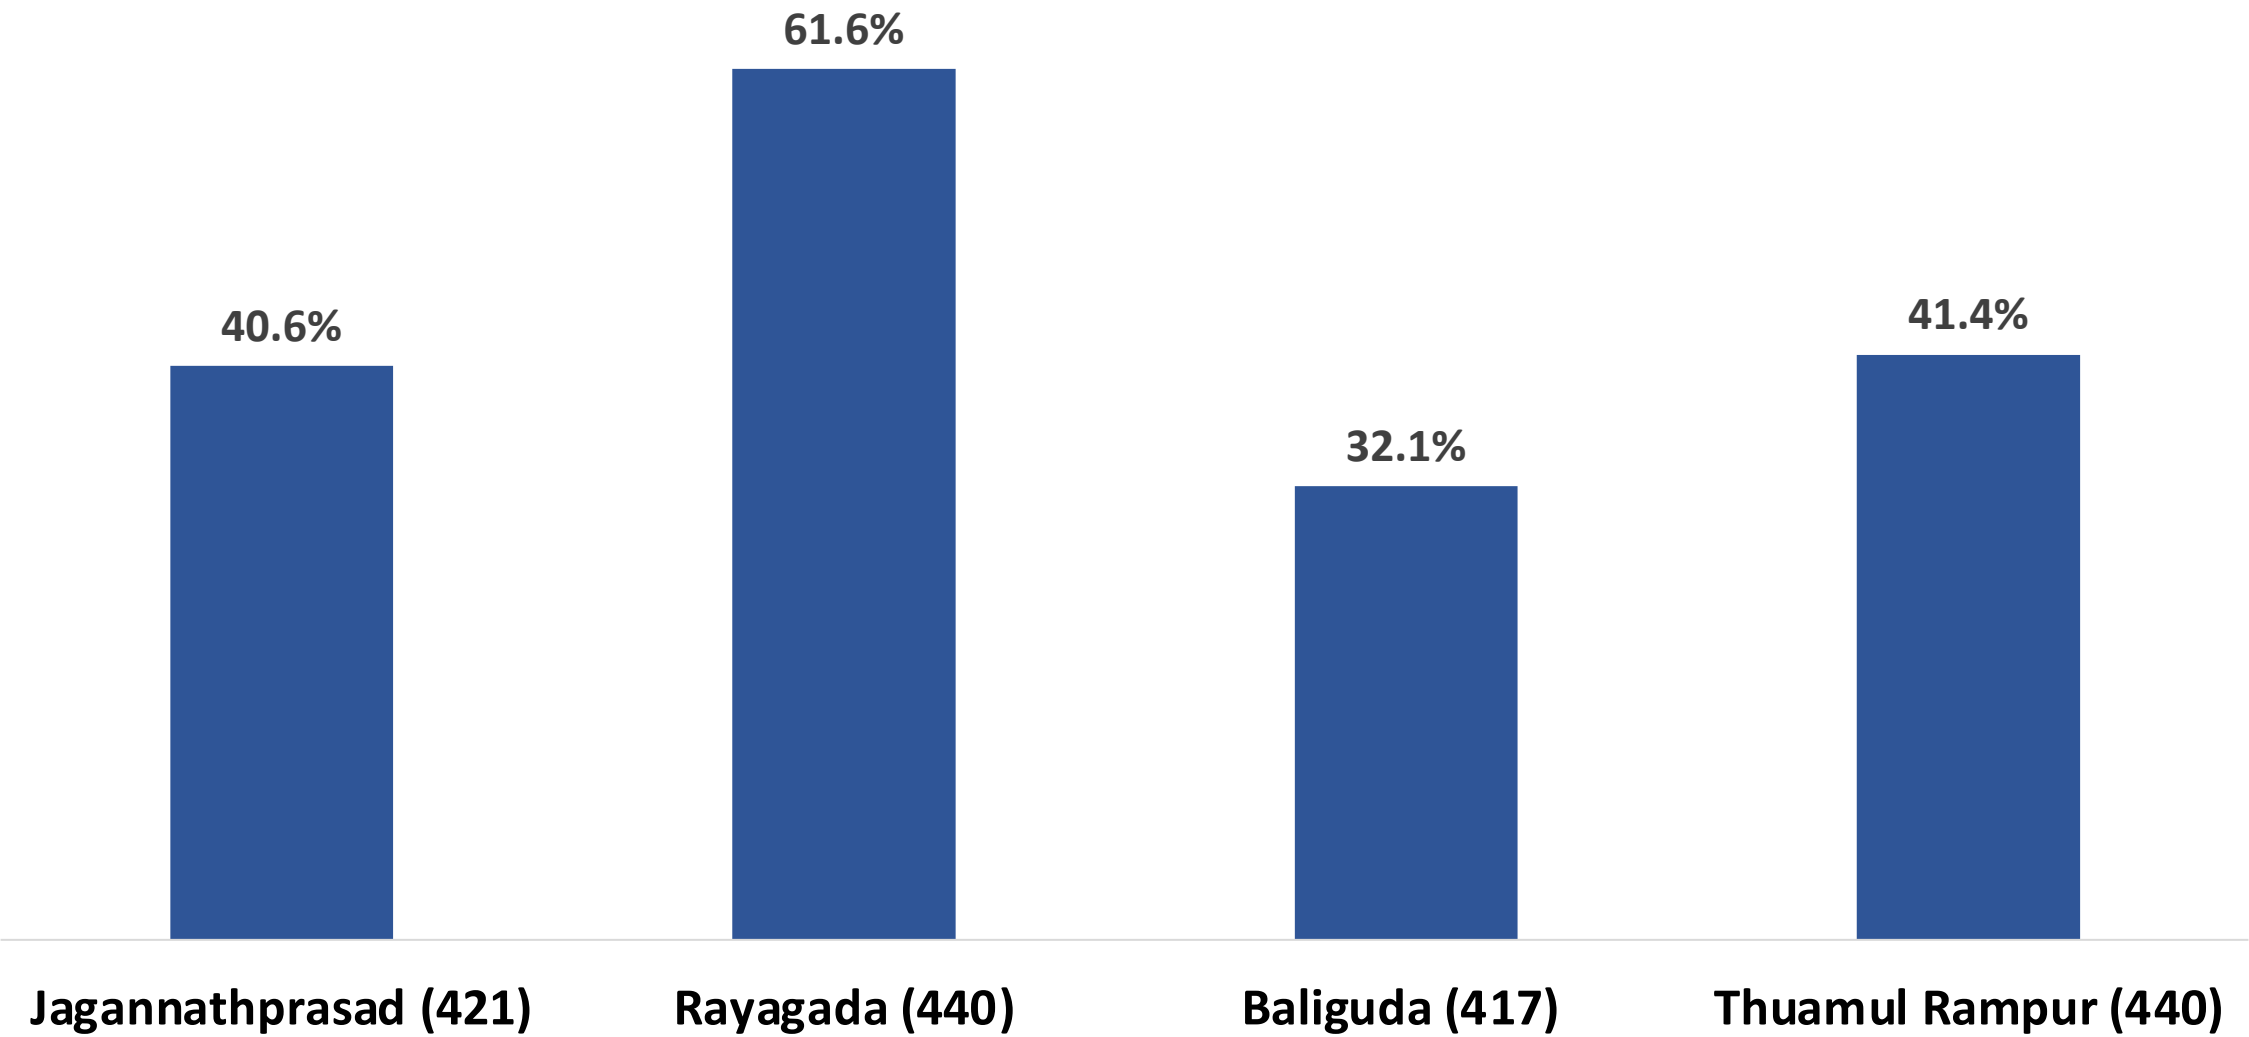

Proportion of sample households with MGNREGS job cards and obtaining work during 2019

■ Wth MGNREGS Job Card ■ Benefited in 2019

Proportion of sample households reporting outstanding, unpaid borrowings

Impact of COVID-19 on household incomes

Average household income reported by sample households before and after the COVID-19 lockdown (not done in Thuamul Rampur)

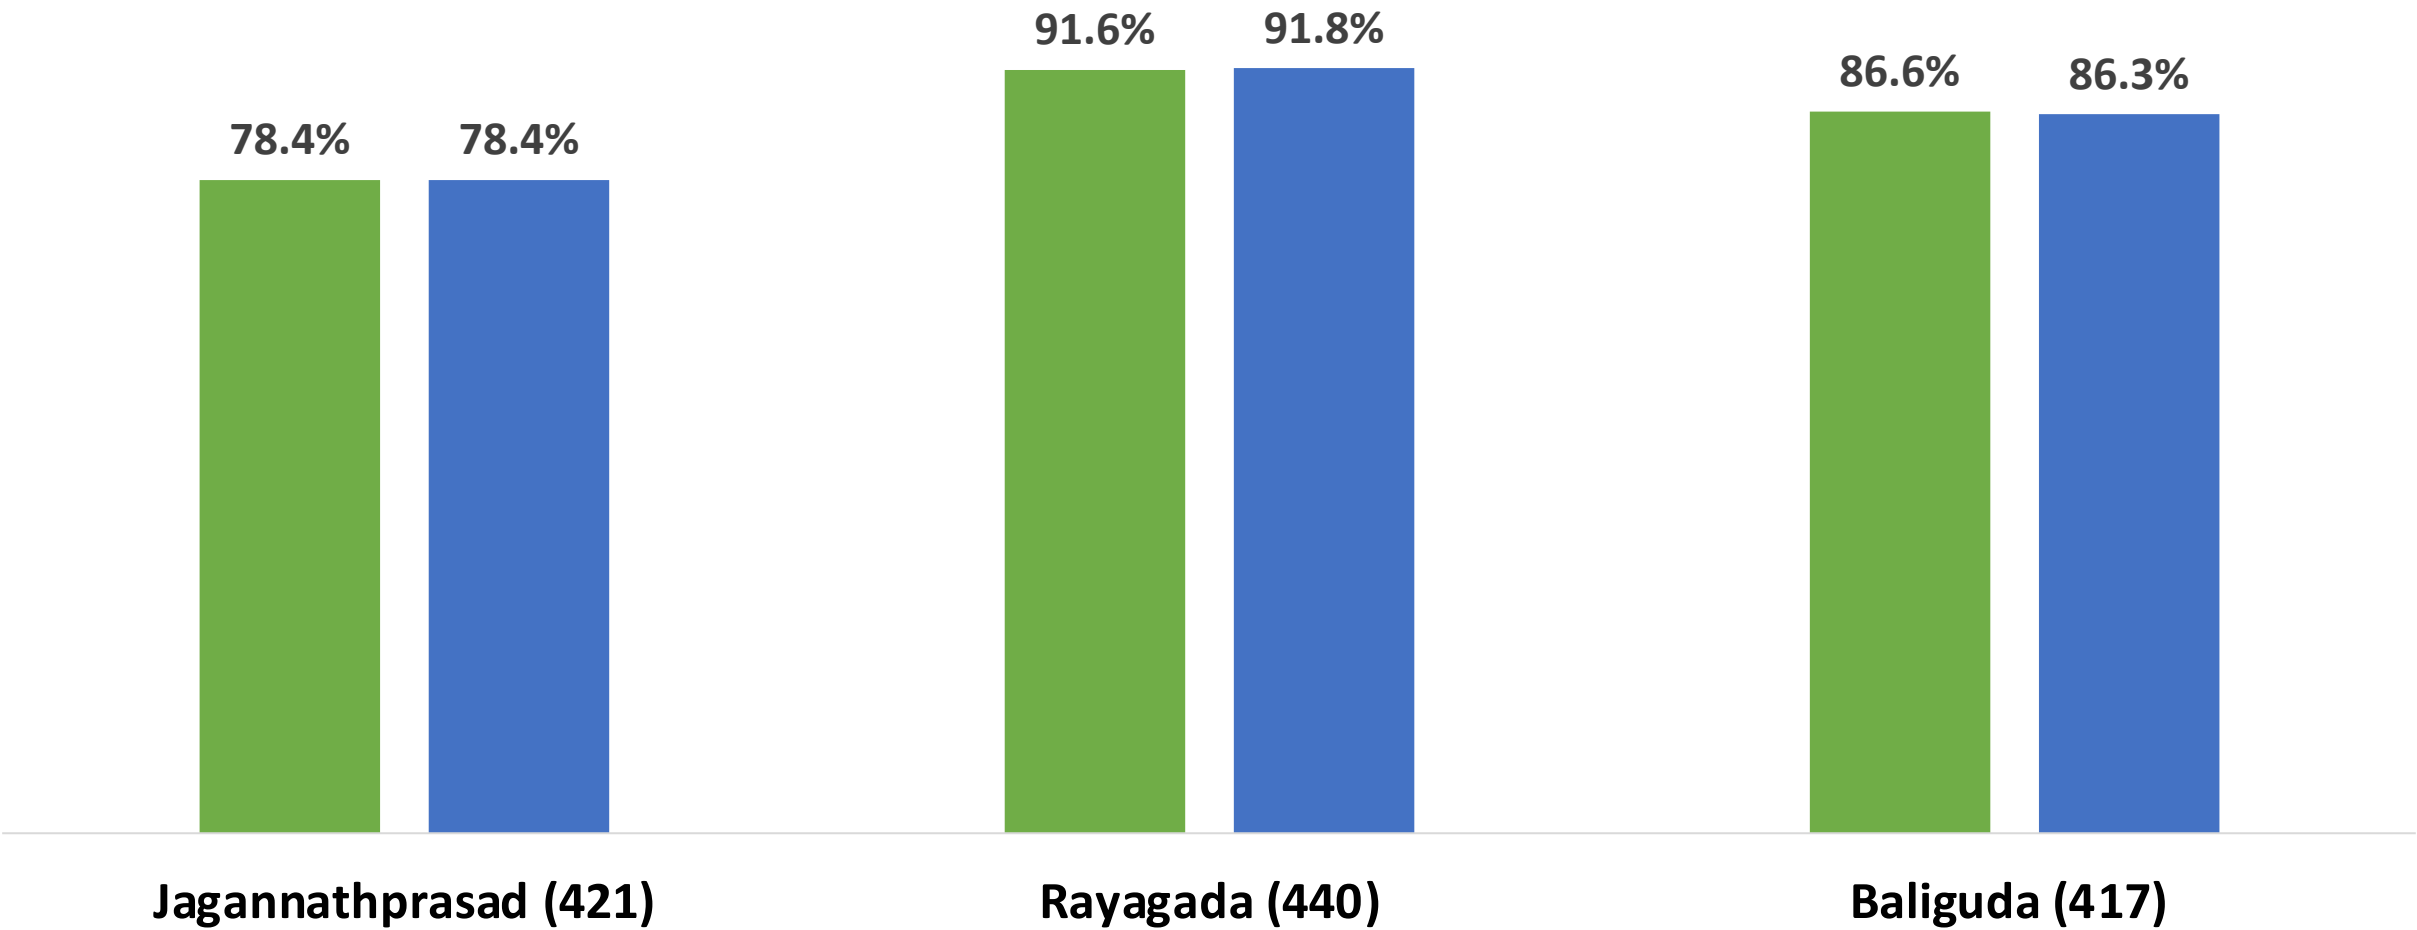

■ Before Lockdown ■ After Lockdown

Status of COVID-19 assistance from Government

Proportion of households reporting having received assistance from the Government during the COVID-19 pandemic (not done in Thuamul Rampur)

■ Financial Assistance ■ Additional Free Ration

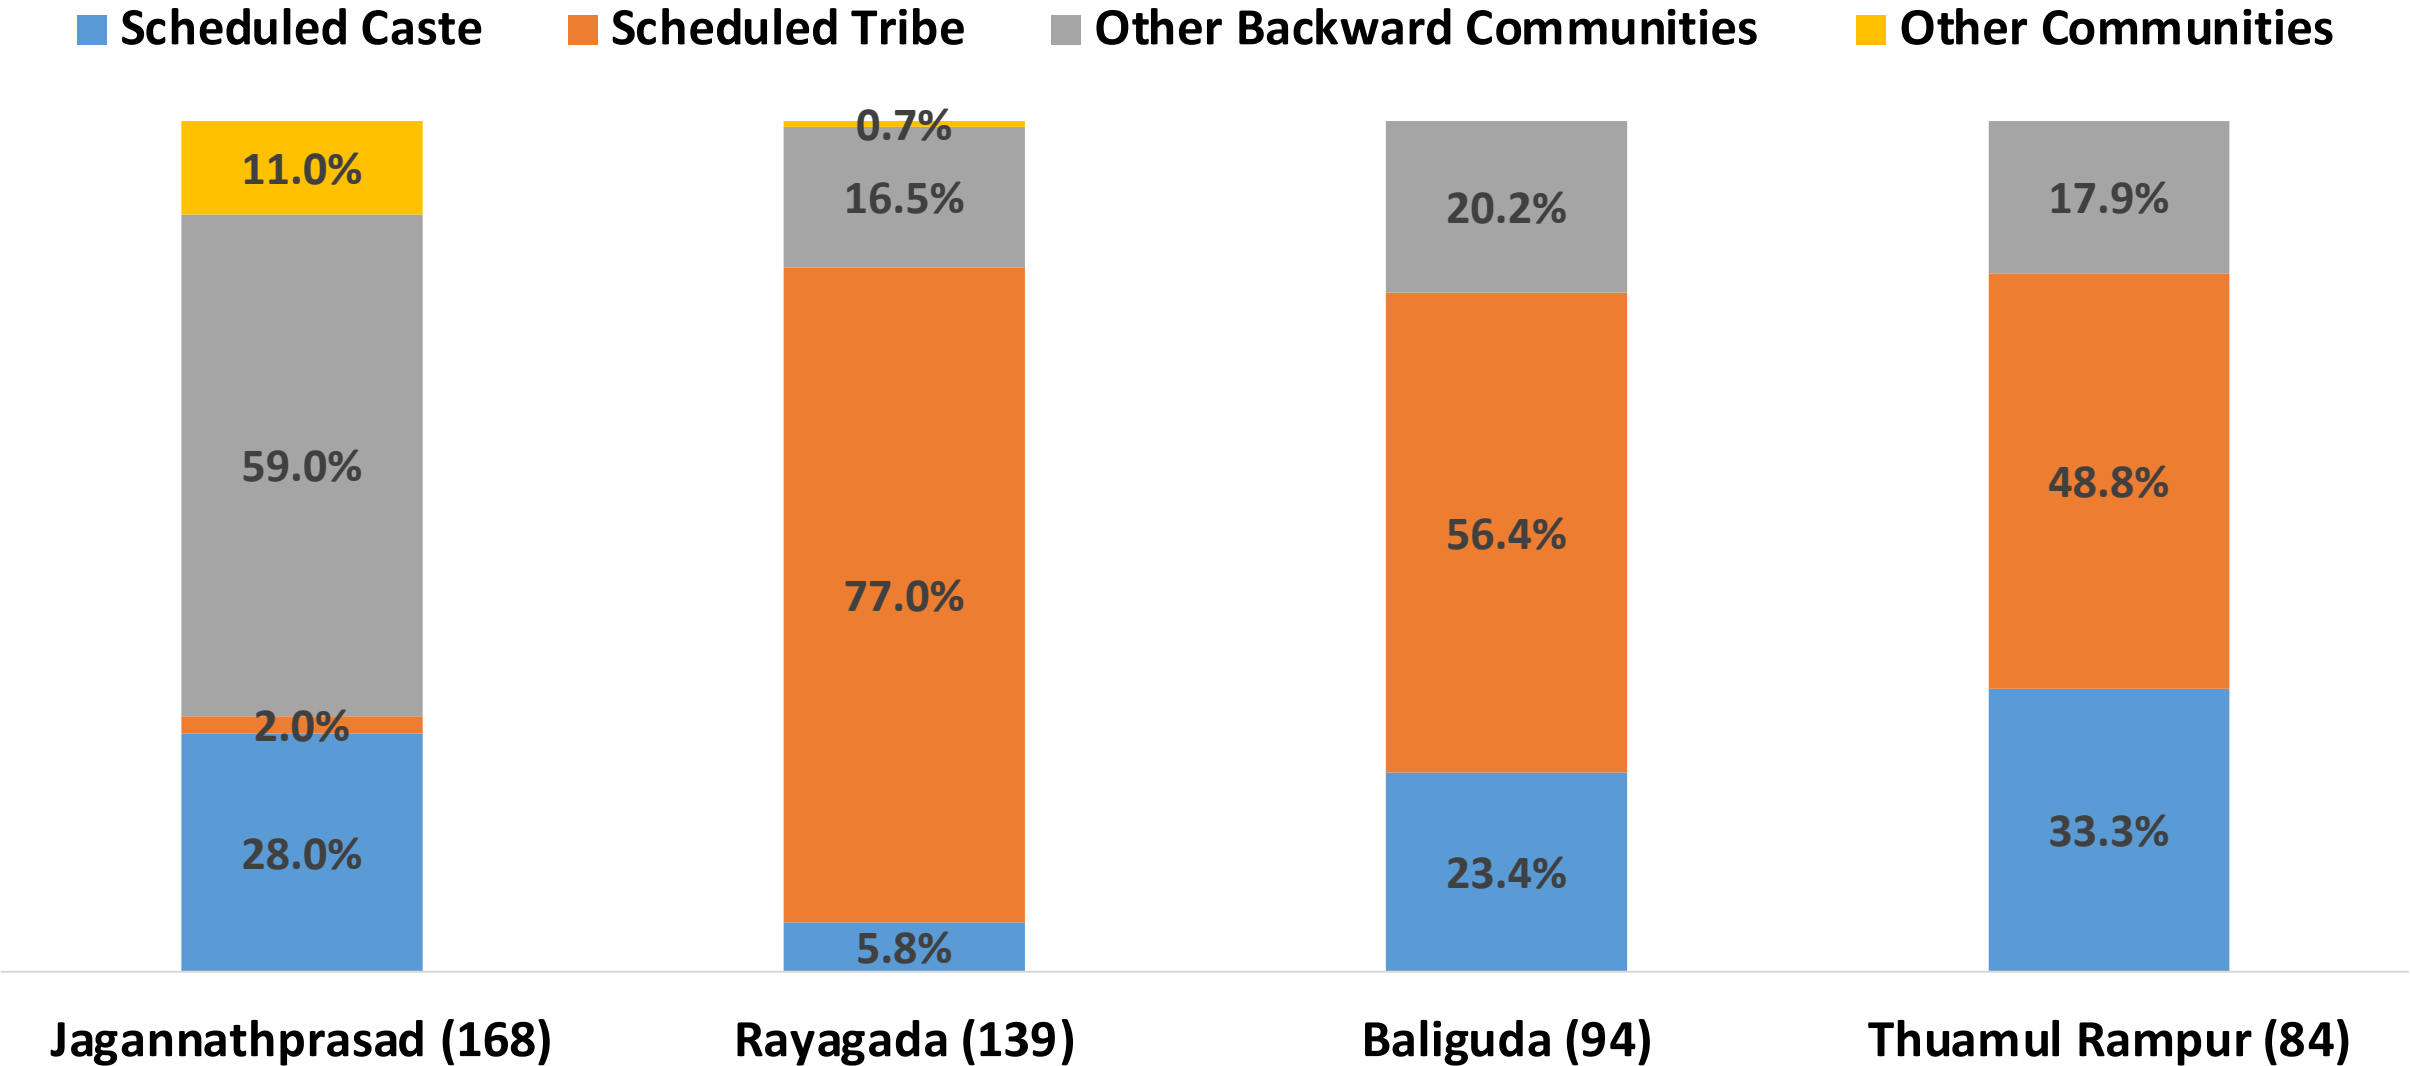

Labour Migration from Rural Odisha

Profiles of Four Blocks

Profile of Migrant Workers

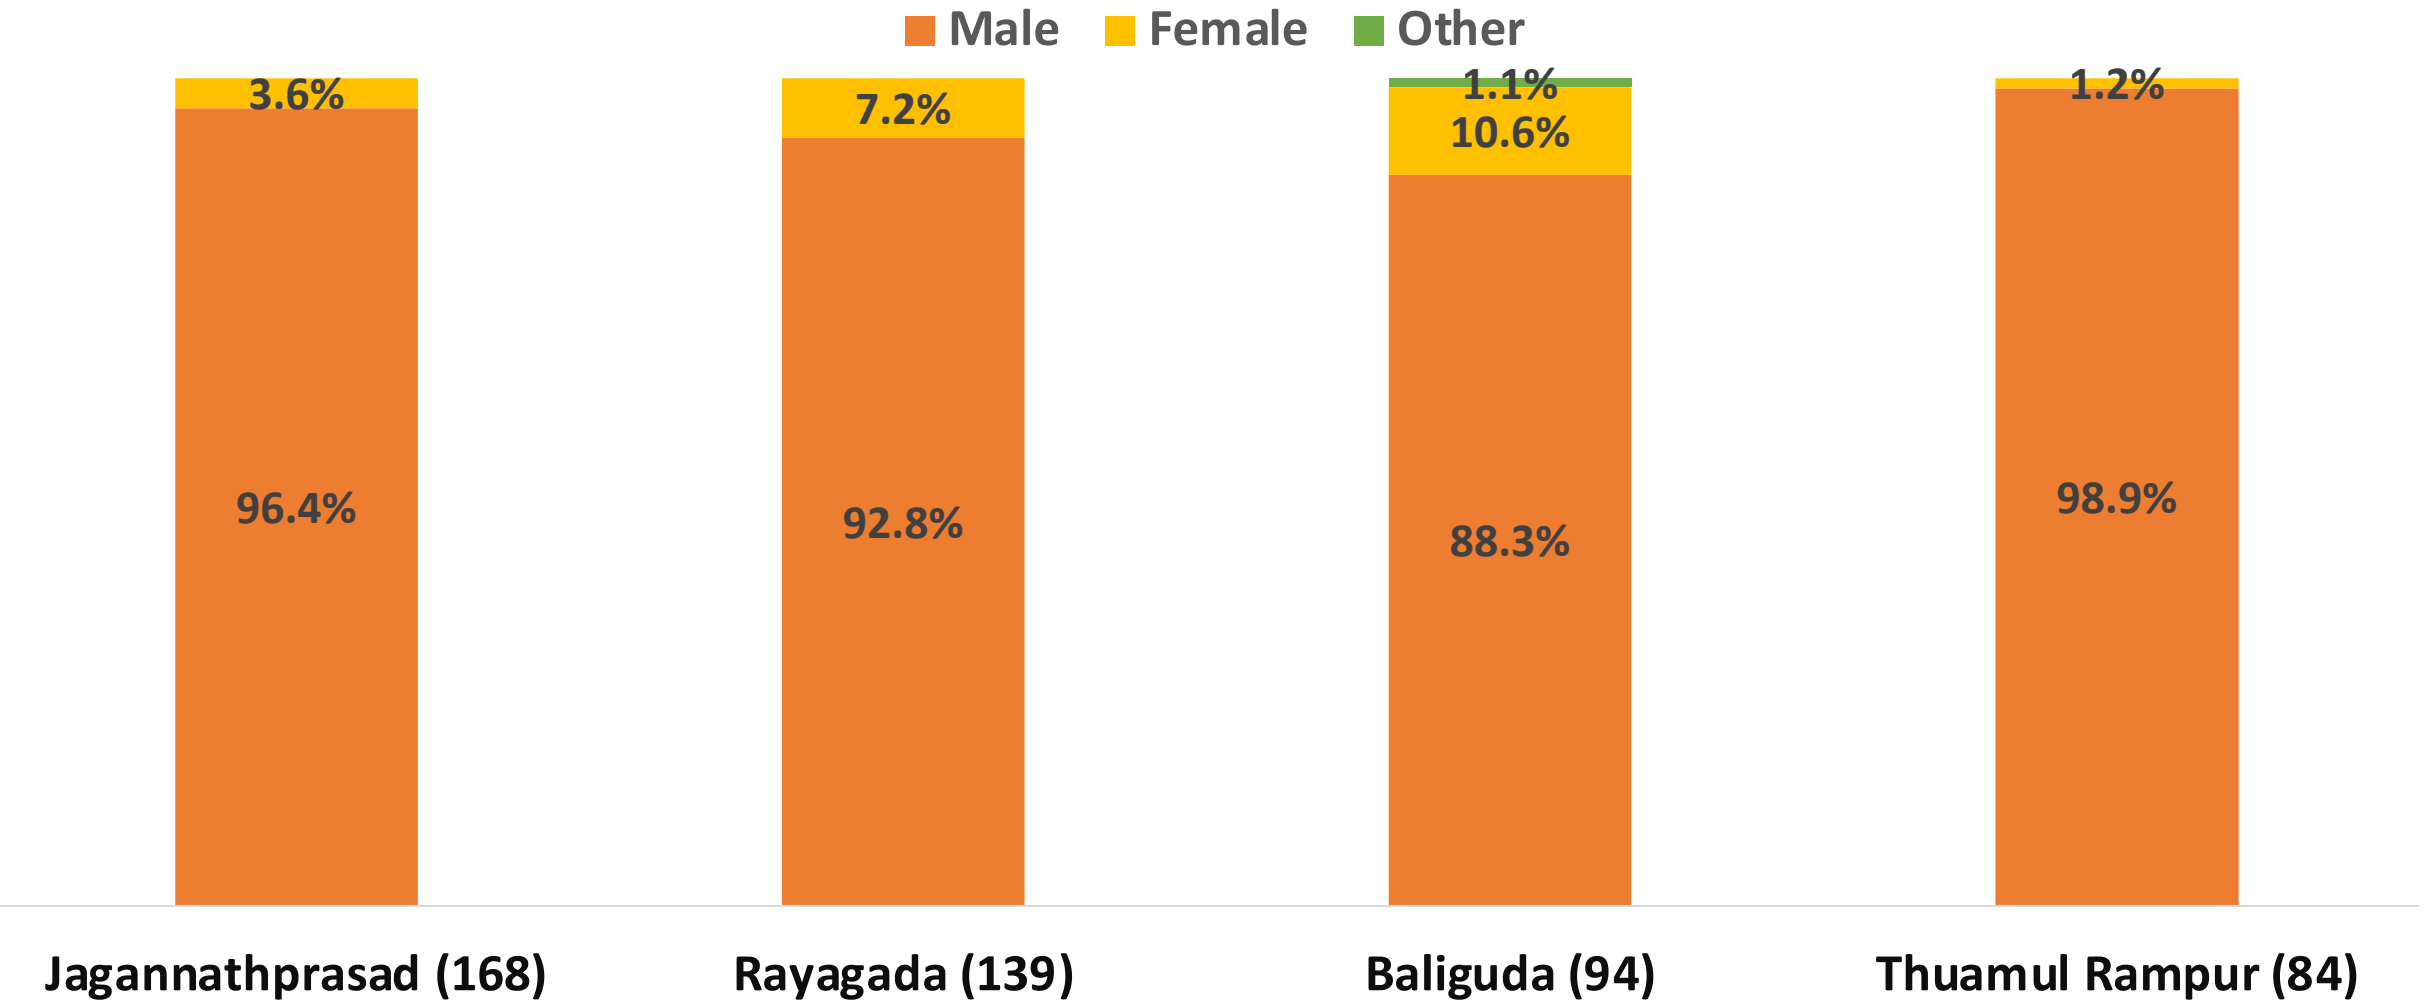

Distribution of migrant workers by social groups

Proportion of migrant workers covered in the survey, according to different social groups

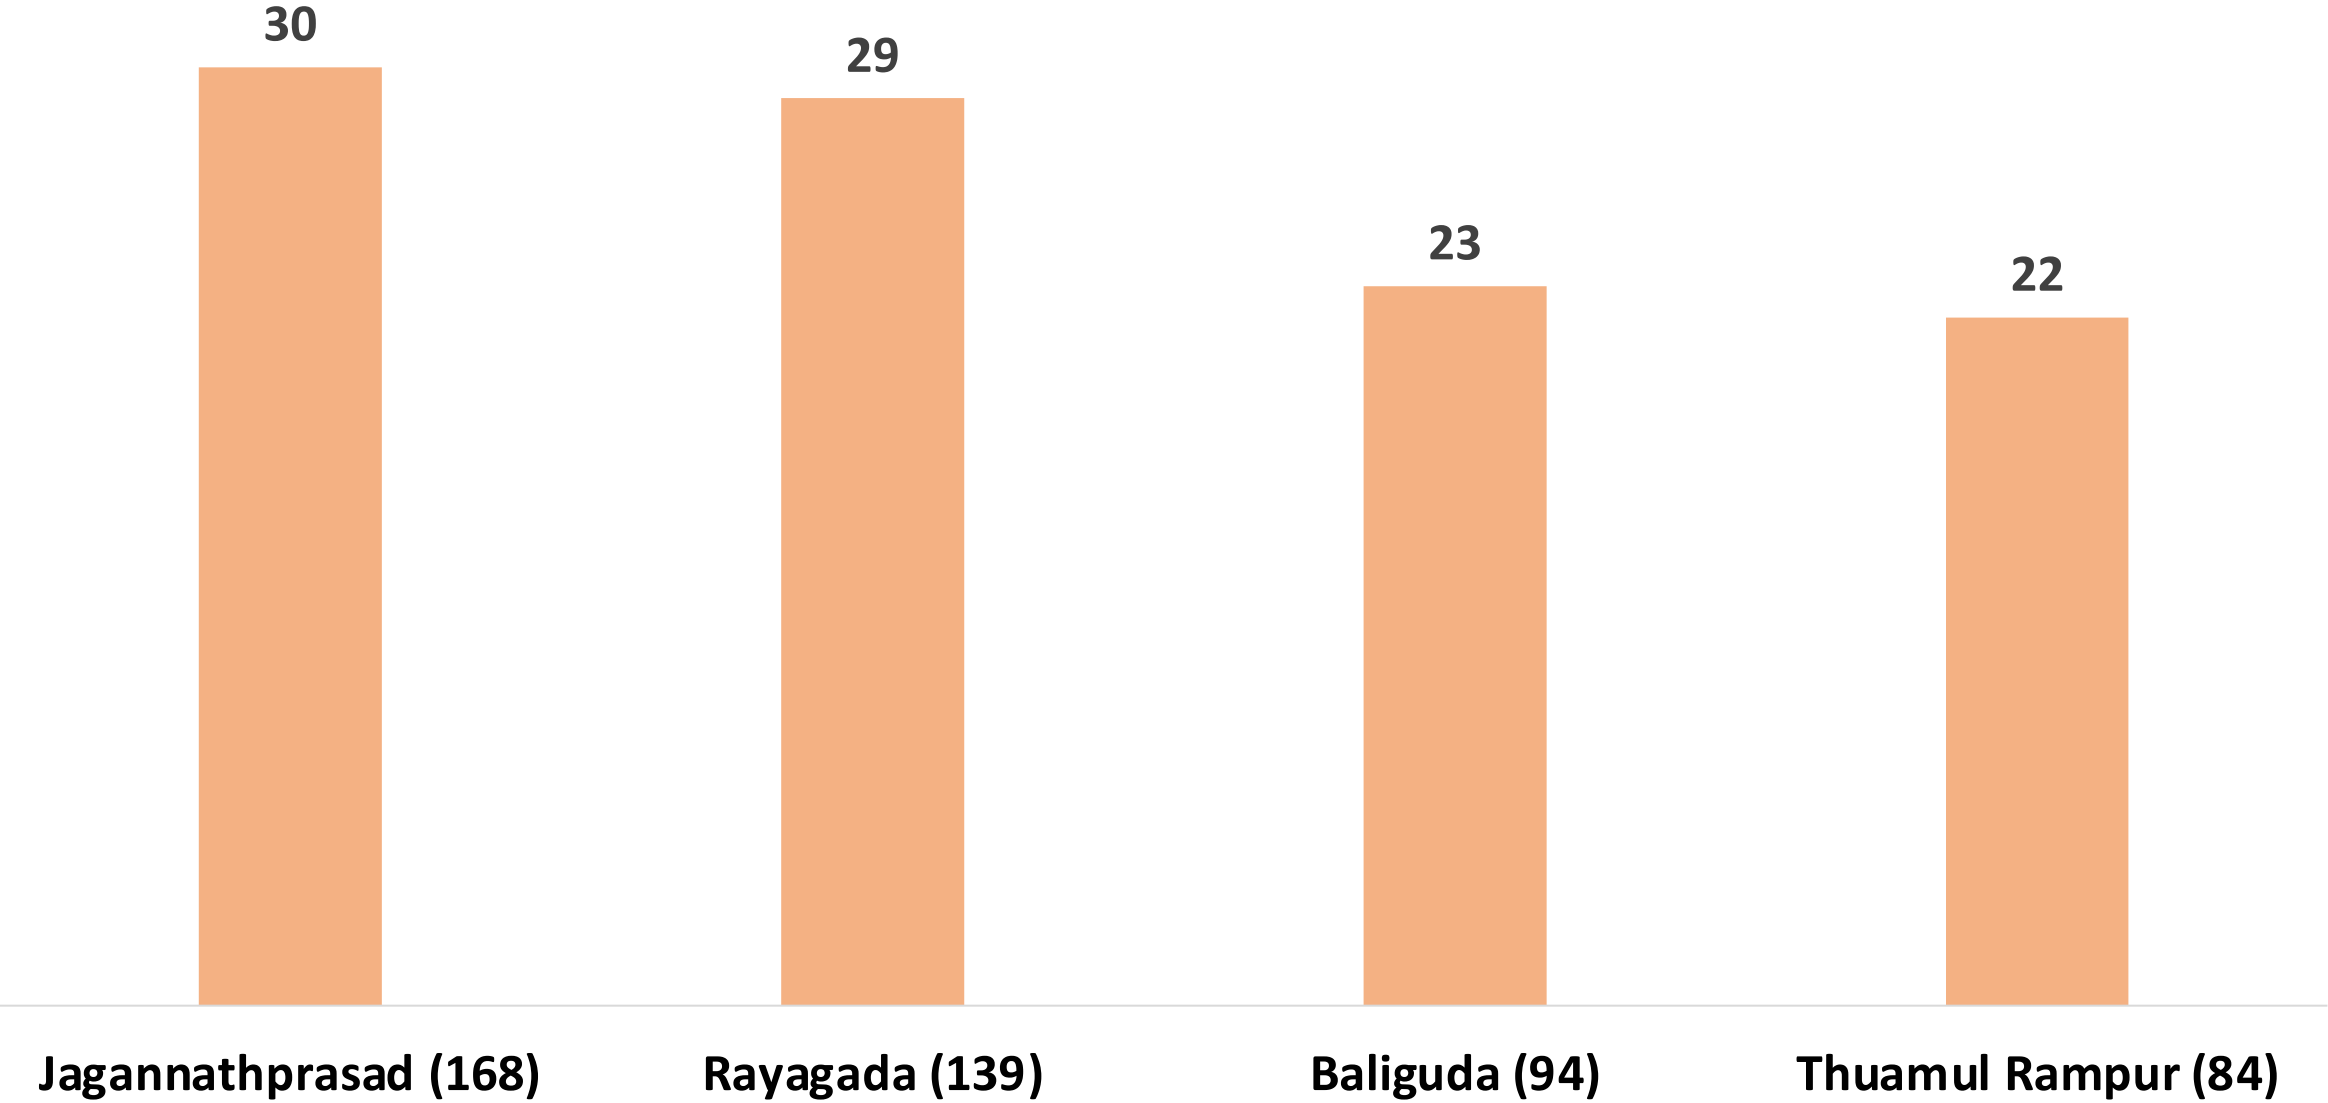

Distribution of migrant workers by sex

Proportion of men women and others among the migrant workers who responded to the survey

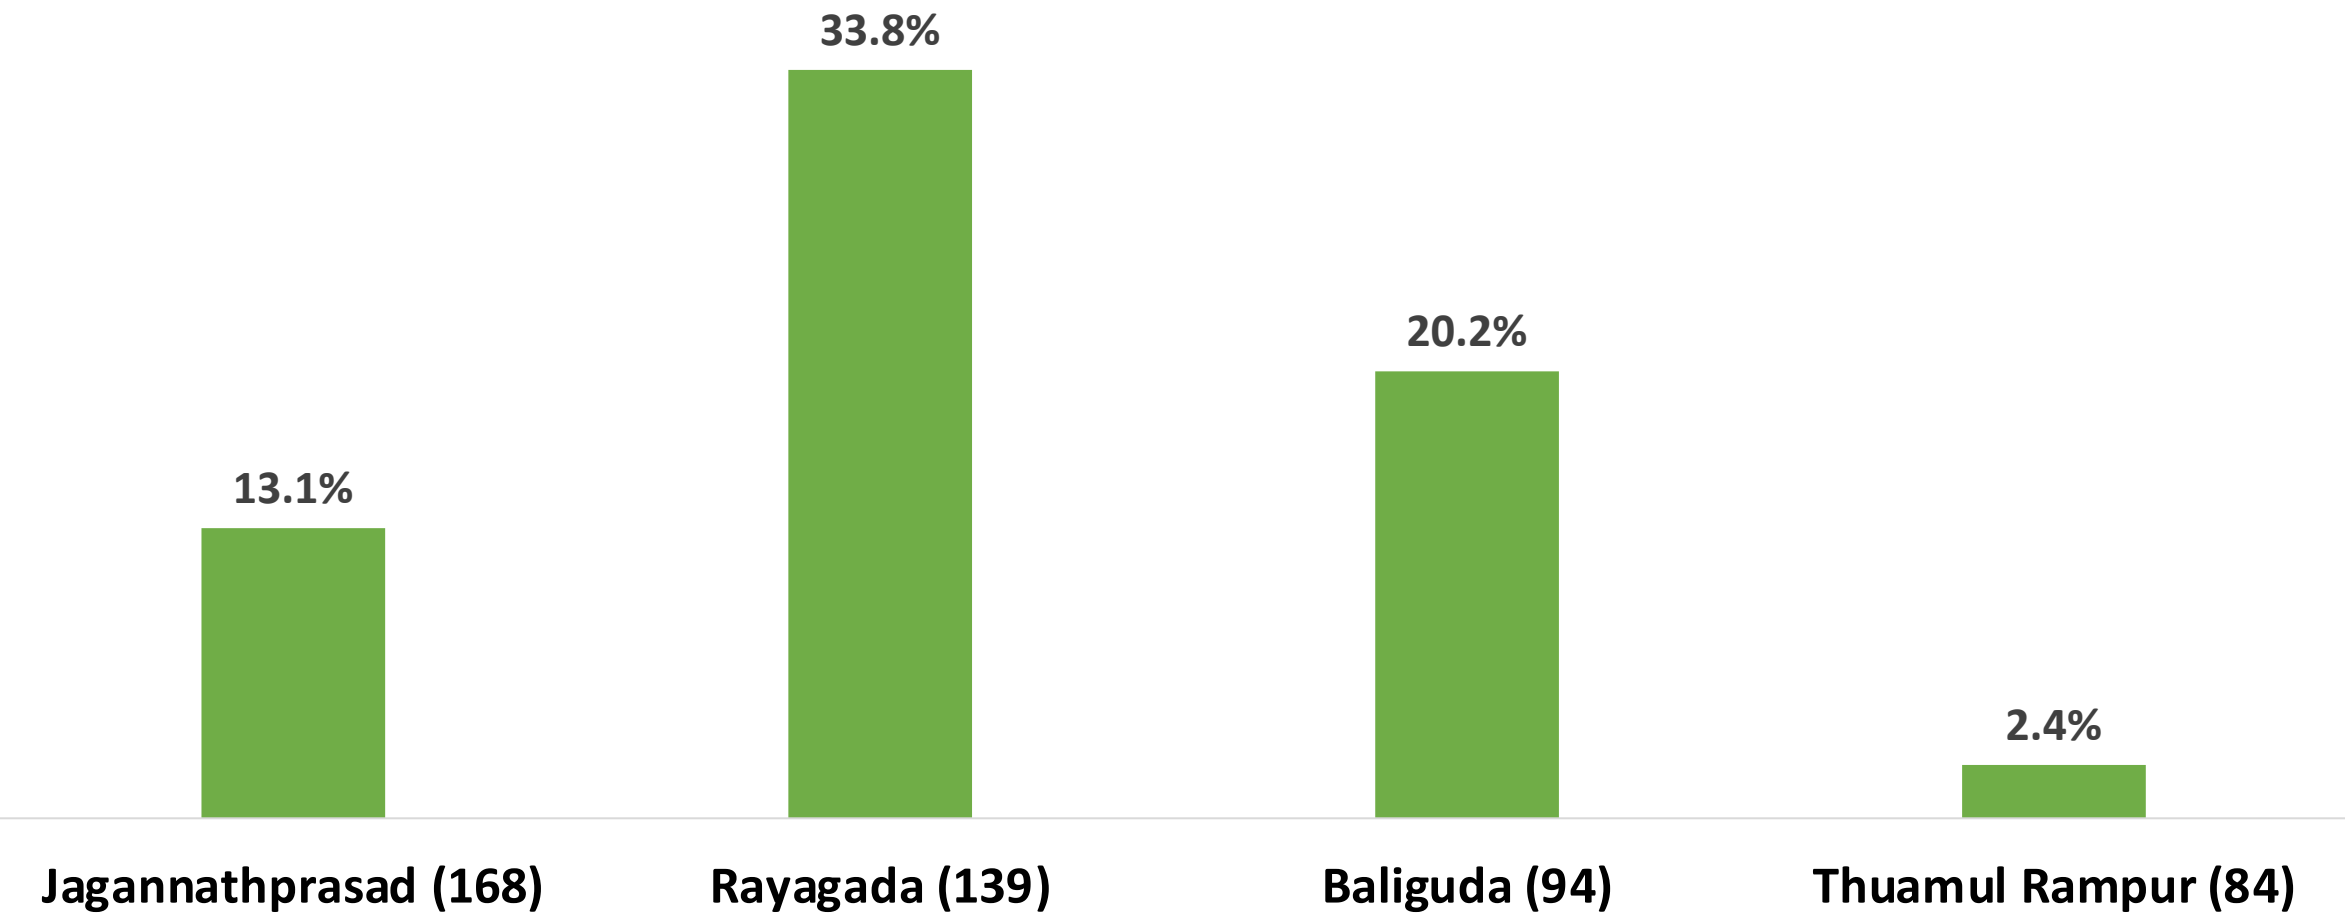

Median age of migrant workers

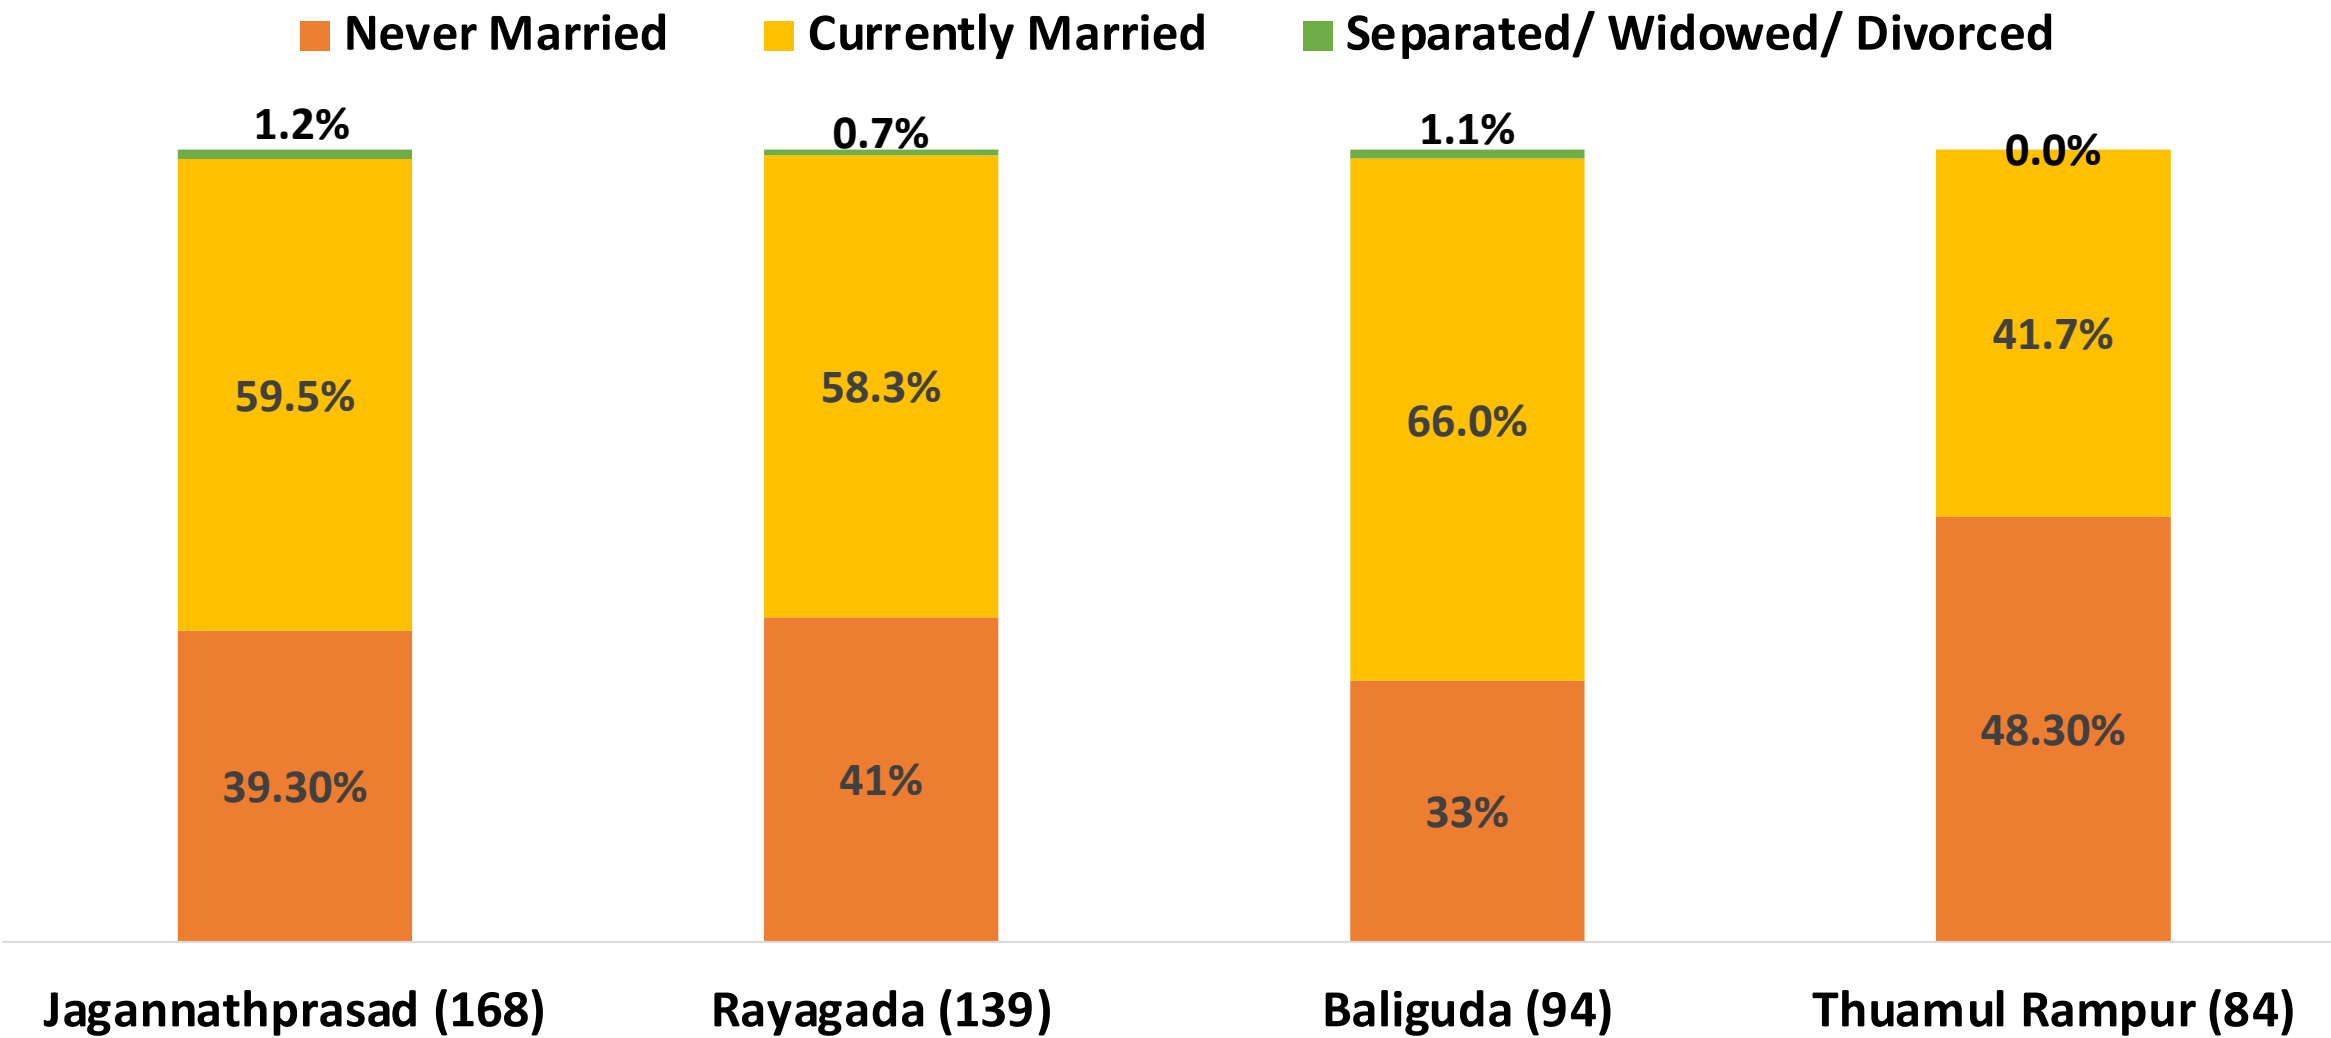

Educational status of migrant workers

Proportion of migrant workers whose have studied up to the Higher Secondary level or above

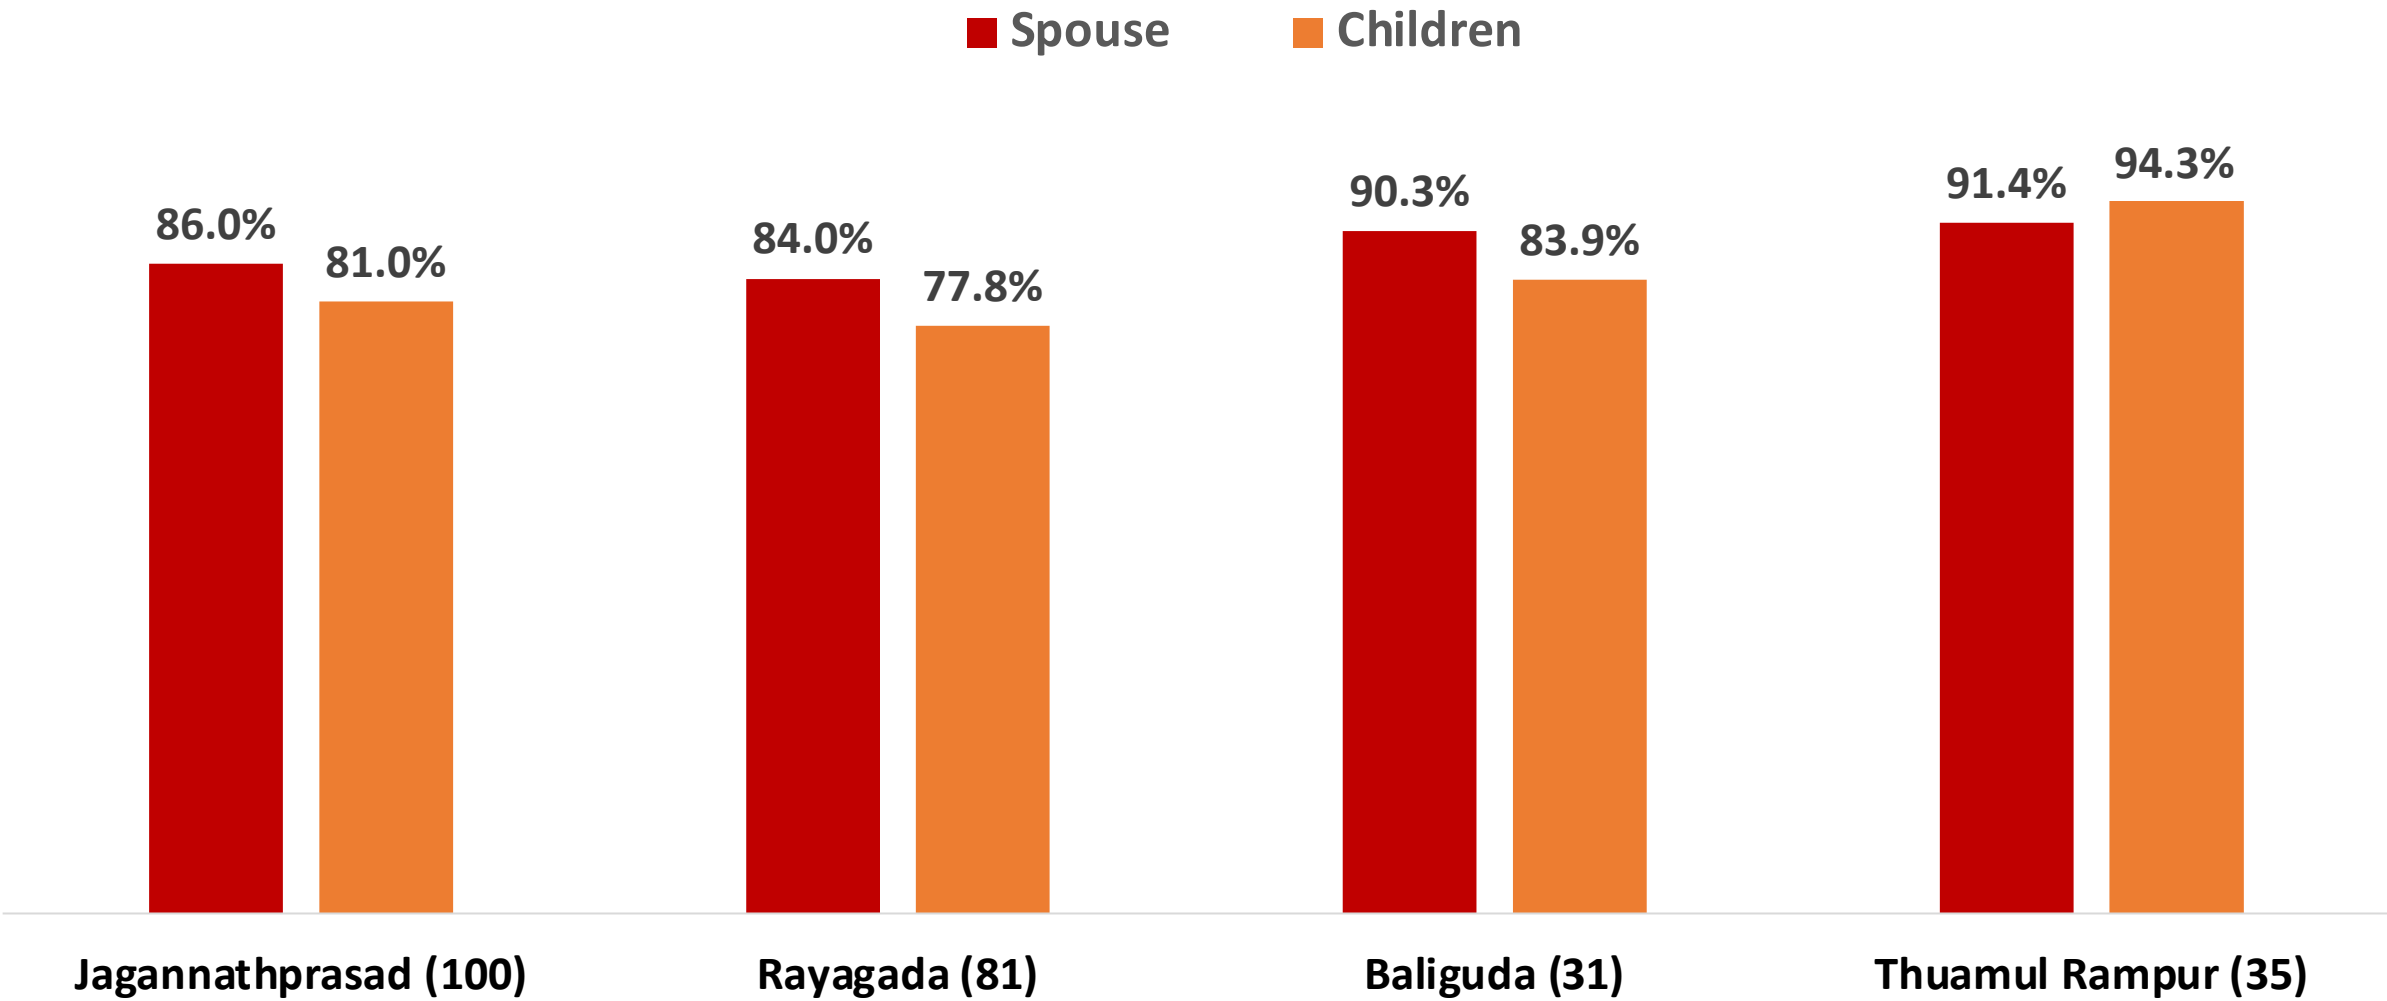

Marital status of migrant workers

Proportion of migrant workers whose have studied up to the Higher Secondary level or above

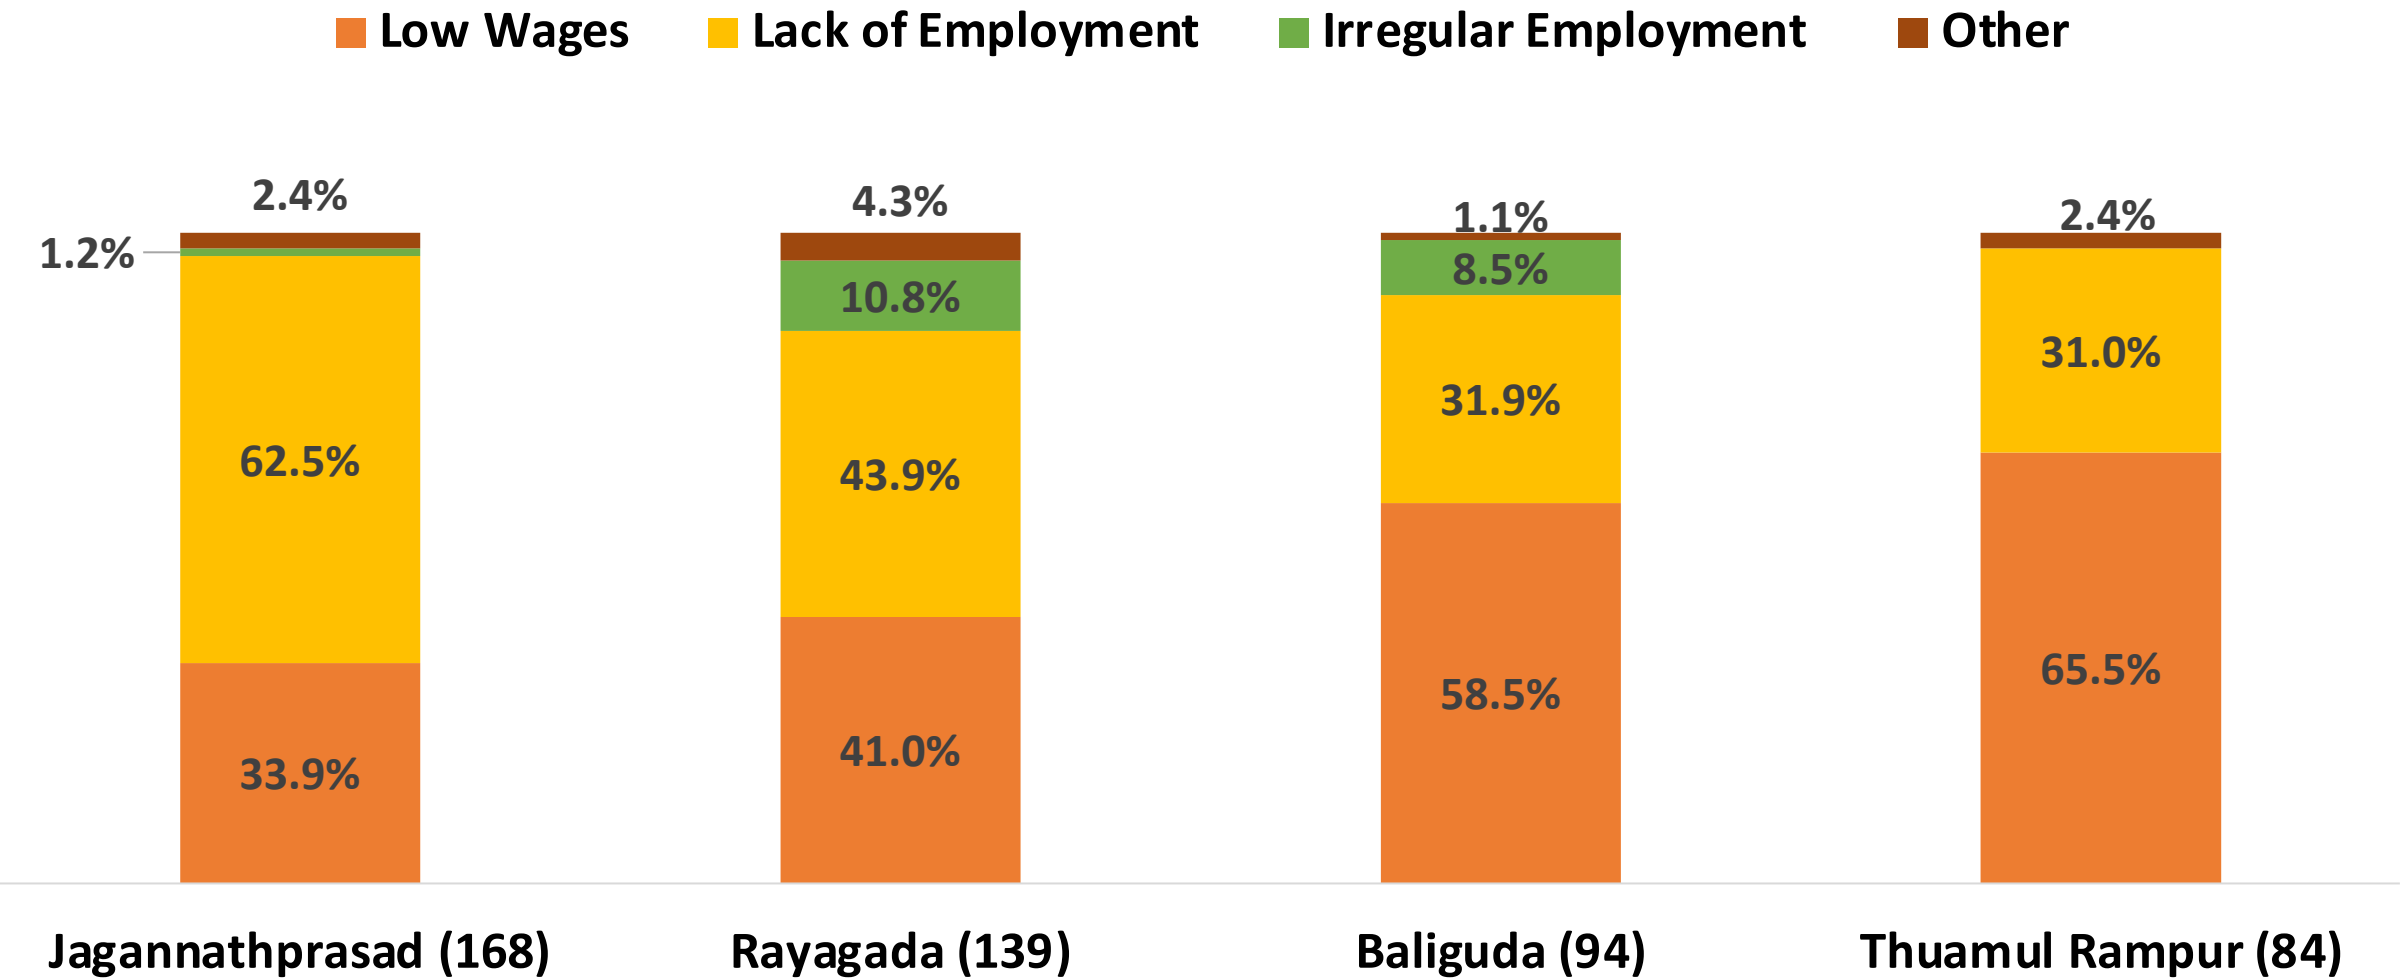

Location of family of migrant workers

Proportion of migrant workers whose families – spouse and children – continue to live in their native villages

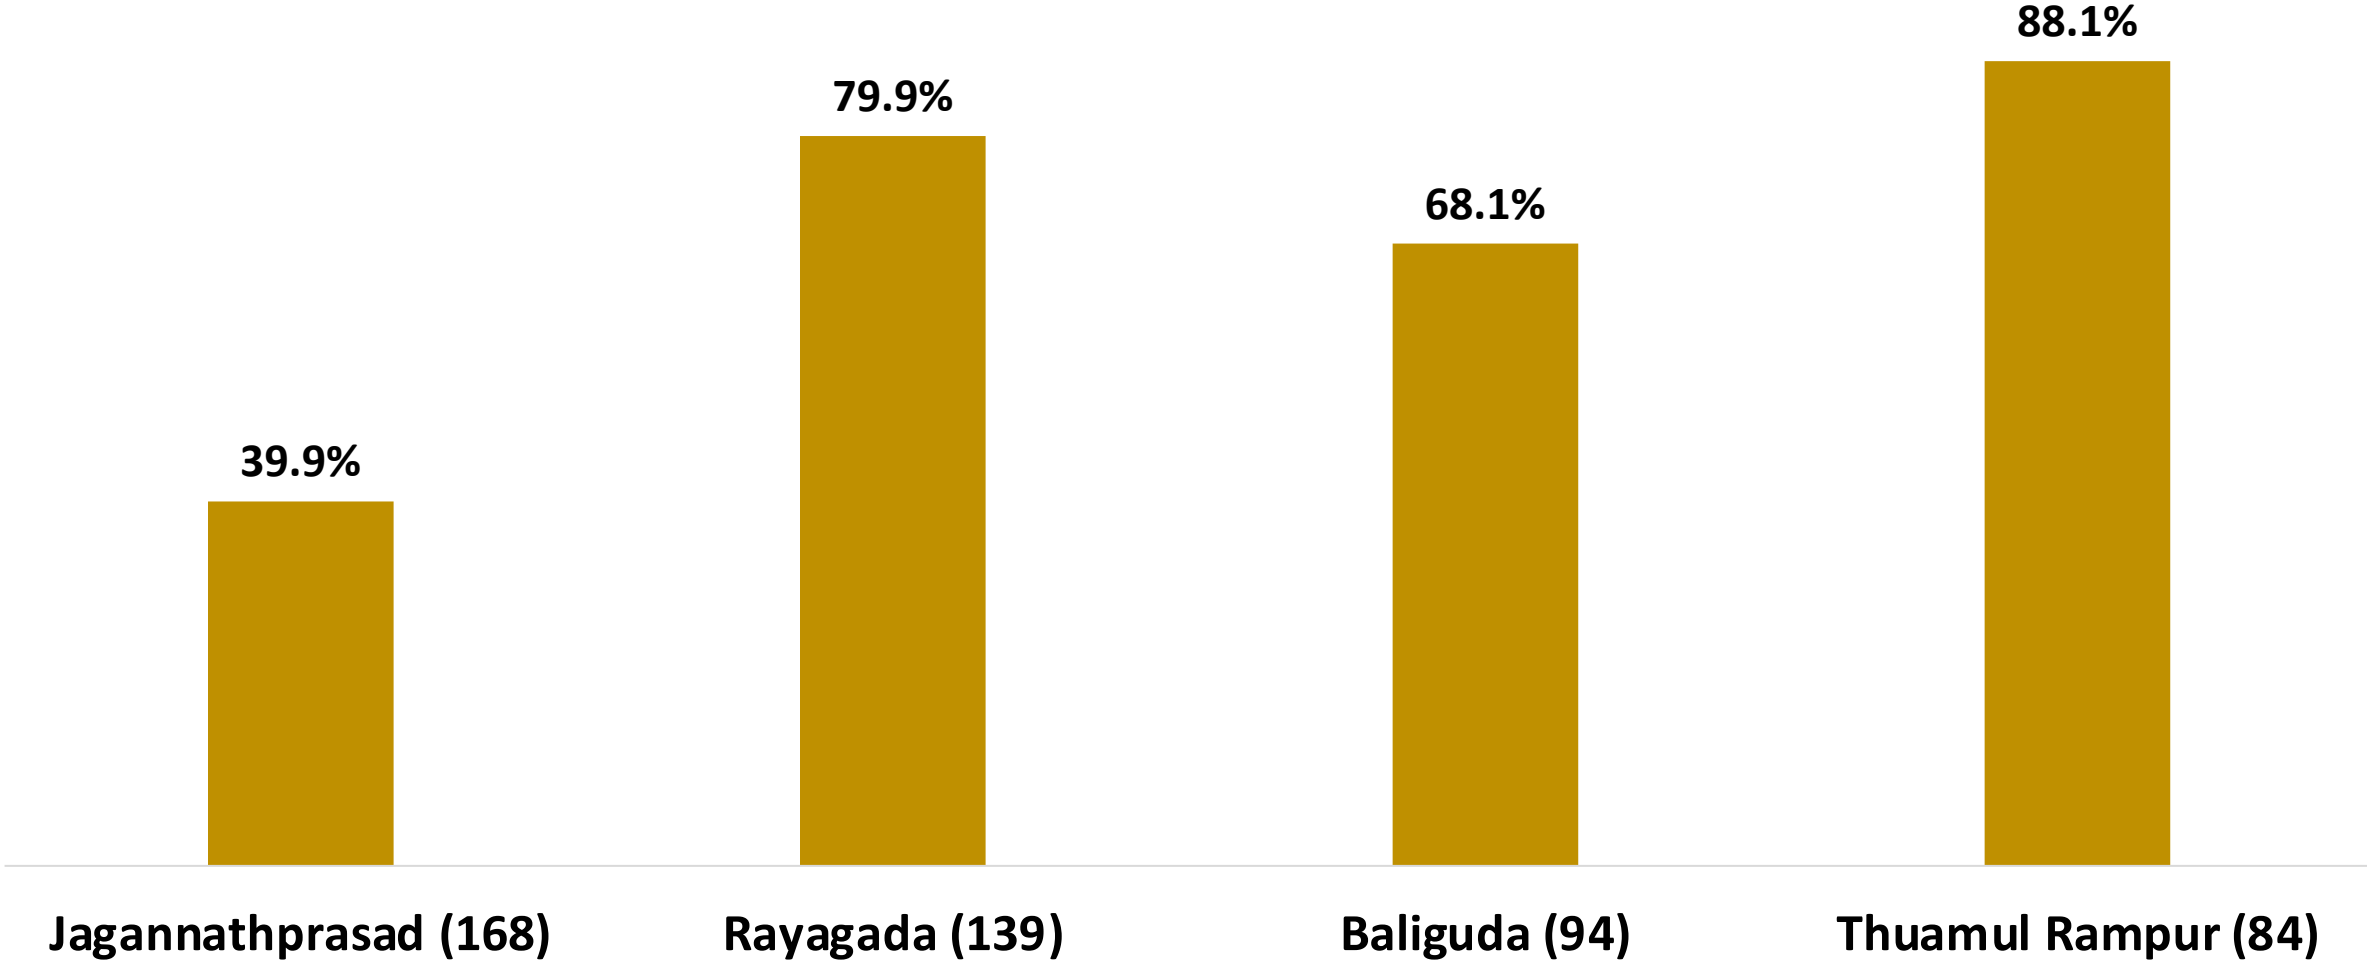

Reason for migrating

Distribution of migrant workers by different reasons for them migrating

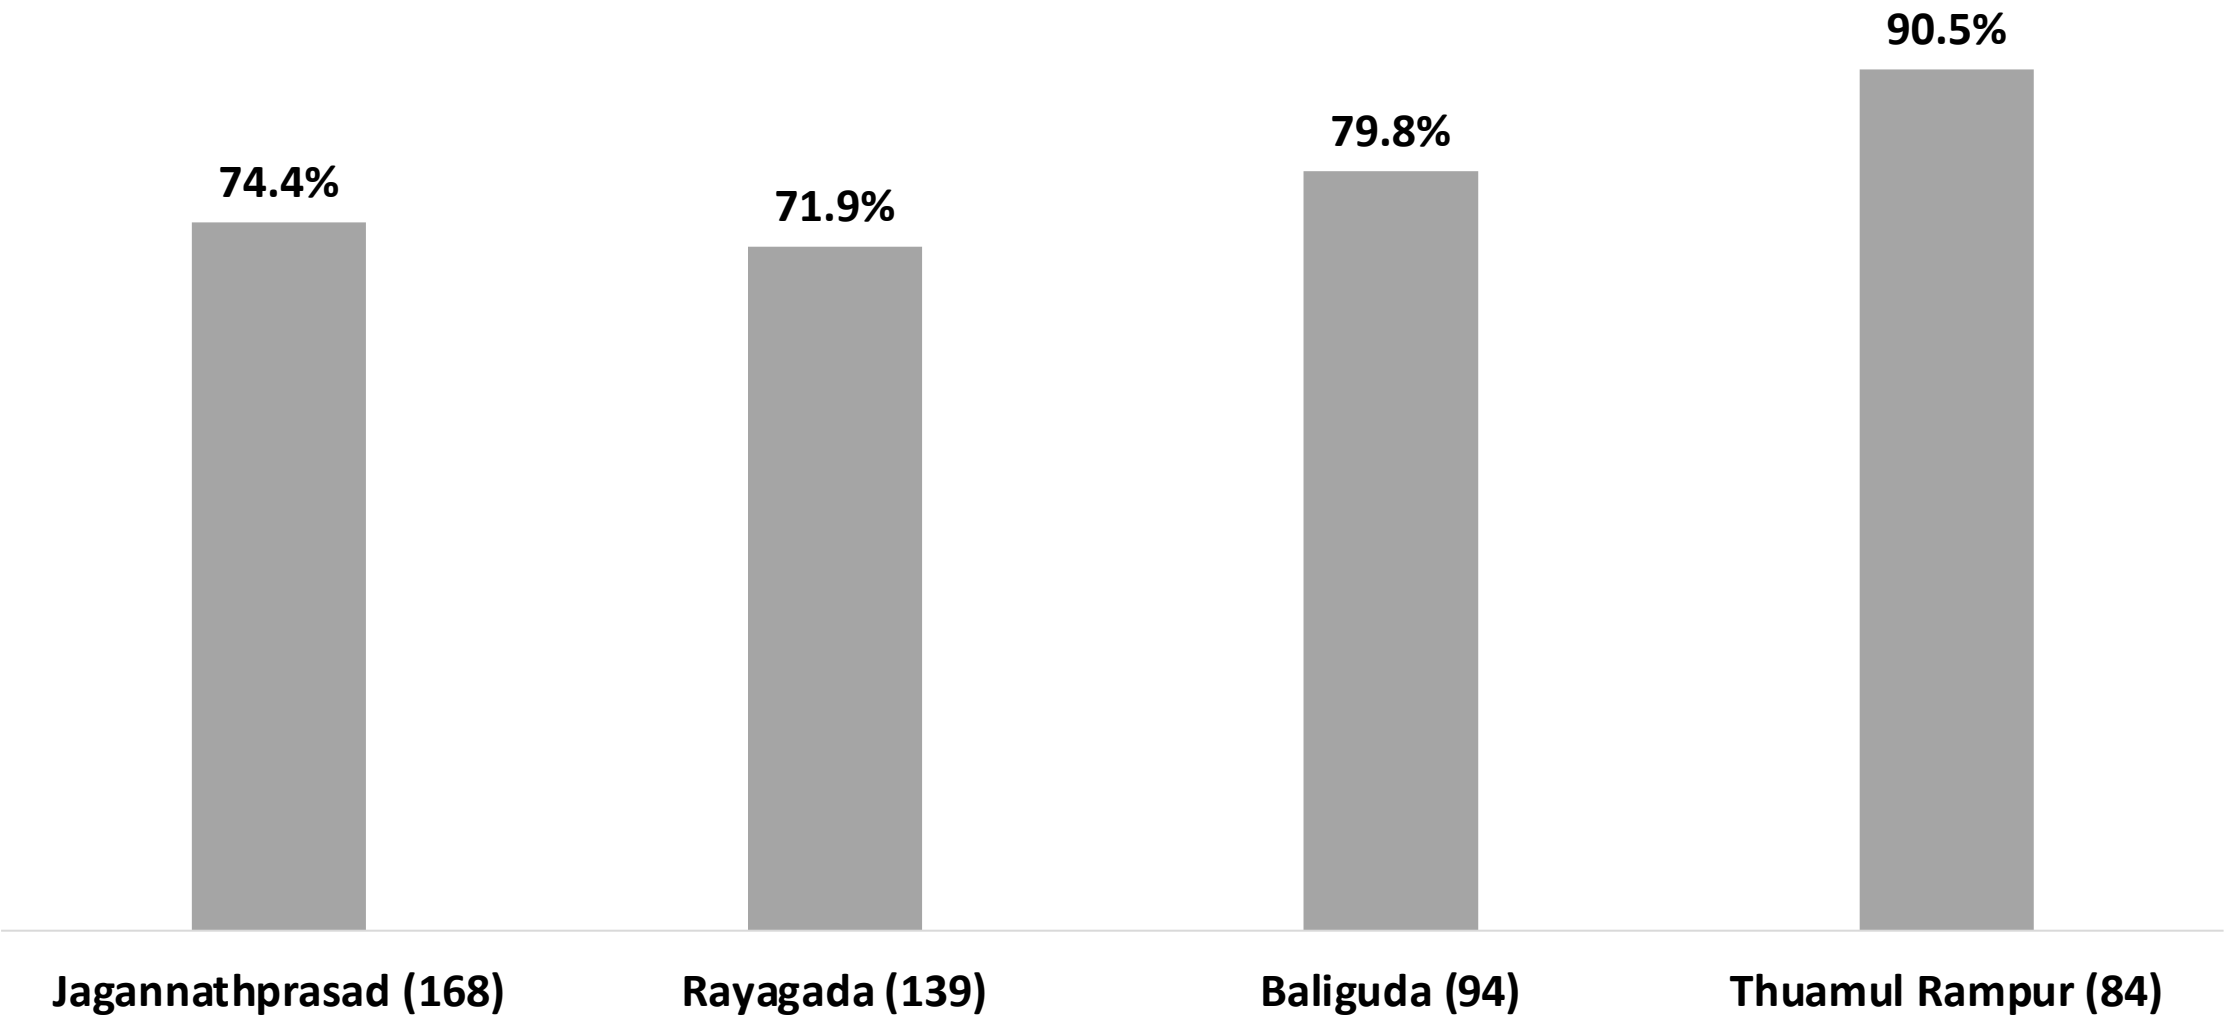

Skill levels

Proportion of migrant workers who reported to be semi-skilled or unskilled

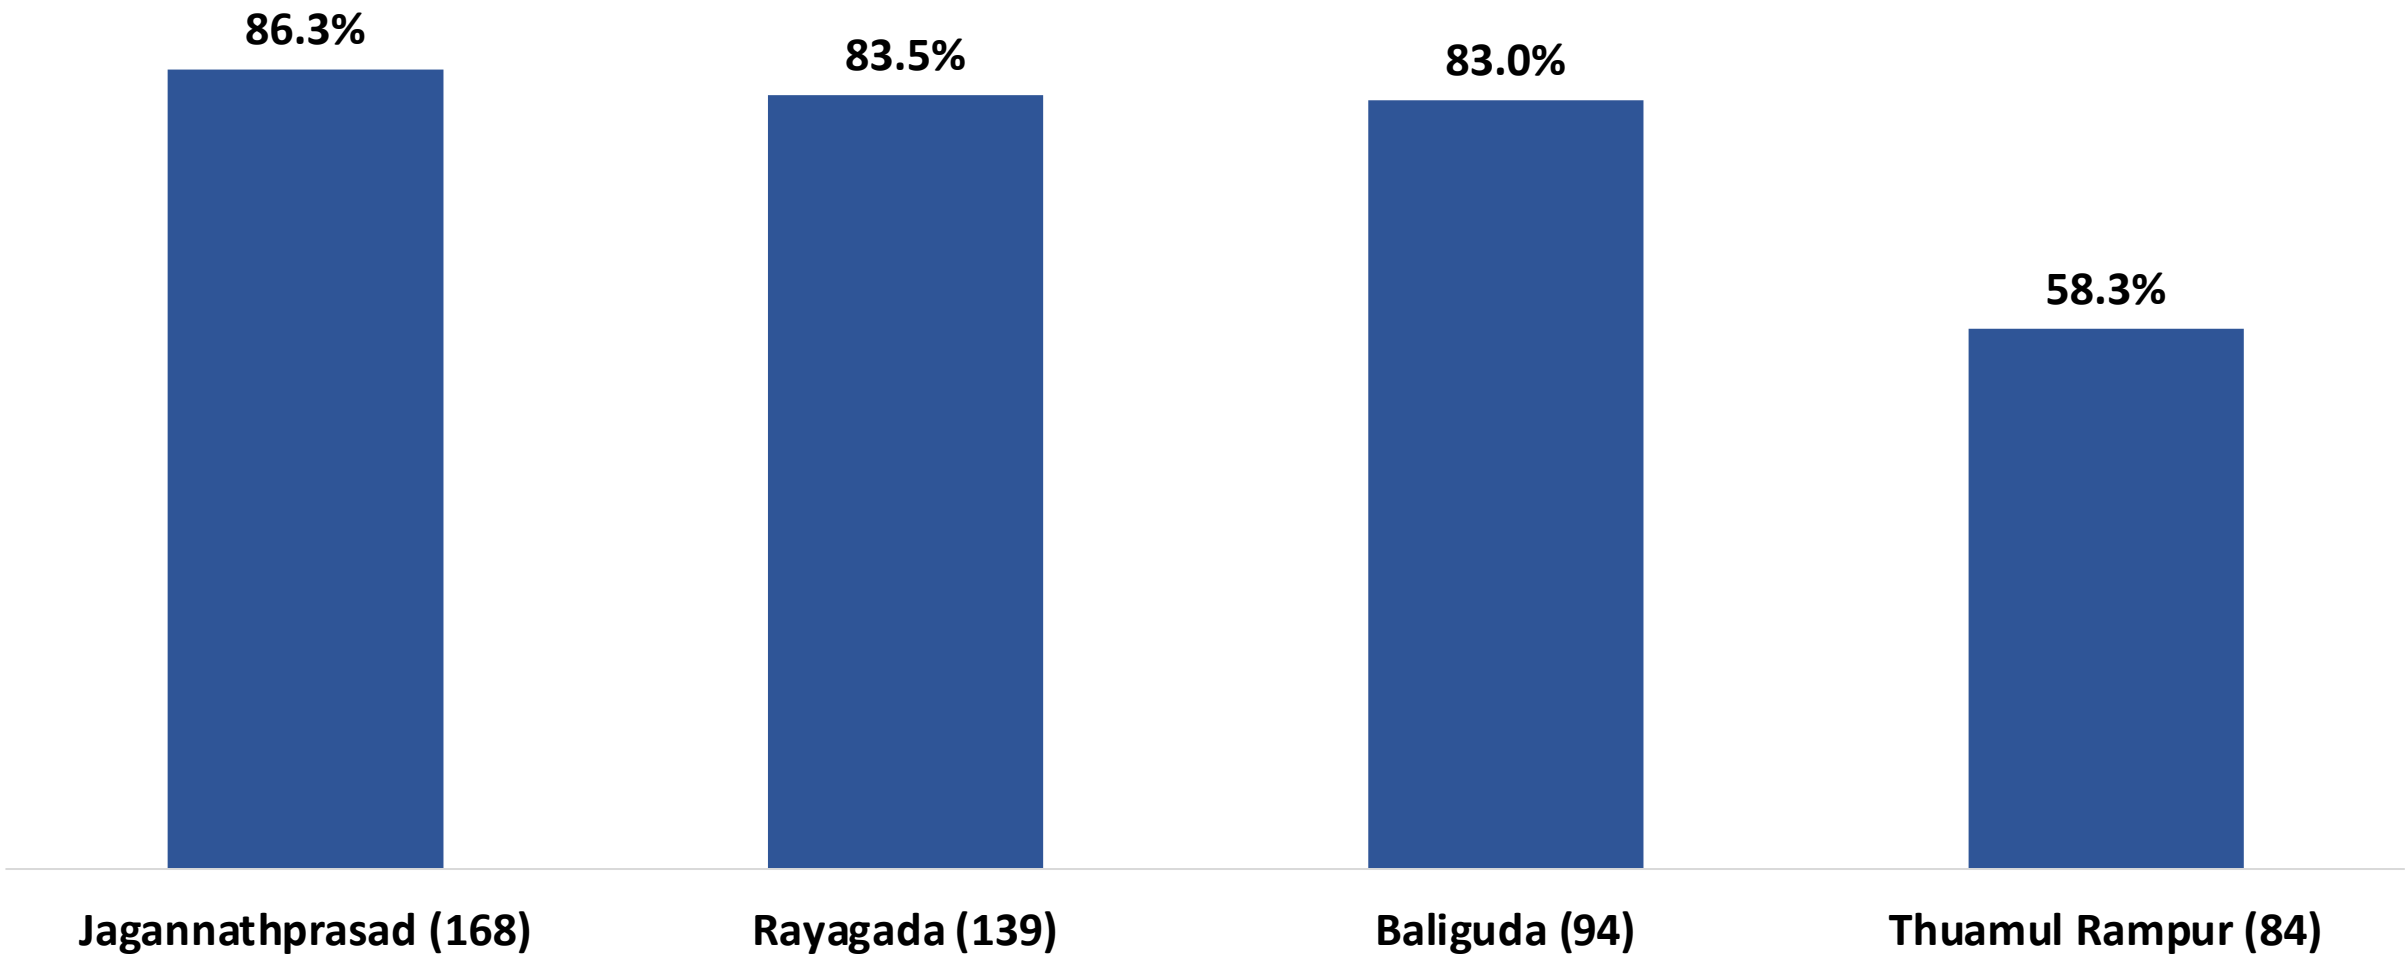

Accommodation at work place

Proportion of migrant workers who reported to be living in shared accommodation at their work location

Status of Bank Accounts

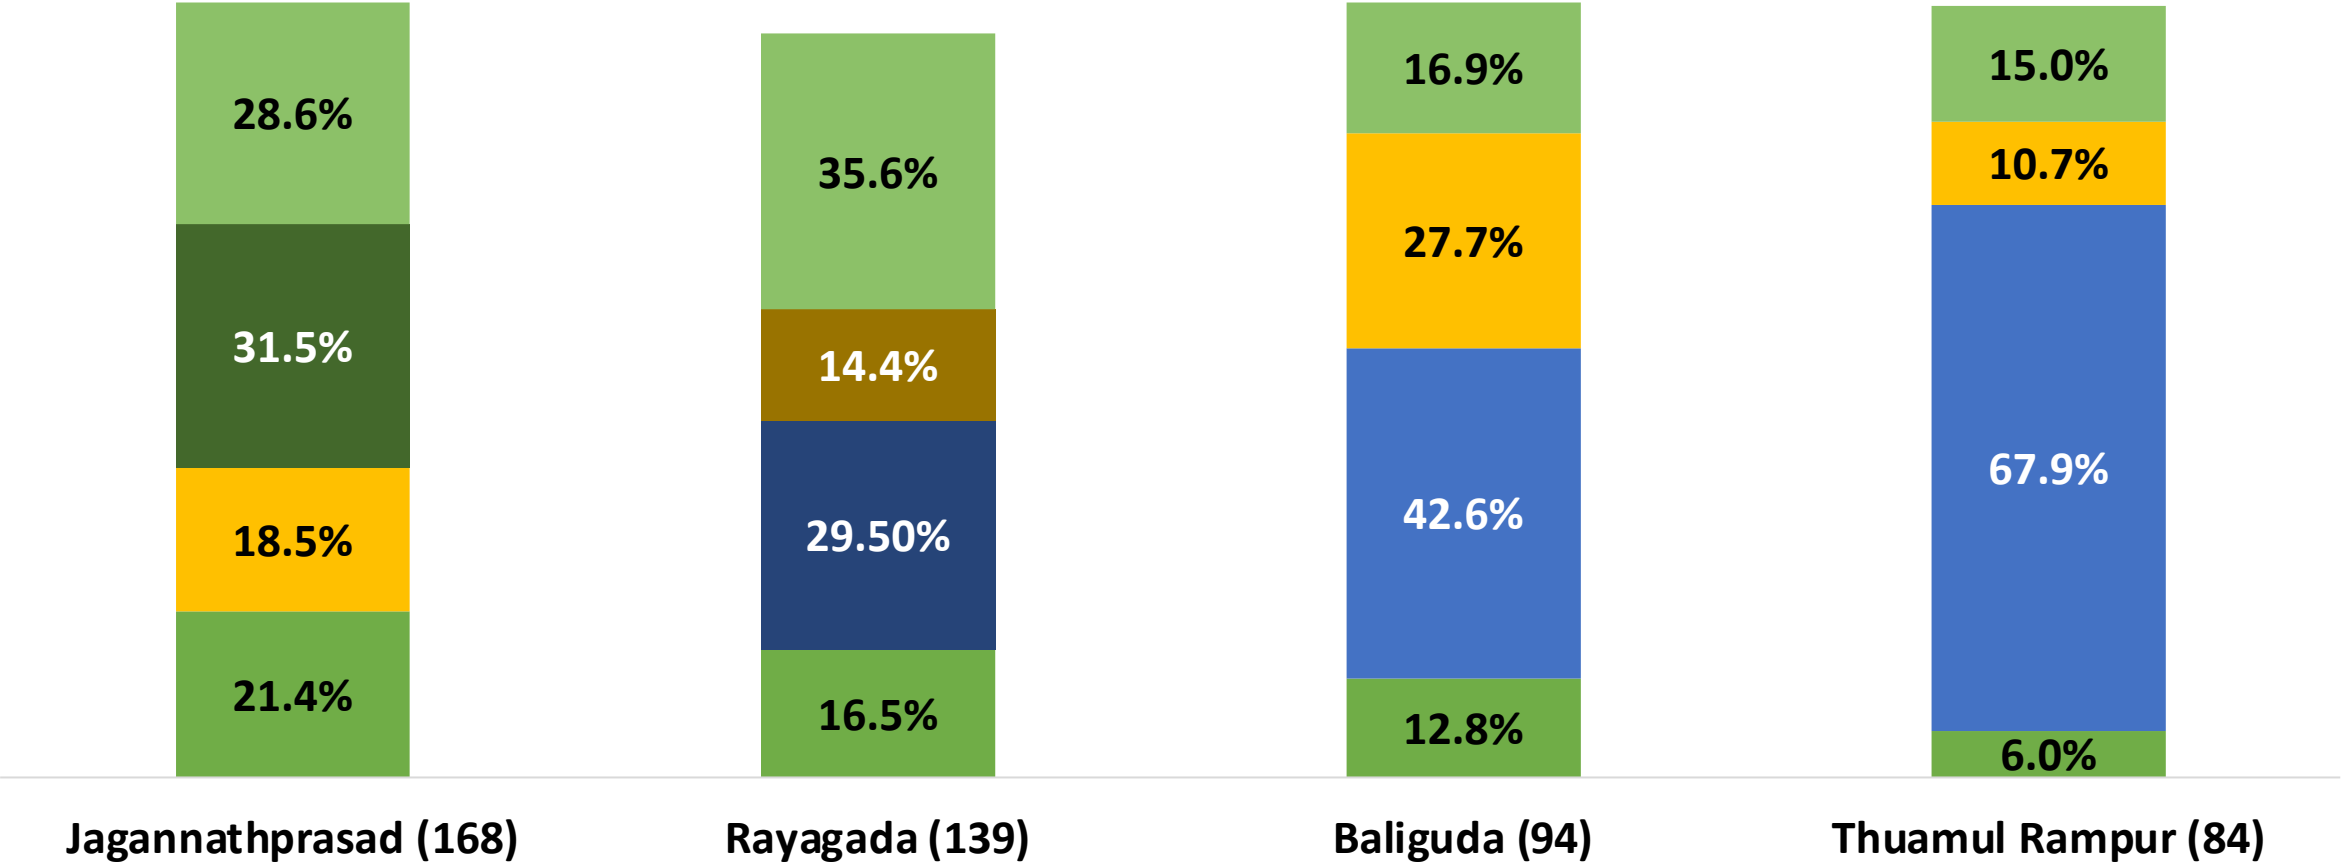

Proportion of migrant workers who reported having a bank account

Destination States

Distribution of migrant workers by State in which they worked prior to lockdown

■ Odisha ■ Kerala ■ Tamil Nadu ■ Gujarat ■ Telangana ■ Andhra Pradesh ■ Others

Category of employment

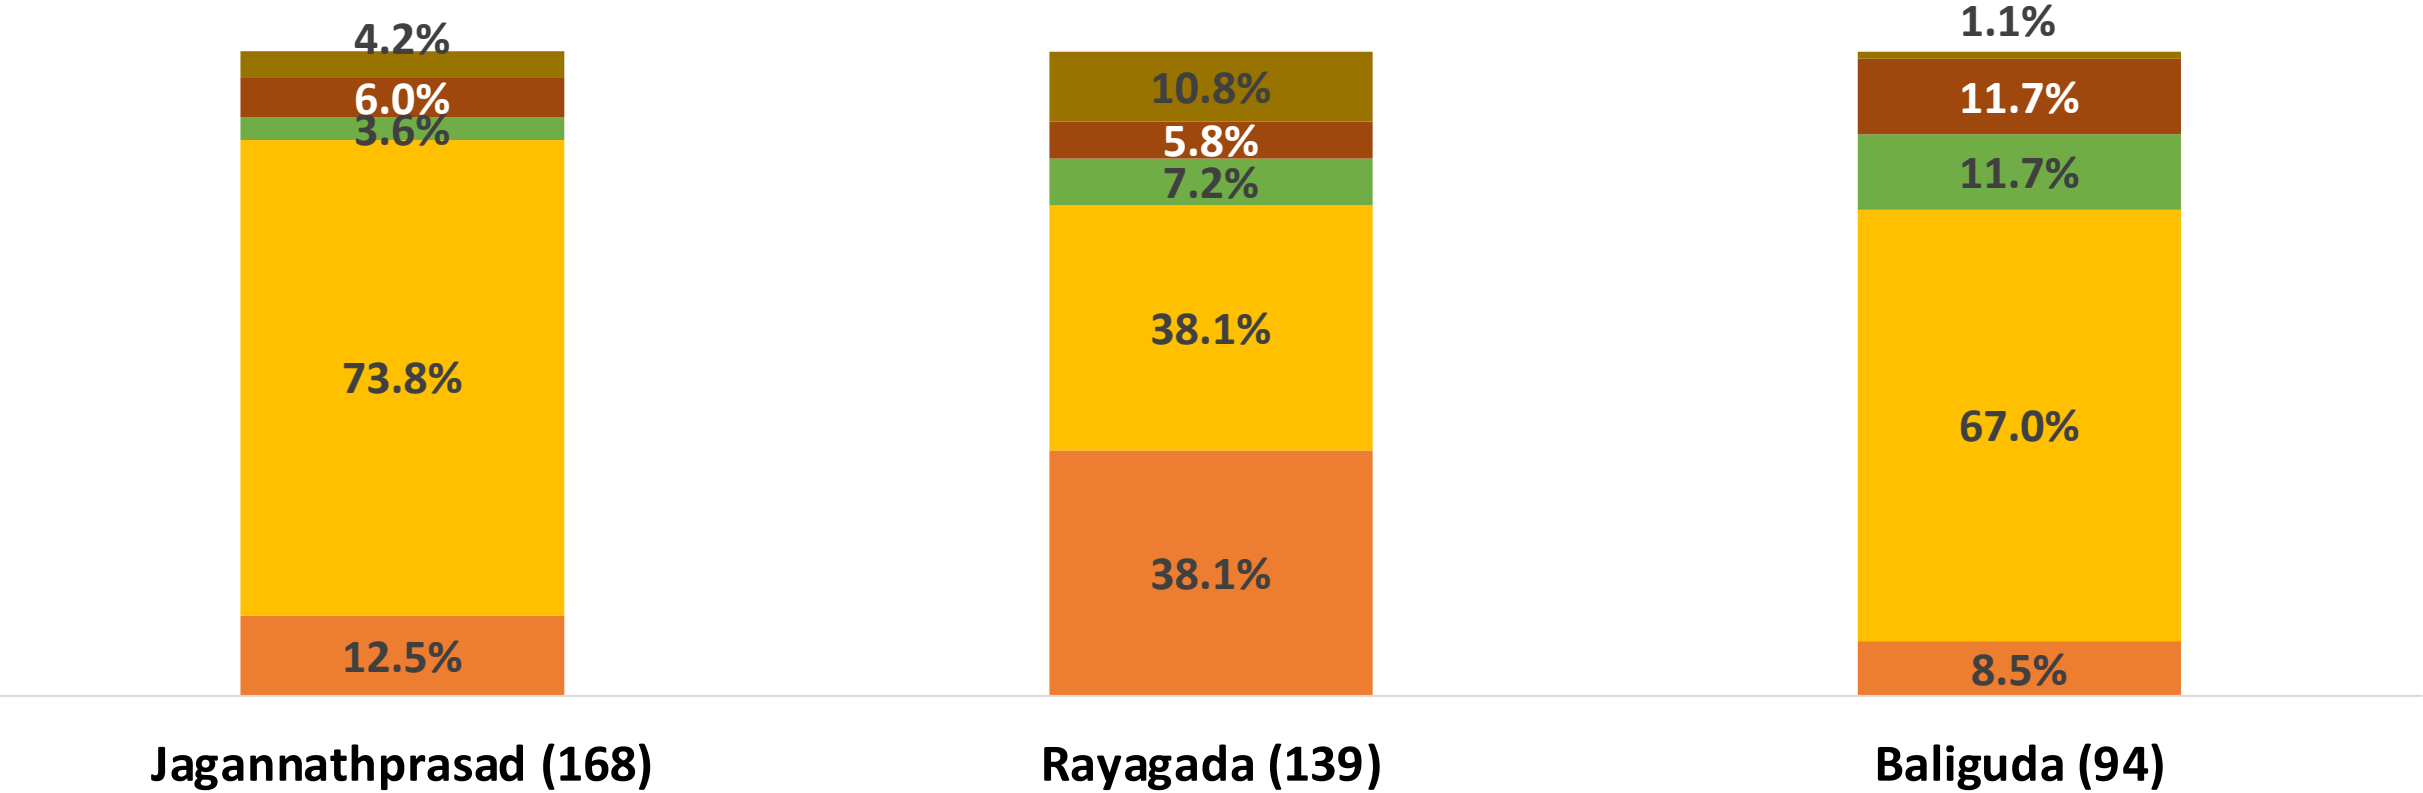

Distribution of migrant workers by nature of their work engagement prior to lockdown
(not asked in Thuamul Rampur)

- Naka Worker

Moves with Contractor

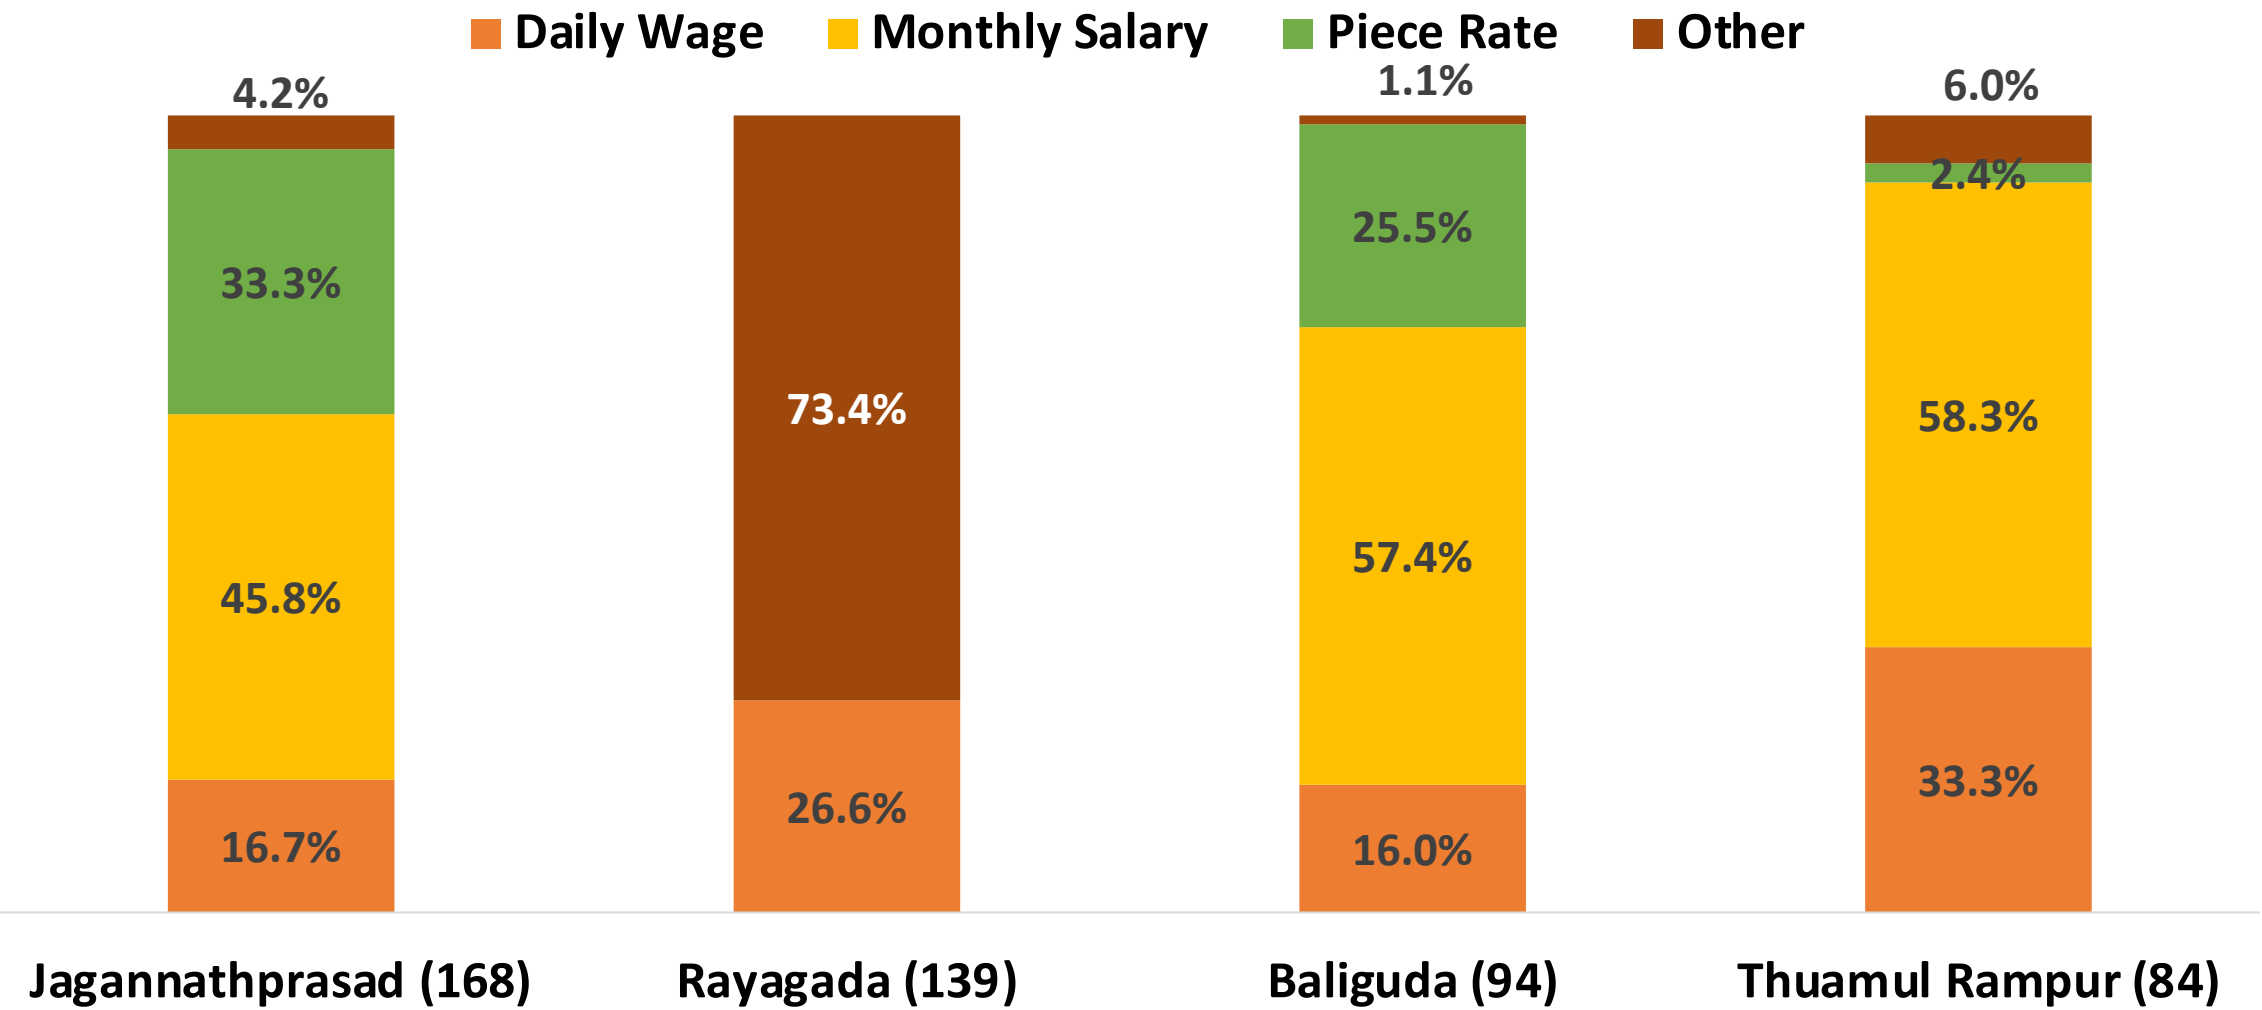

Other
- Employee at Shop/Factor or Establishment

Domestic Worker

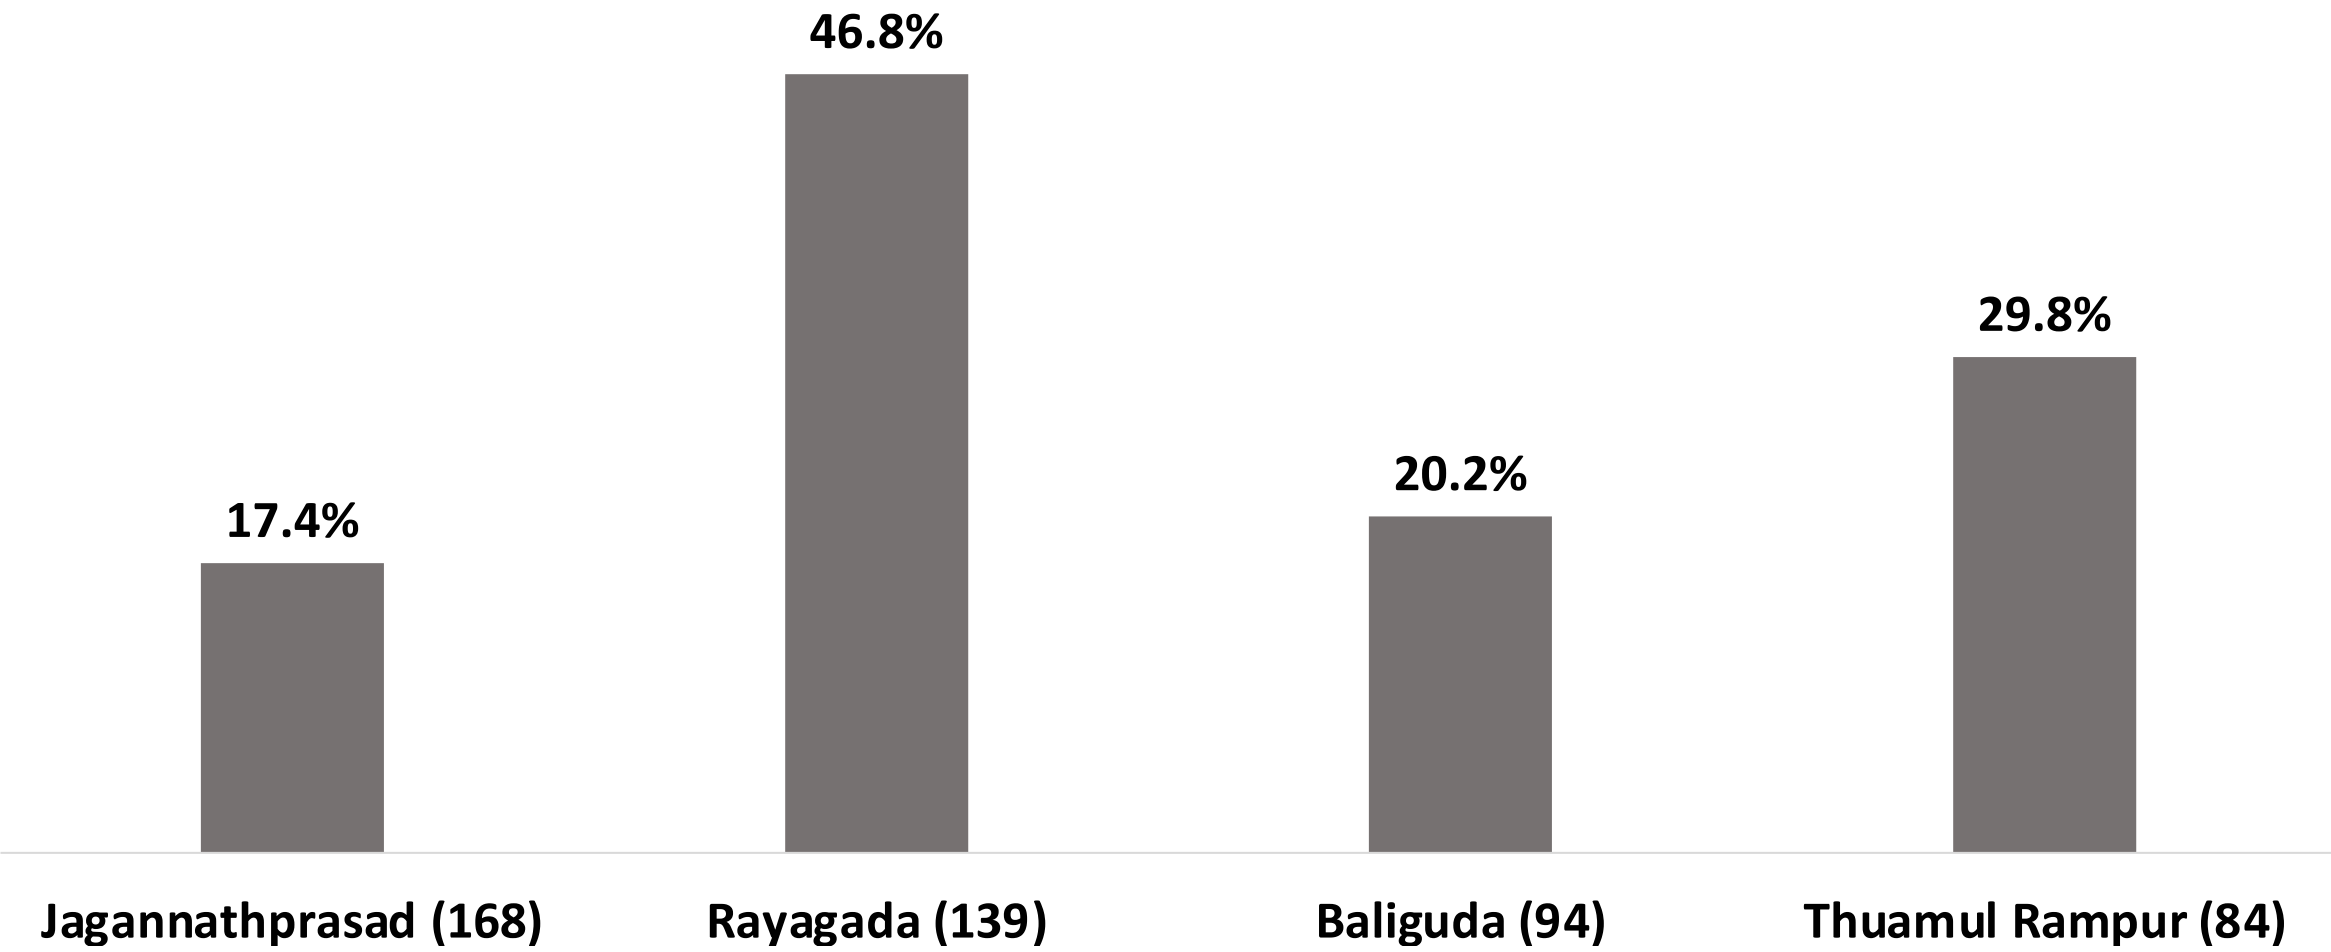

Wage arrangement

Distribution of migrant workers by how their wages are arranged prior to lockdown

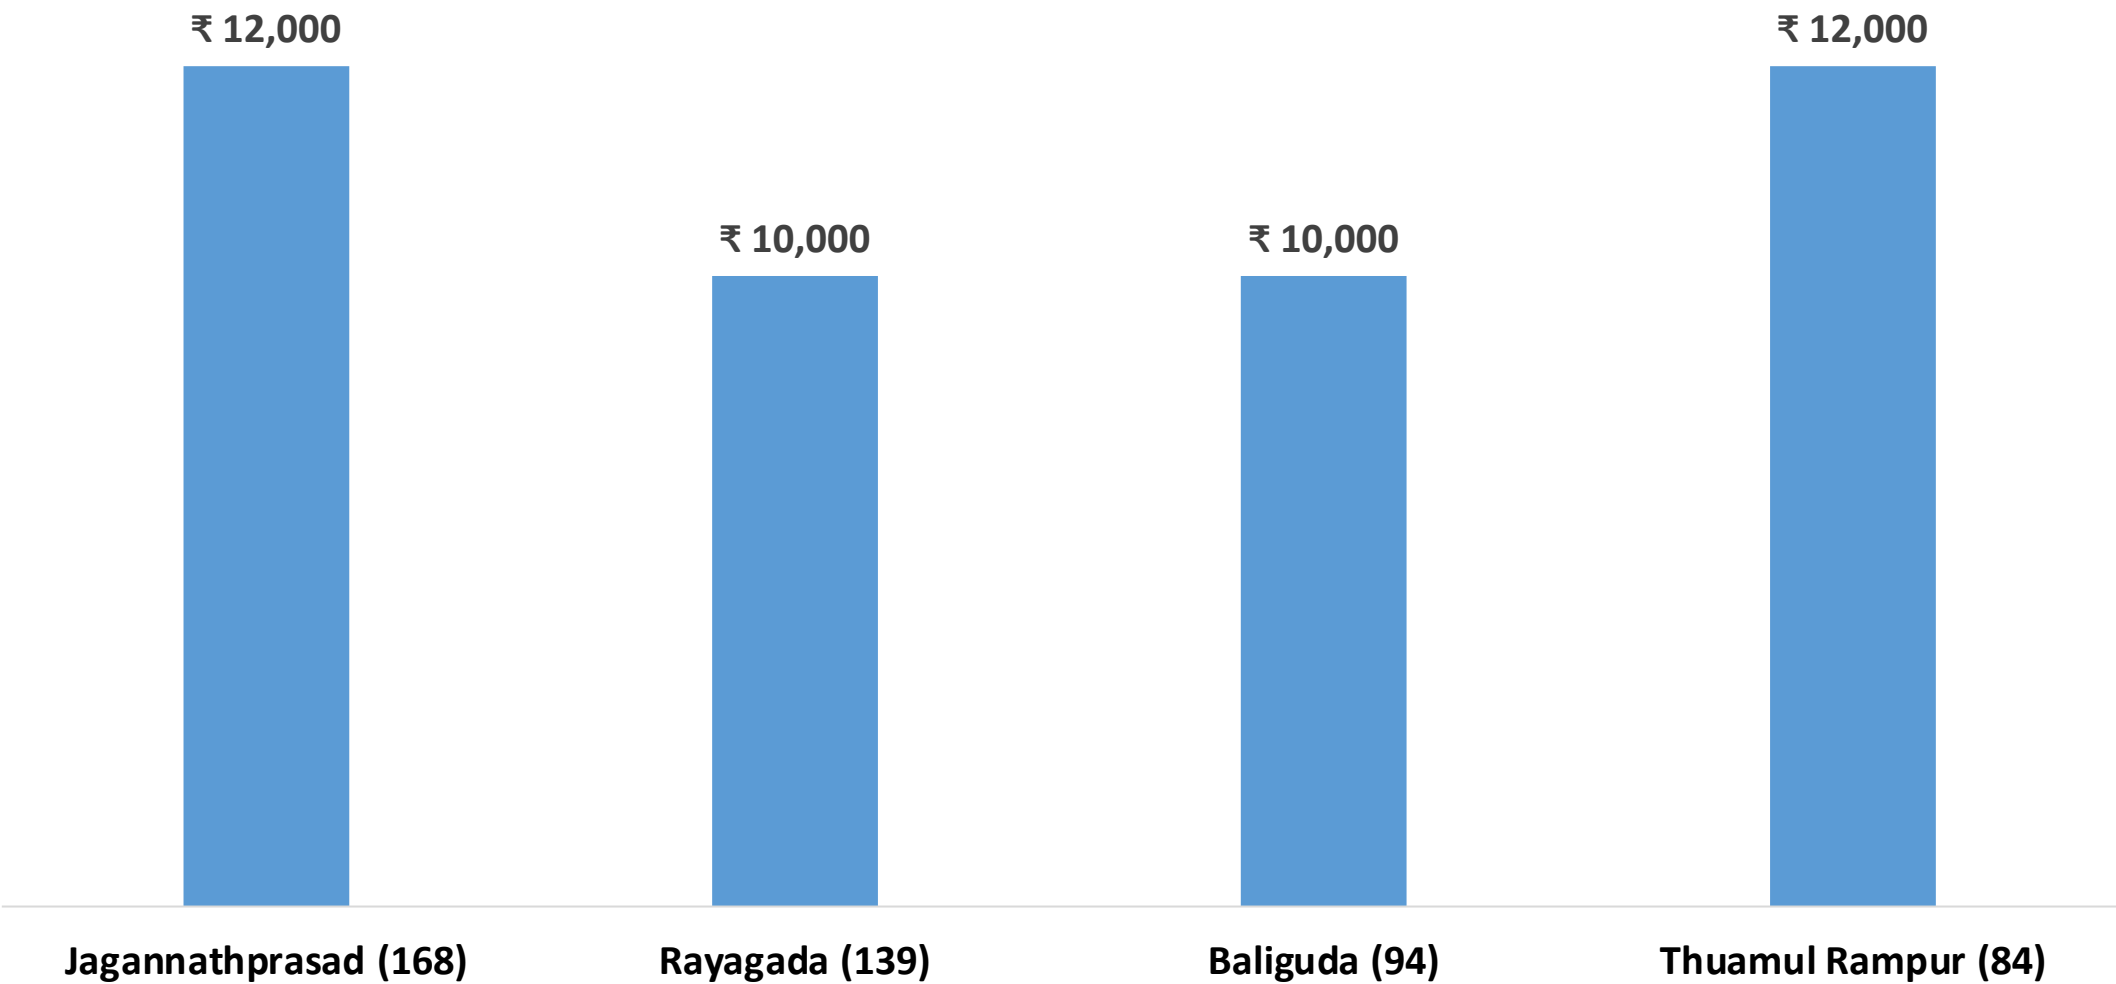

Workers in the construction sector

Distribution of migrant workers reported to be working in construction sector prior to lockdown

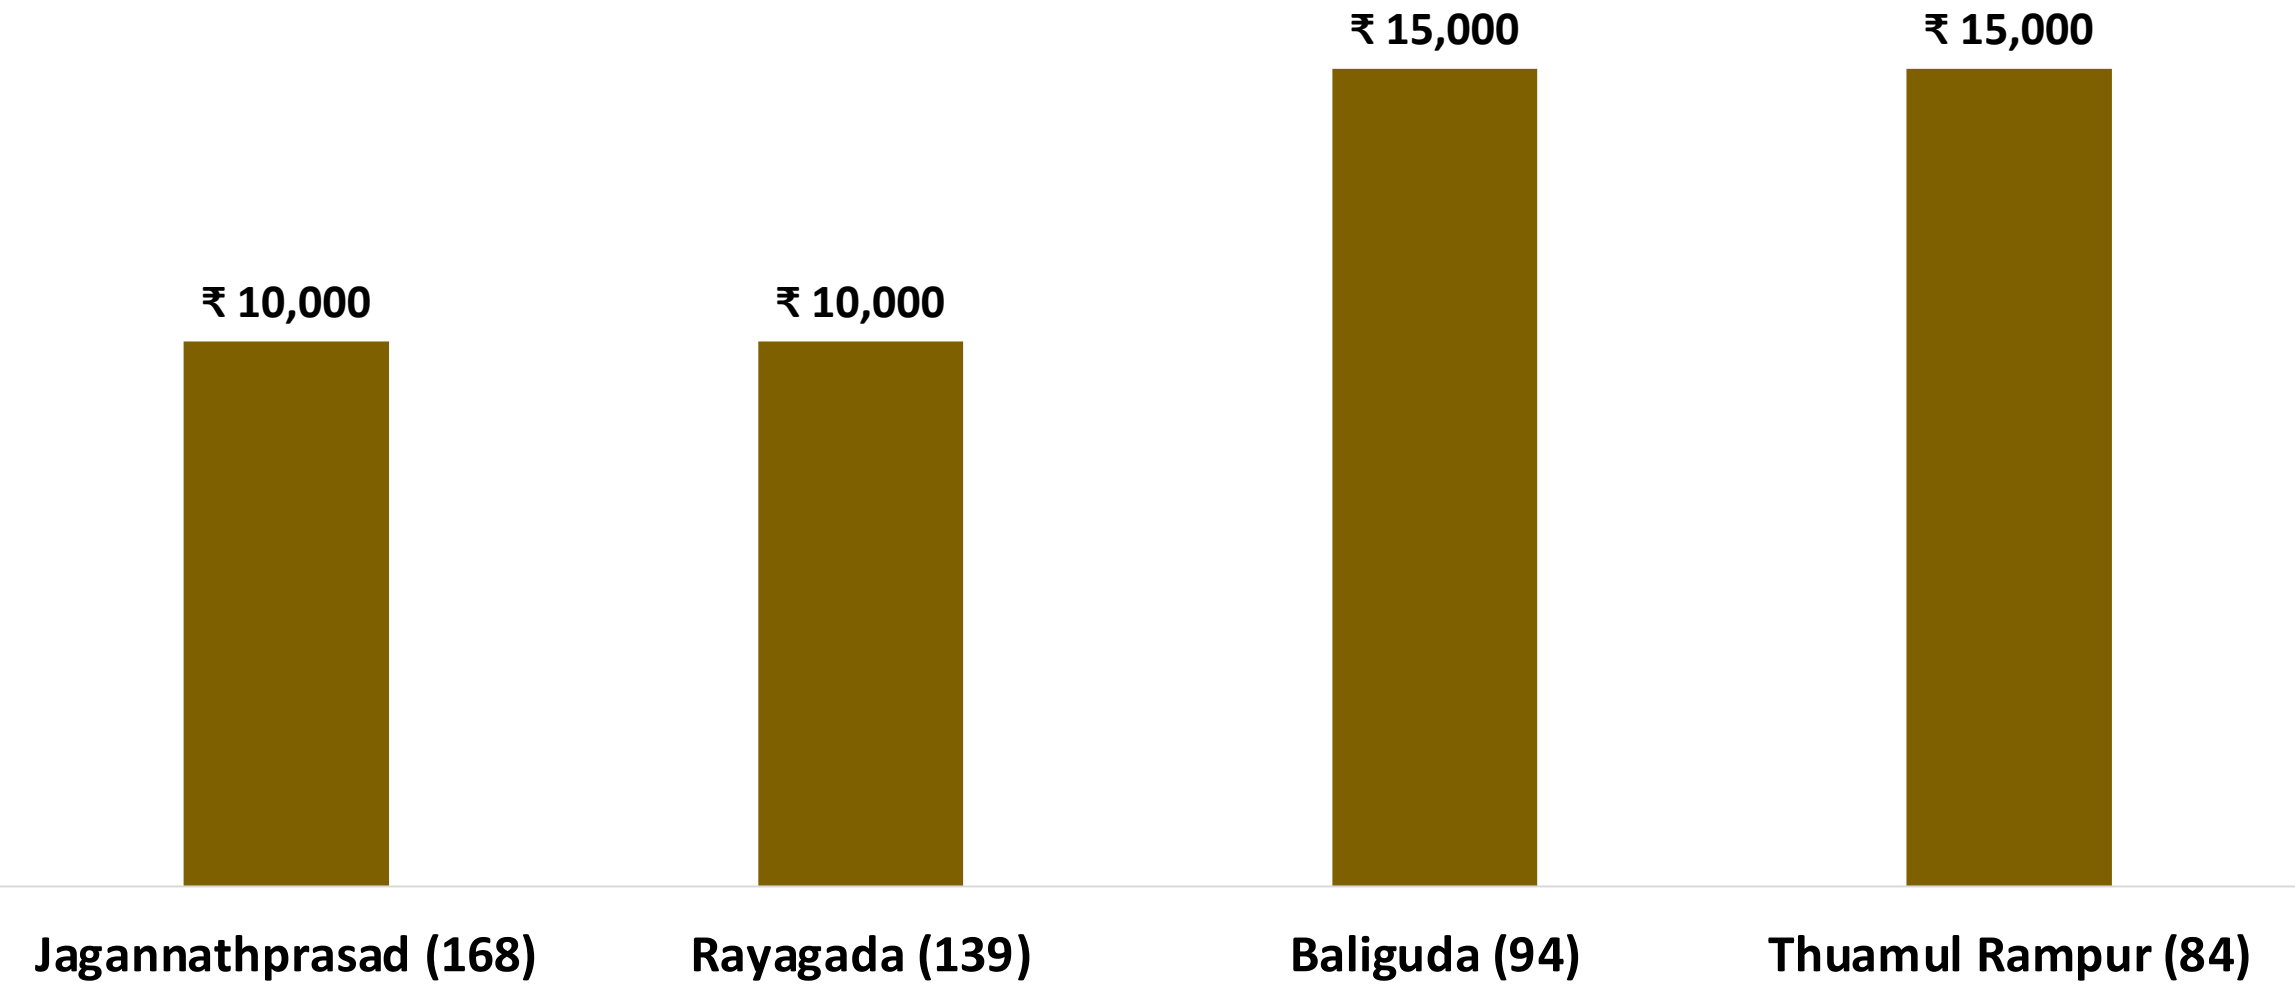

Median wage income

Median wage income reported by the workers

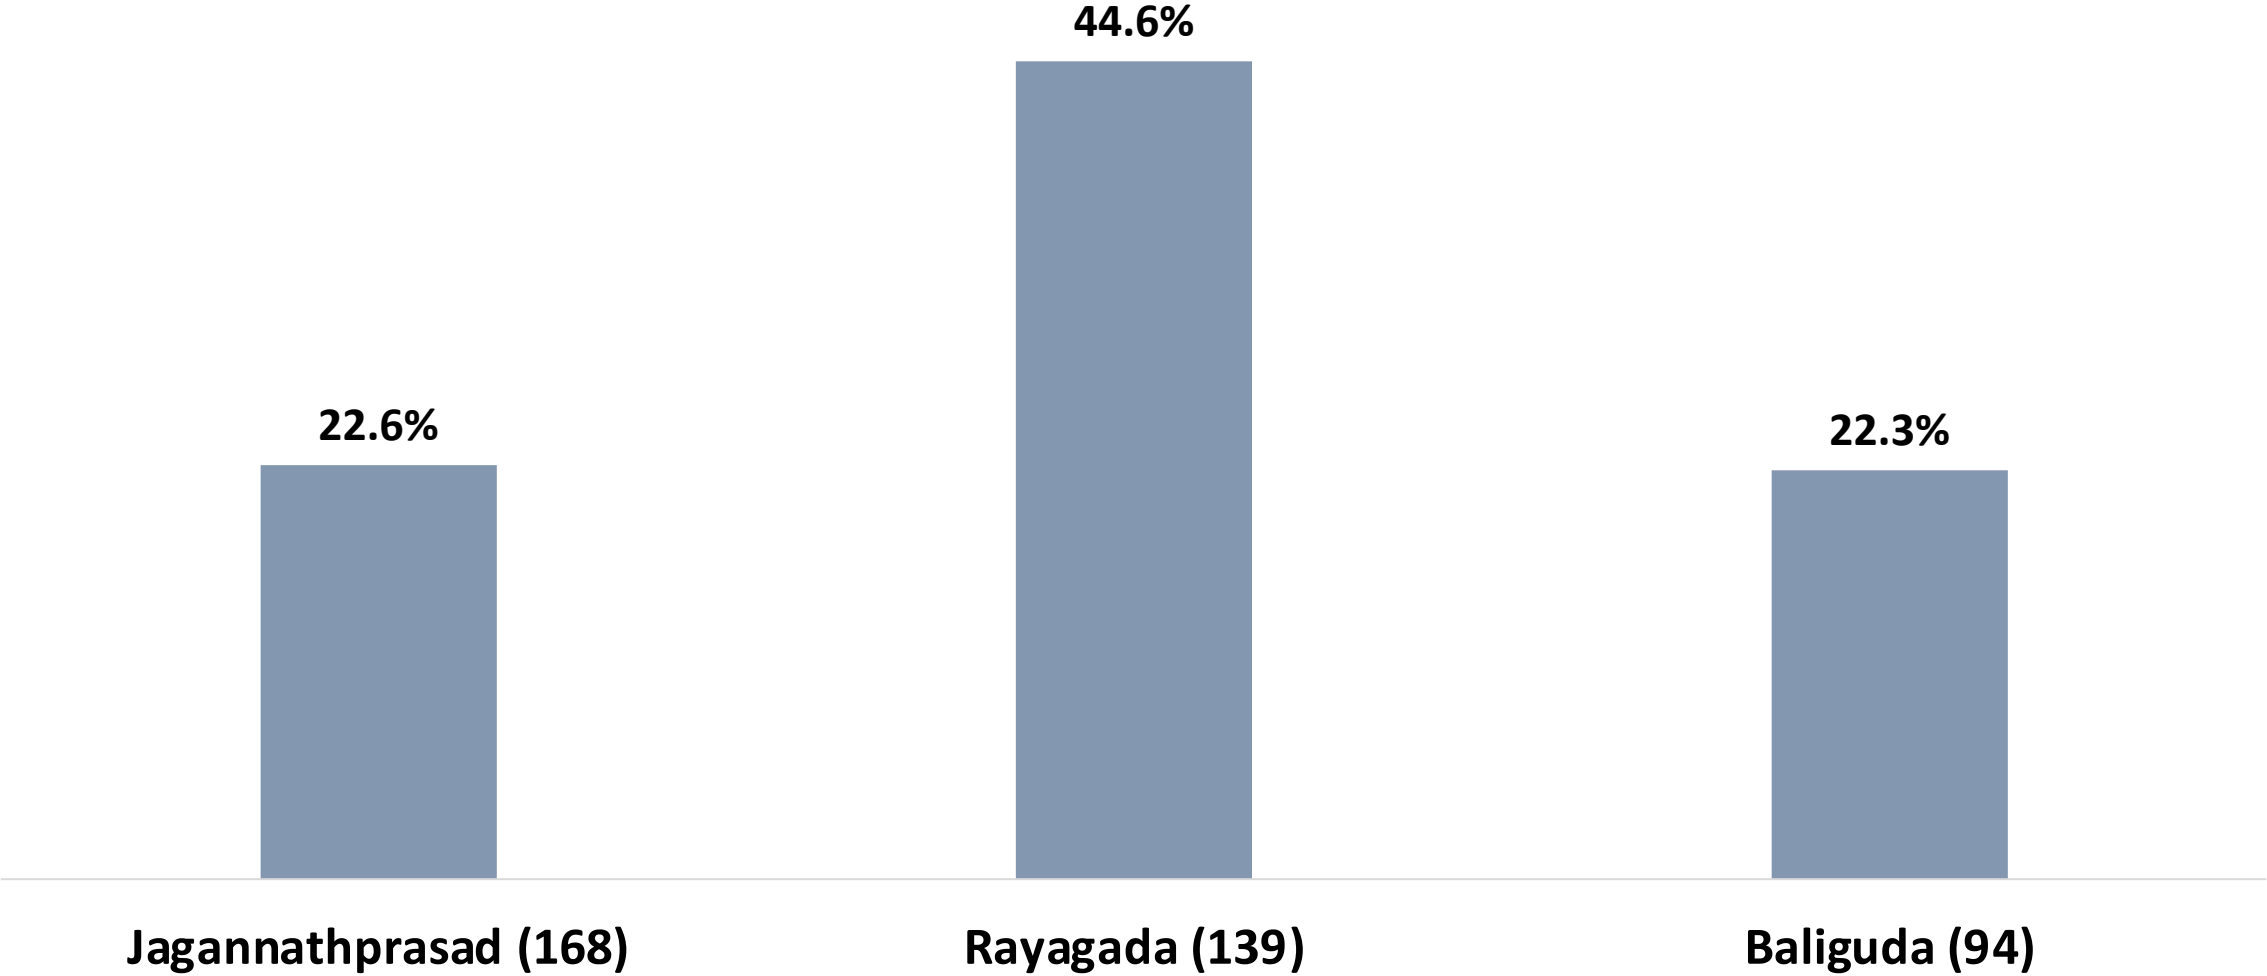

Median of remittances made

Median amount of remittances reported by the workers during three months prior to March 2020

Loss of employment due to COVID-19

Proportion of migrant workers who reported losing their job due to COVID-19 lockdown (not done for Thuamul Rampur Block)

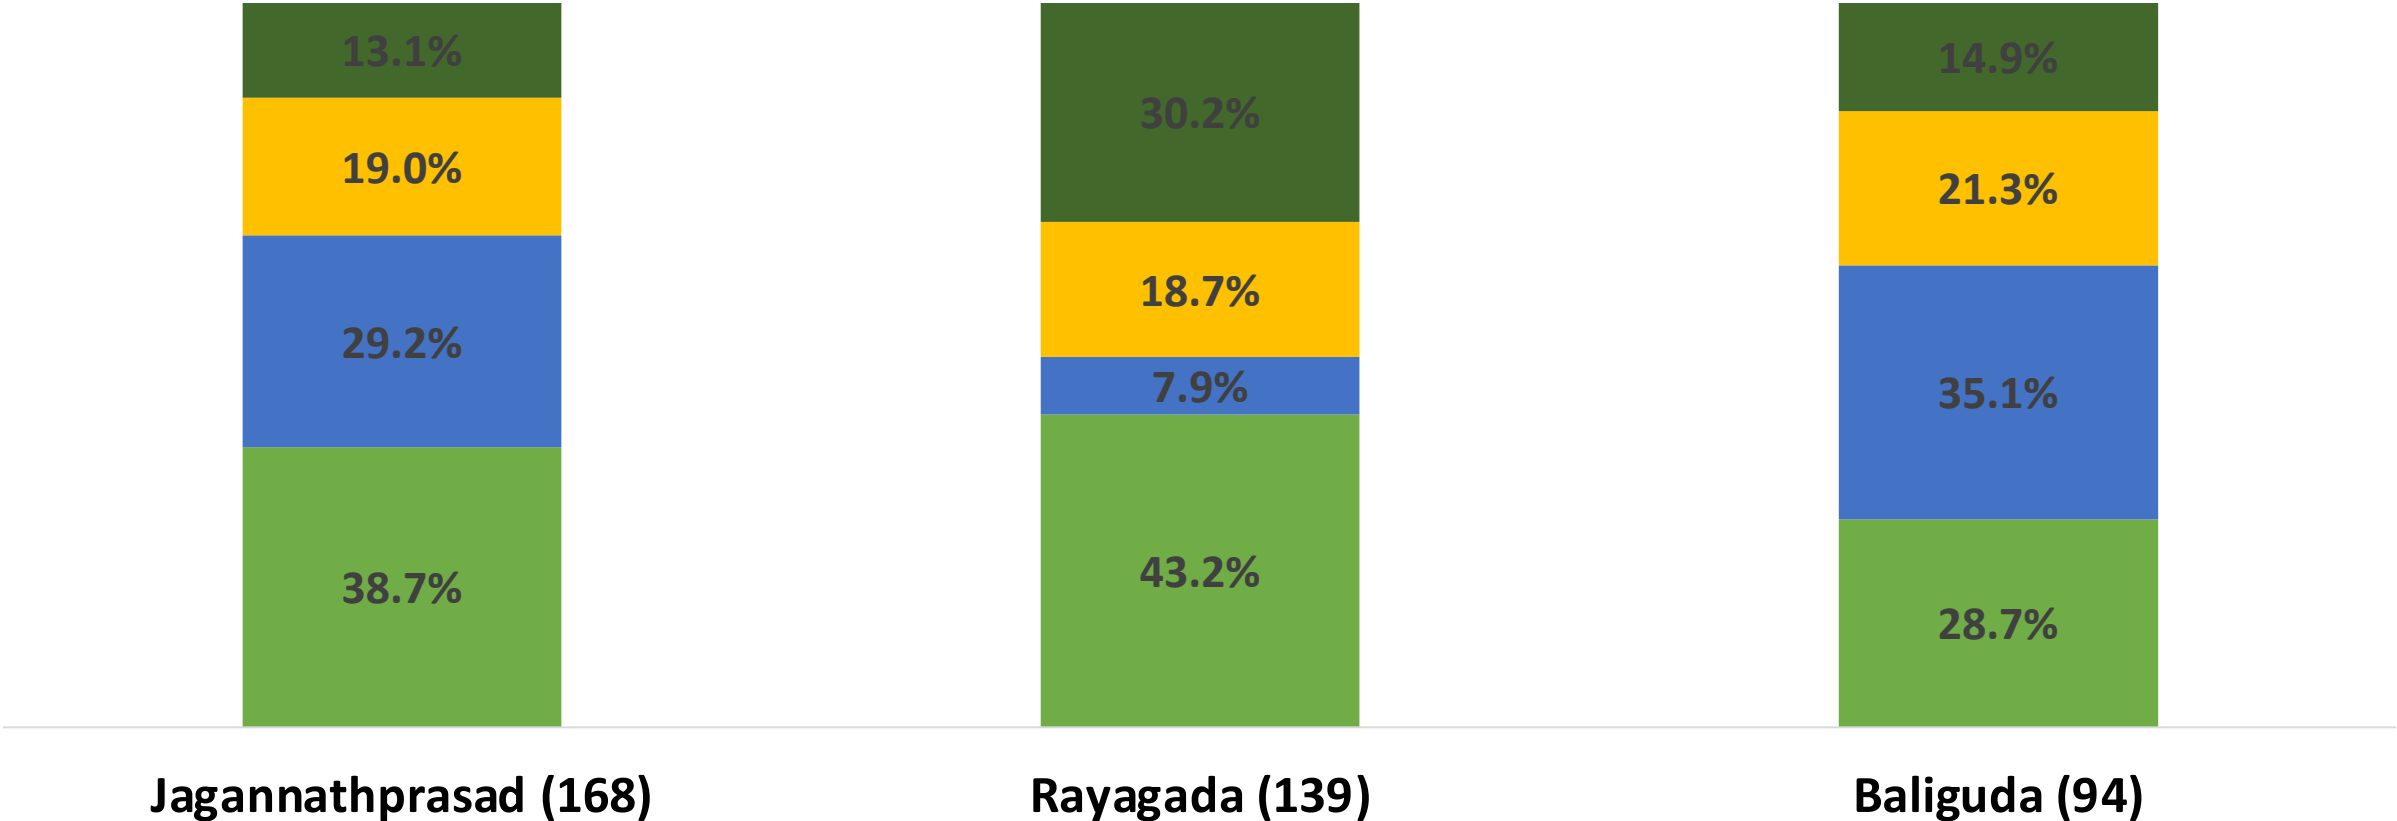

Response to COVID-19 – Stayed or returned

Distribution of migrant workers based on how they responded to COVID-19 lockdown (not done for Thuamul Rampur Block)

- Stayed at Destination

■ Returned after Lockdown
- Returned to Native Place during Lockdown

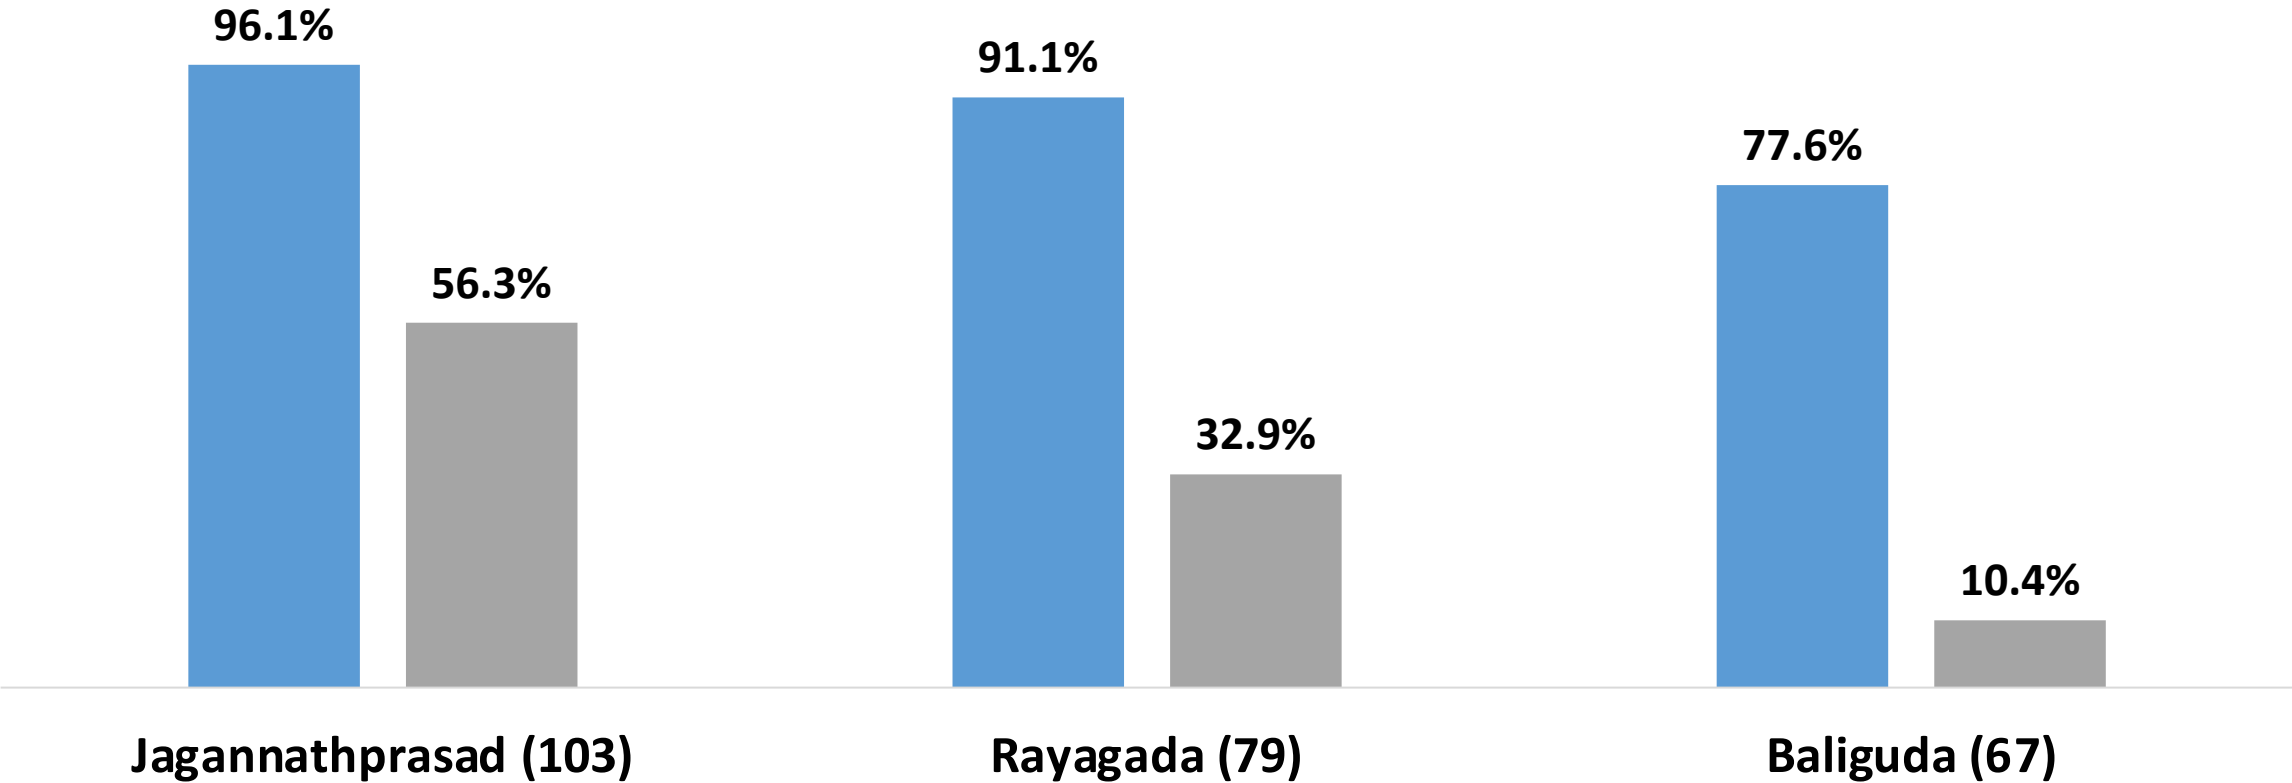

■ Returned Prior to Lockdown

Work opportunities after returning

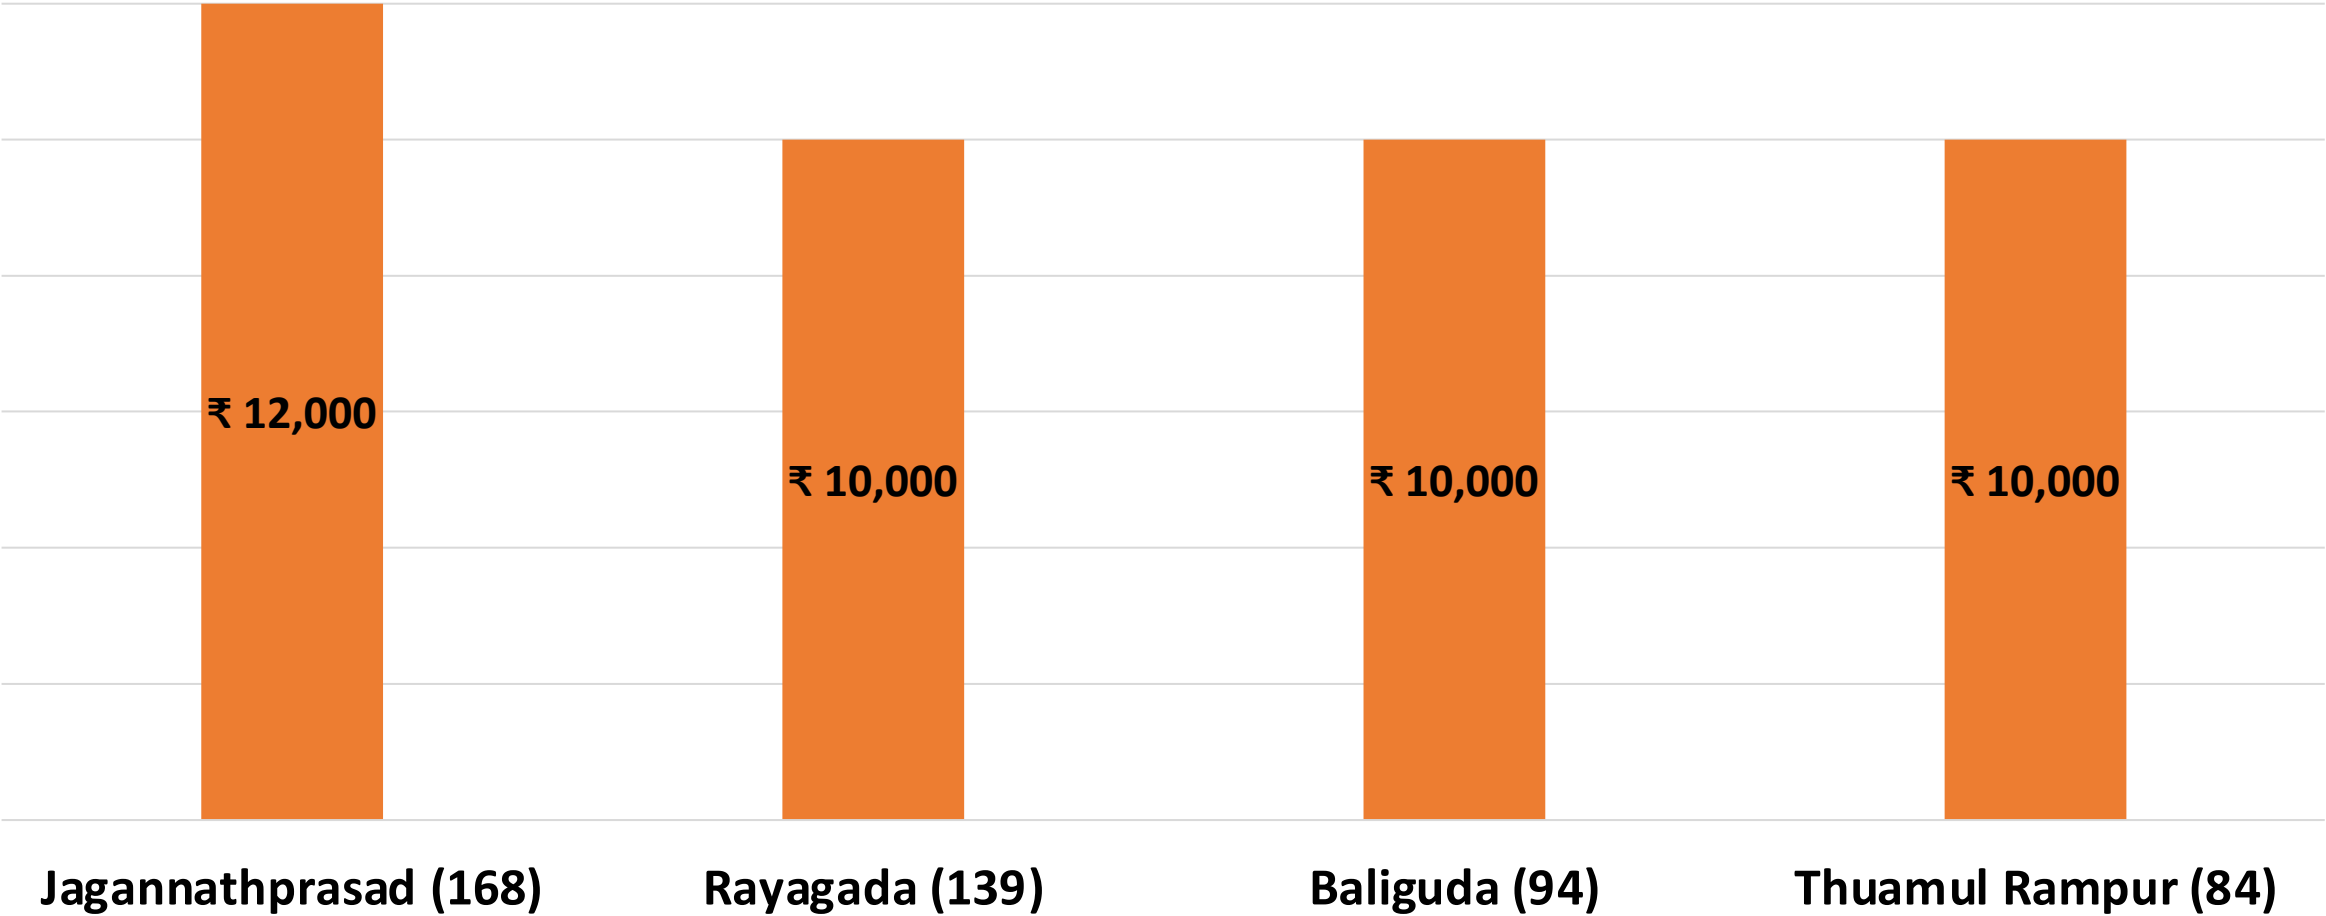

Proportion of migrant workers who returned during the lockdown who did not get any work (MGNREGS or others) in their native villages

■ Did not get NREGS work ■ Did not get any work

Income needed to prevent migration

Expected regular monthly income at native place that would prevent their migration as reported by the migrant workers

Labour Migration from Rural Odisha

Profiles of Four Blocks

Study Methodology

Sampling

- Self-weighted random sample for independent estimates for block
- Household Survey: 22 Primary Sampling Units (PSU) and 20 households per PSU per block
- Migrant Survey: Longest duration (T. Rampur), largest economic contribution to household (other blocks)

Sample size and data collection

Block	District	Sample Size : Household Survey (Period of Data Collection)	Sample Size : Migrant Survey (Period of Data Collection)
Thuamul Rampur	Kalahandi	440 (December 2019-January 2020)	84 (January 2020– February 2020)
Jagannathprasad	Ganjam	421 (November 2020 –December 2020)	168 (December 2020 - January 2021)
Rayagada	Gajapati	440 (November 2020-December, 2020)	139 (November 2020-December 2020)
Baliguda	Kandhamal	417 (December 2020 to March 2021)	94 (January 2021 to March 2021)
